**1. DEMOGRAPHIC AND SOCIAL PROFILE**

*NB: Figures and values in the profile only represent the population surveyed in household survey, not the total Afghanistan population, unless stated otherwise.*

**Summary**  
 Alice Ghan is a Land Allocation Scheme (LAS) located approximately 37 km northeast of Kabul City, along the "New Road" to Bagram.  
 Of the 104 households surveyed in Alice Ghan, 69 (66%) were IDP households and 35 (34%) were returnee households. The households encompass a combined total of 805 individuals with a gender ratio of 1.1 males for every female.  
 The average household size was revealed by the survey to be 8.1 persons among IDPs and 7.1 persons among returnees. Children (0-17 years) account for over half the average household size in both groups with equals numbers of both boys and girls.  
 The elderly (aged 60+) were found to constitute 3%-4% of the population in both household types. Approximately 3% of the population reported to be widowed with four times as many widows as widowers.

**2. MIGRATION PROFILE**

**Summary**

Among the households surveyed, the year 1386 (2007/08) witnessed the largest number of returnee arrivals in HRA with 13 returnee households and 21 IDP-RET households choosing to settle in Aliceghan. Also, the year 1386 (2007/08) witnessed the largest number of IDP arrivals with 9 IDP households choosing to settle in different HRAs. Since 1386 (2007/08), on average, approximately 5 returnee and IDP-RET households per year have chosen to settle in the area. Since 1386 (2007/08), an average 3 IDP households per year have chosen to settle in Aliceghan.

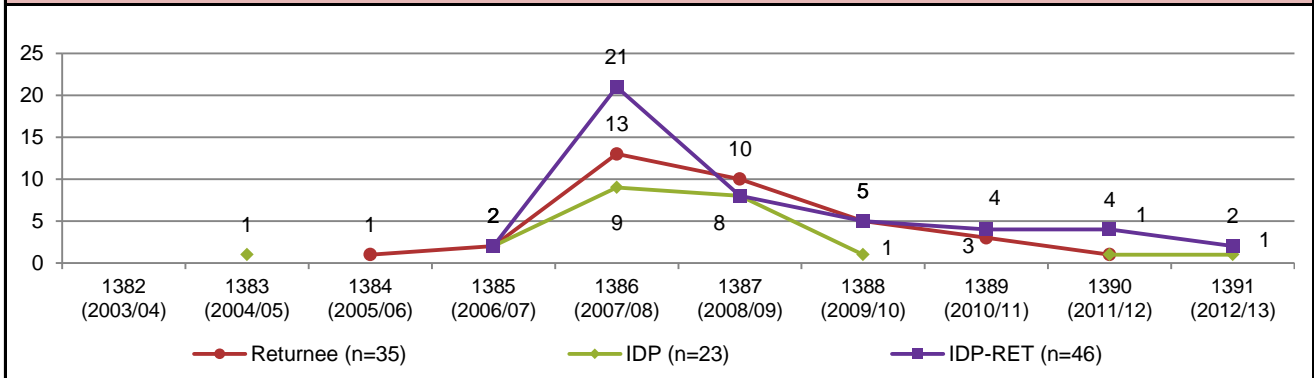

Of returnee and IDP households that have settled in Afghanistan in the last two years, all of both returnee and IDP households stated that they did so voluntarily. Of these, all of returnee and 87.5% of IDP households stated that they intend to remain in the area.

All returnee households had sought asylum in either Pakistan (37.8%) or Iran (6.1%) with 85.7% stating that they did so due to economic reasons. Four-fifths also cited safety reasons due to conflict and two-thirds cited family reasons. A further, over one-third of returnee households stated that they sought asylum due to harassment/discrimination reasons.

Among IDP households, 91.3 cited family reasons and over two-fifths stated economic reasons as the main reasons for having fled their districts of origin. Approximately one-third also cited harassment/discrimination reasons as having influenced their decision to move. A further, 8.6% stated that they have fled their districts of origin because of access to services.

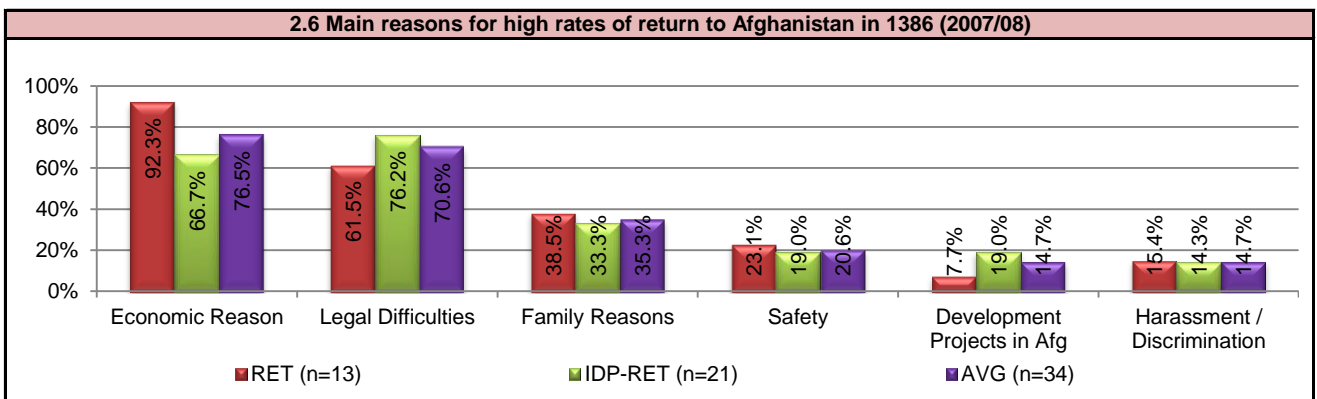

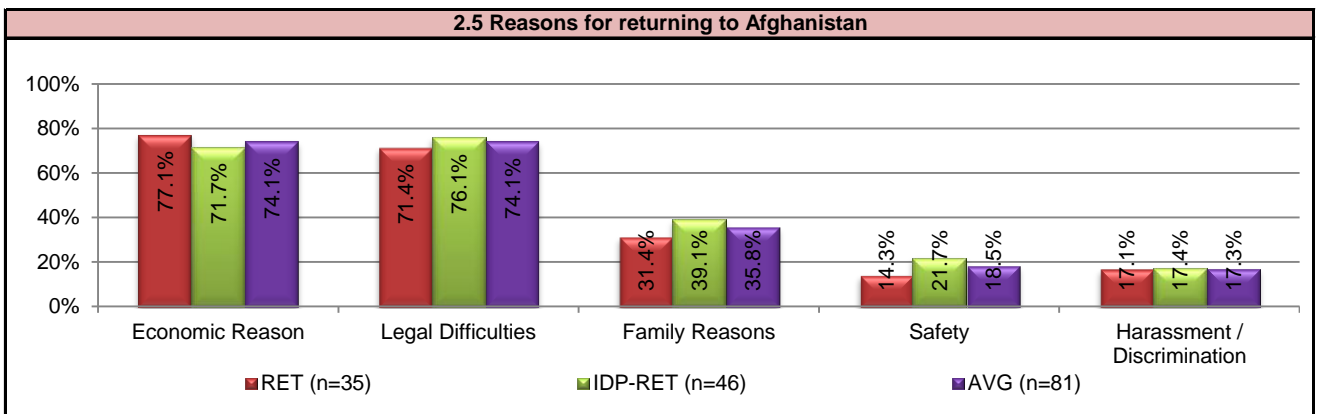

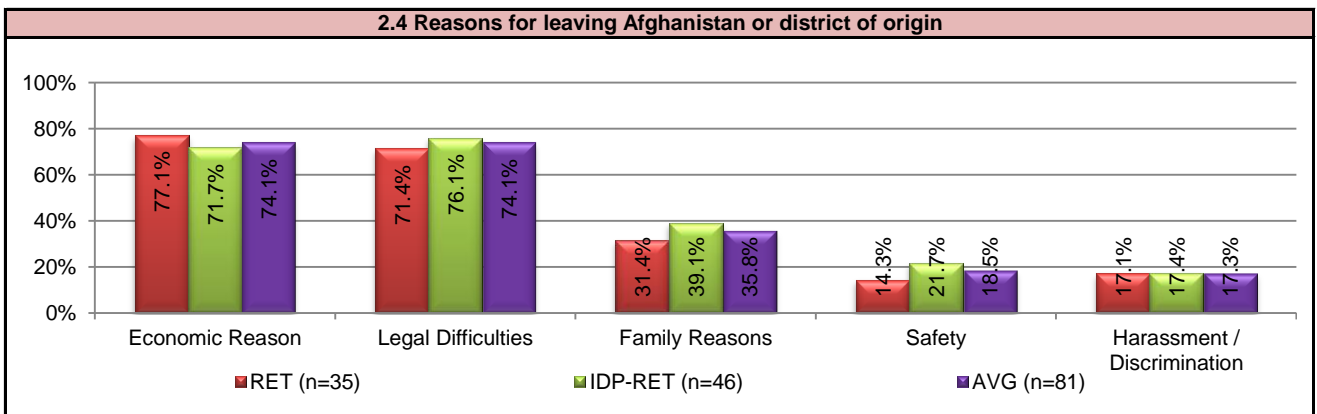

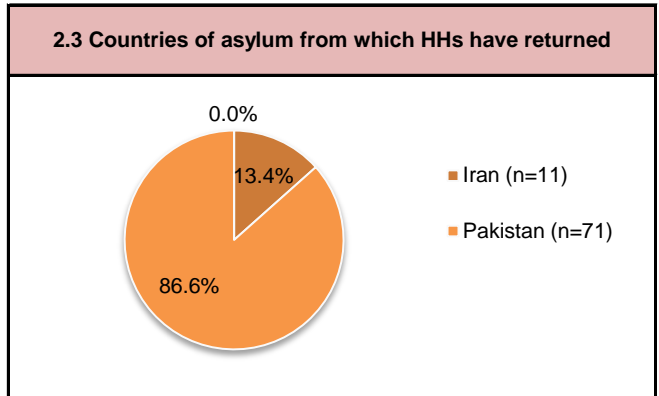

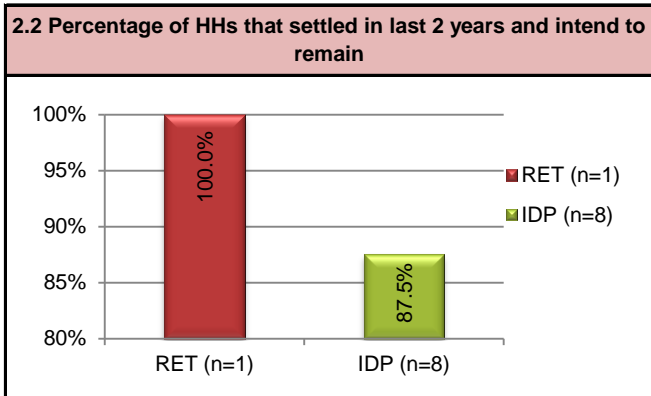

Approximately three-quarters of households stated that legal difficulties and economic reasons were the main reason of returning back to Afghanistan. Further, over one-third stated family reasons as having influenced their decision to return. A further one-fifth of households returned to Afghanistan because of safety reasons. A further, 17.3% also stated that they have returned back to Afghanistan because of harassment/discrimination reasons.

### 3. HOUSING STATUS PROFILE

**Summary**

Survey findings reveal that 91% of returnee households and 88% of IDP households currently occupy single family homes. A further 6% of returnee households were found to be residing in temporary shelters and 4% of IDP households reside in part of a shared house. Over four-fifths of dwellings in both groups were mud-brick or mud constructions. Similarly, over 70% of roofs were reported to be wood constructions with brick roofing accounting for one-fifth of all roofs.

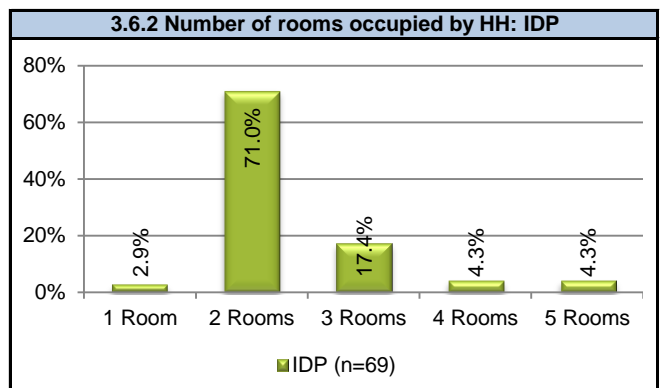

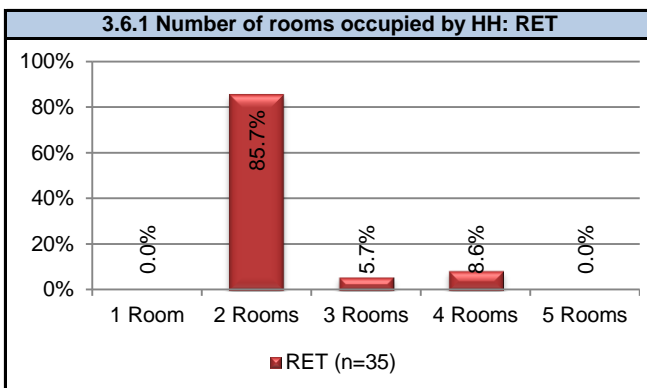

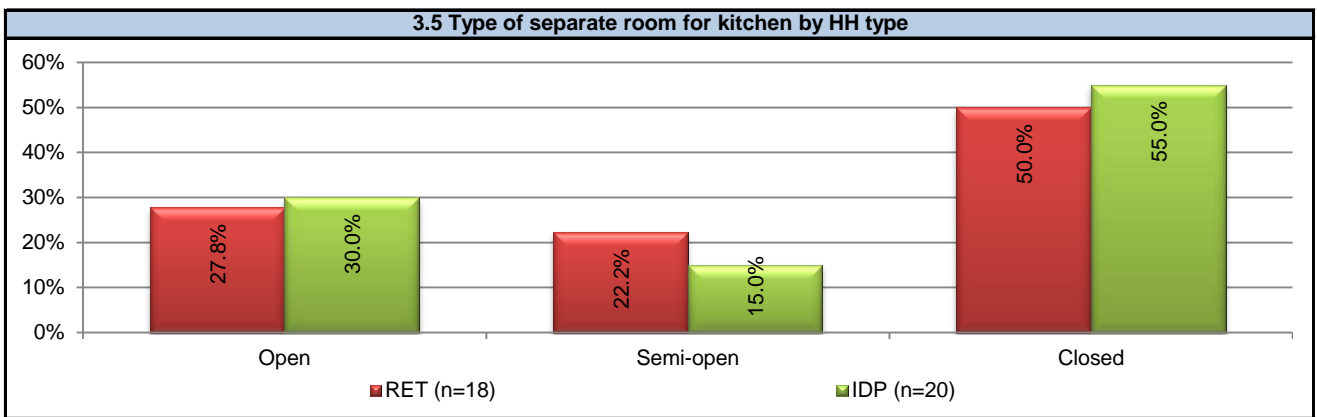

Two-room dwellings were revealed to be the most common dwelling type with 86% of returnee households and 71% of IDP households residing in such dwellings. Remaining returnee households were found to occupy four-room dwellings (9%) and three-room dwellings (6%). Three-room dwellings were the second most common dwelling type among IDPs with small numbers also residing in four-room and five-room homes.

With regard to cooking facilities, 51% of returnee households and 29% of IDP households have a separate kitchen. A further 36% of IDP households and 23% of returnee households stated that their kitchen takes up part of a room within the home. Approximately one-fifth of both household types cook in the open.

**4. WATER, ELECTRICITY, FUEL AND SANITATION**

**Summary**

**Water:** Bored wells is the main source of water for 62.9% of returnee households and 58.0% of IDP households and it is located on average approximately 14 minutes away from returnee households and 16 minutes away from IDP households. Tanker/bottled water are the source of drinking water for 25.7% of returnee households and 13.0% of IDP households located on average 13 minutes away from returnee households and 20 minutes away from IDP households. The other important sources are piped and handpump.

**Electricity:** Of the 104 households surveyed, a total of 72 (69.2%) reported to have had access to an electricity supply in the 30 days prior to being surveyed. Solar power was the most important source of electricity among 64.0% of returnee and 63.8% of IDP households. The remaining 36.0% of returnee and 36.2% of IDP households use batteries for the electricity.

**Fuel:** During the winter months, Charcoal/coal is the main source of heating for 62.9% of returnee households and 63.8% of IDP households. Firewood heats the homes of 17.1% of returnee and 20.3% of IDP households. Proportionally less IDP households (11.6%) use Bushes (ping), twigs/branches and straw as source of heating compared to returnee households (17.1%). Furthermore, only 4.3% of IDP households don't have any heating during winter.

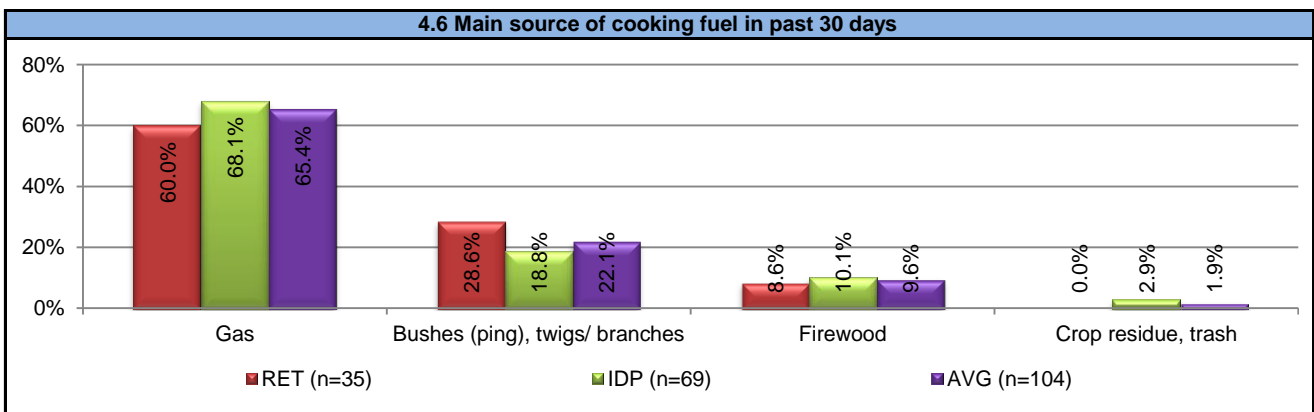

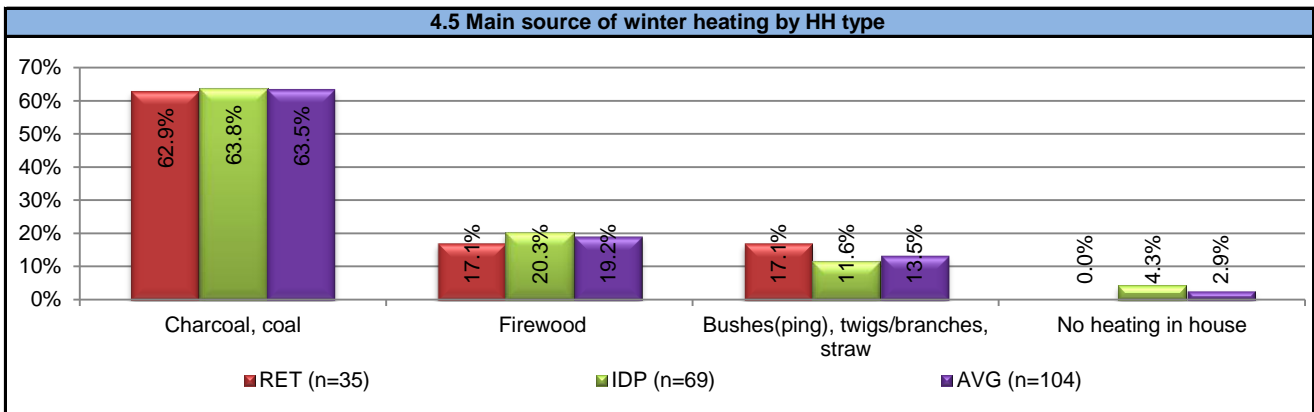

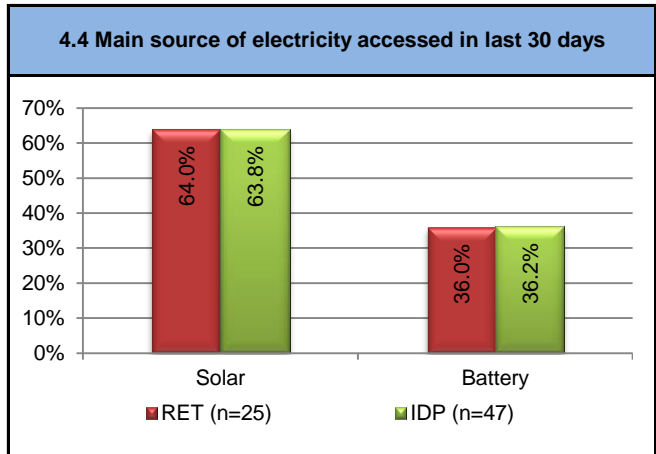

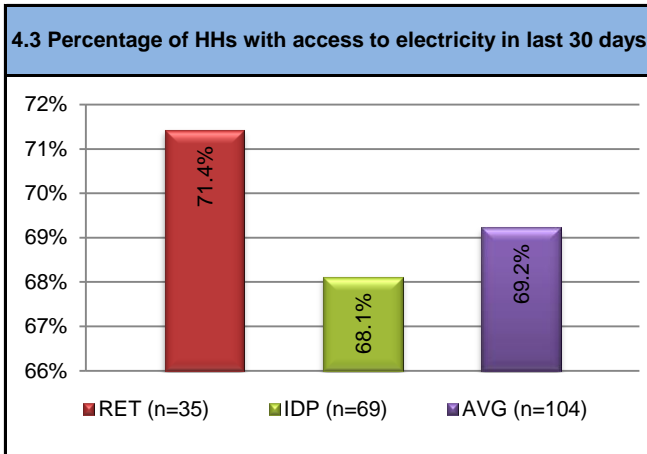

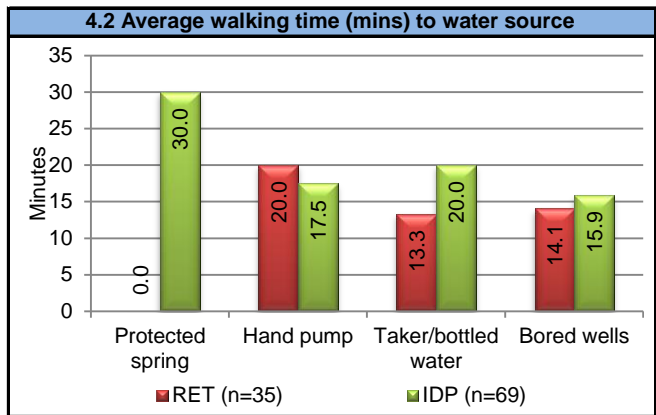

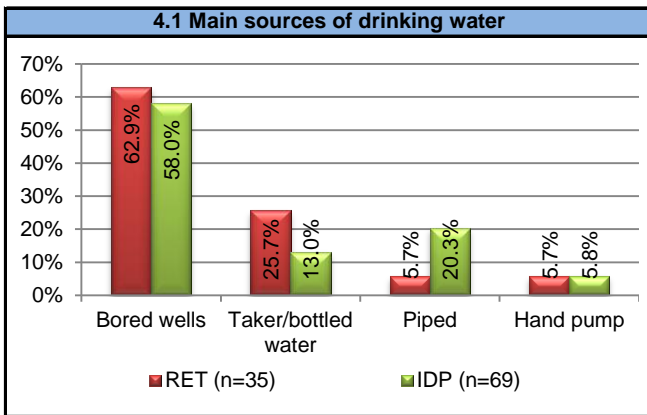

The main source of cooking fuel in past 30 days for returnee households (60.0%) and IDP households (68.1%) is Gas. A further, 28.6% returnee households and 18.8% of IDP households use Bushes (ping), twigs/branches and straw for cooking. Small percentages of both returnee and IDP households use firewood for their cooking. Whereas only 2.9% of IDP households use crop residue, trash for cooking.

**Sanitation:** 94.3 of returnee and 82.6% of IDP households have access to a traditional covered latrine. A further, 5.7% of returnee and 10.1% of IDP households use open pit as their toilet. Furthermore, Only 4.3% of IDP households use improved latrine and 1.4% of them use open field, bush, or sahrahi for toilet.

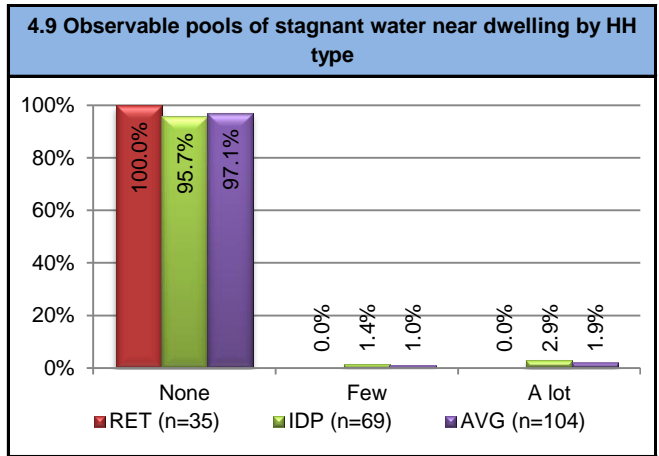

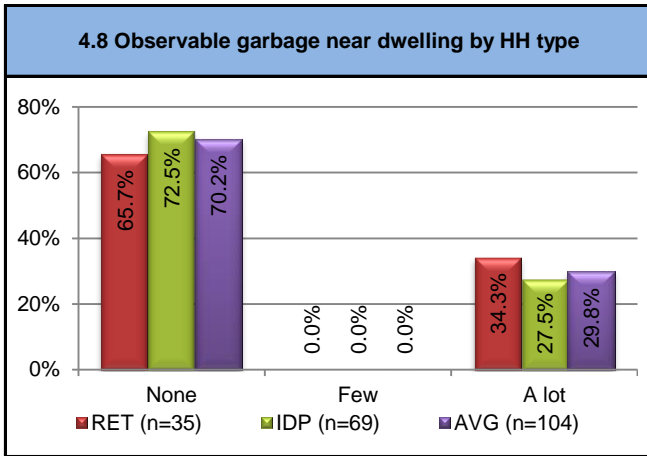

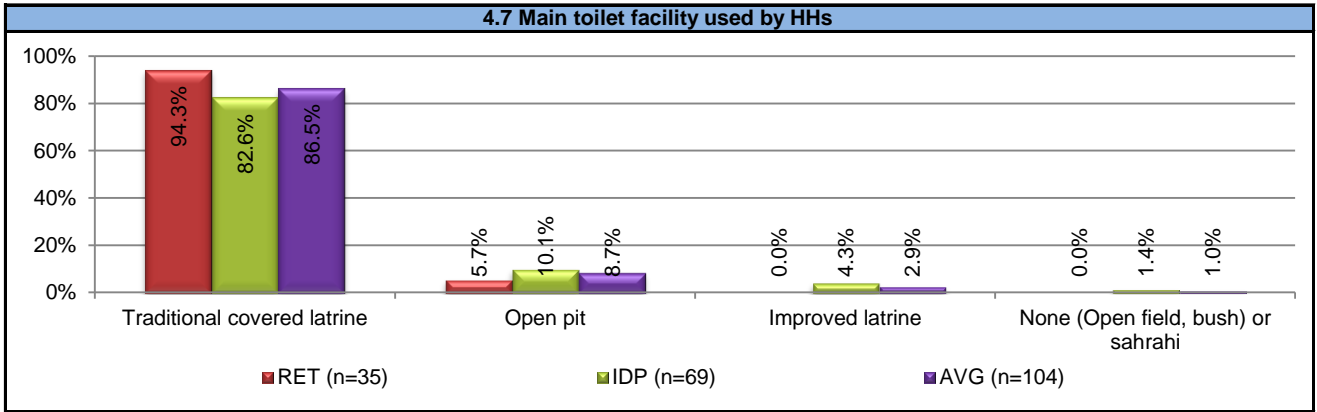

Surveyors took note of whether any garbage or pools of stagnant water were observed in close proximity to the households they interviewed. 65.7% of returnee households and 72.5% of IDP households didn't have any garbage near their dwellings. A further, 34.3% of returnee and 27.5% of IDP households had a lot of garbage near their houses. Also, all of the returnee households and 95.7% of IDP households didn't have any stagnant water near their dwellings. In addition, 1.4% of IDP households had little stagnant water while 2.9% of them had a lot of stagnant water near their dwellings.

**6. HOUSEHOLD INCOME, DEBT, ASSETS AND EXPENDITURES**

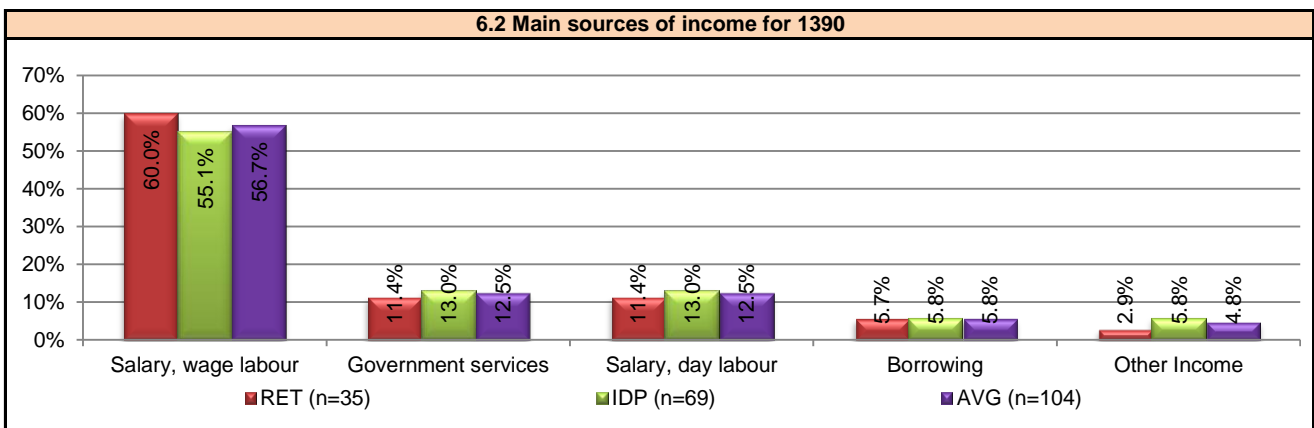

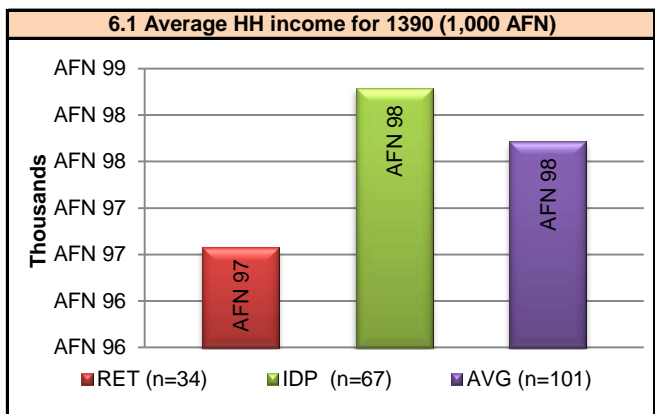

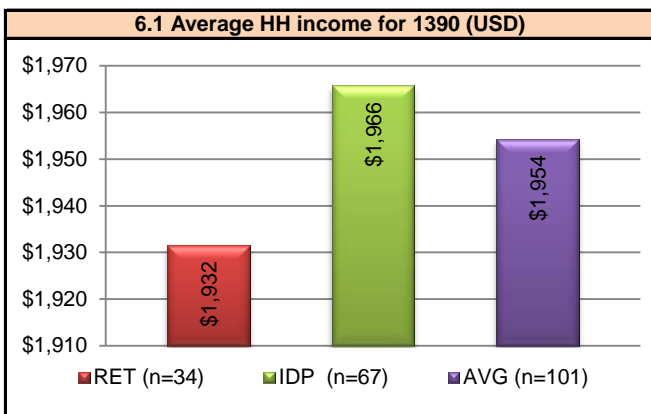

**Summary**

**Income:** Average household income in 1390 was USD 1,966 among IDP households and USD 1,932 among returnee households. Wage labour was the main source of income for both returnee (60.0%) and IDP (55.1%) households. IDP households (26.0%) were also marginally more likely to derive income from either government services or day labour than returnee households (22.8%). Approximately 6.0% of households in both groups had borrowed money.

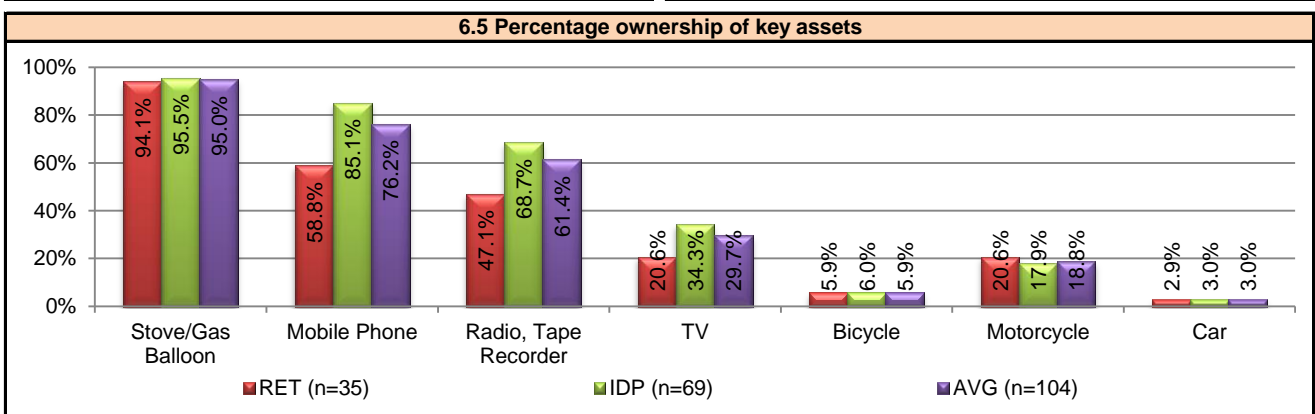

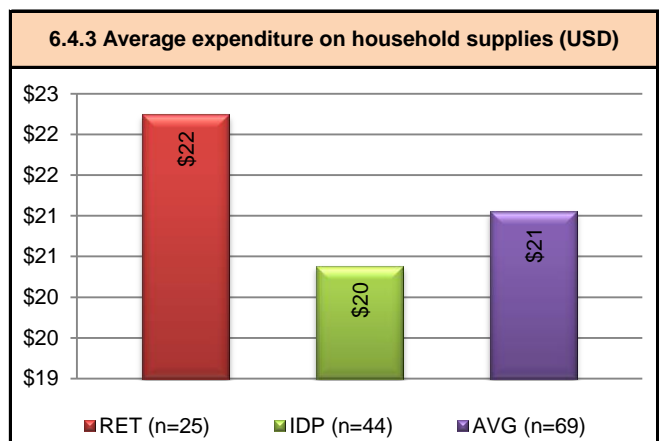

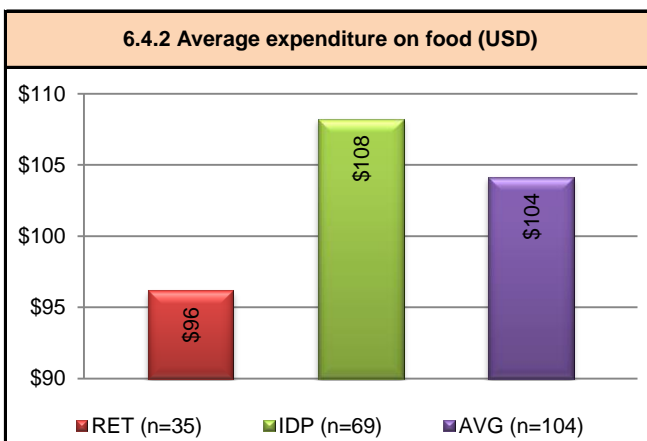

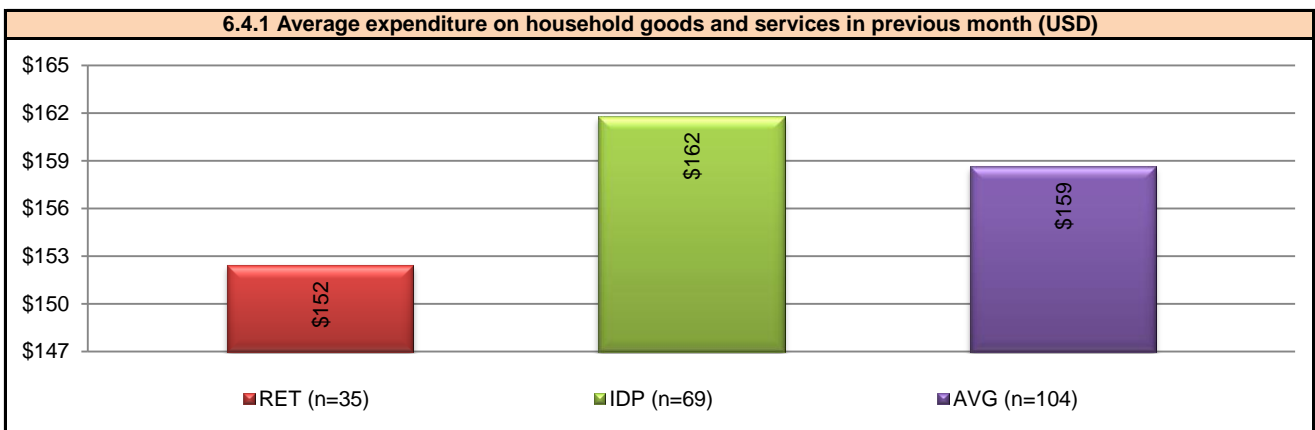

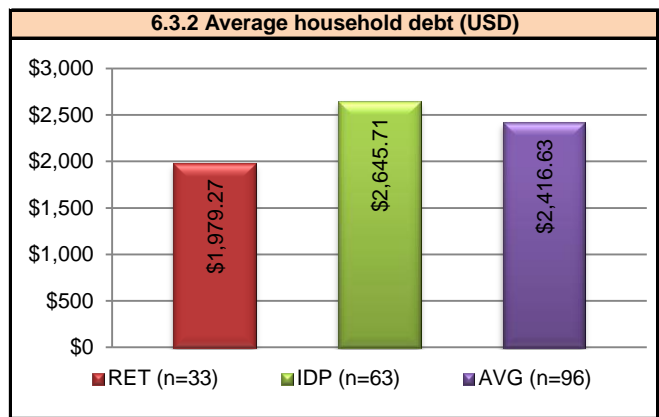

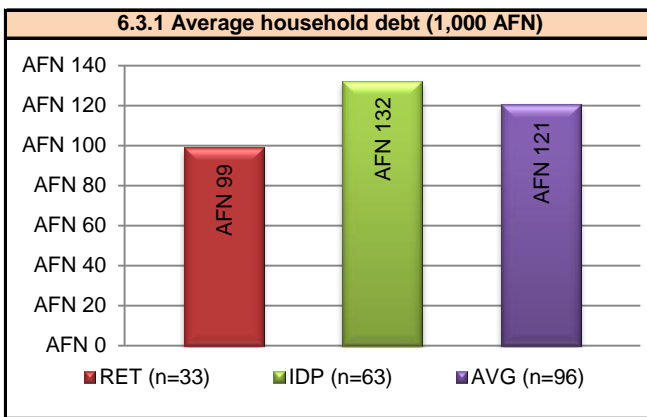

Average household debt was revealed to be USD 2,645 among IDP households and USD 1,979 among returnee households.

**Expenditure:** Average household expenditure in the month prior to being surveyed was USD 162 among IDP households and USD 152 among returnee households. Food supplies constituted the largest monthly expense for both IDP (66.7%) and returnee (63.2%) households. Both household types had spent comparable amounts on additional household supplies.

**Assets:** With regard to ownership of key household assets, over 90.0% of households in both groups own a stove/gas balloon. However, mobile telephone ownership was revealed to be significantly higher among IDP households (82.6%) than among returnee households (57.1%). IDP households were also significantly more likely to own a radio and a television set, while comparable proportions in both groups own a bicycle, motorcycle, and car.

**8. ACCESS TO SERVICES PROFILE**

**Summary**

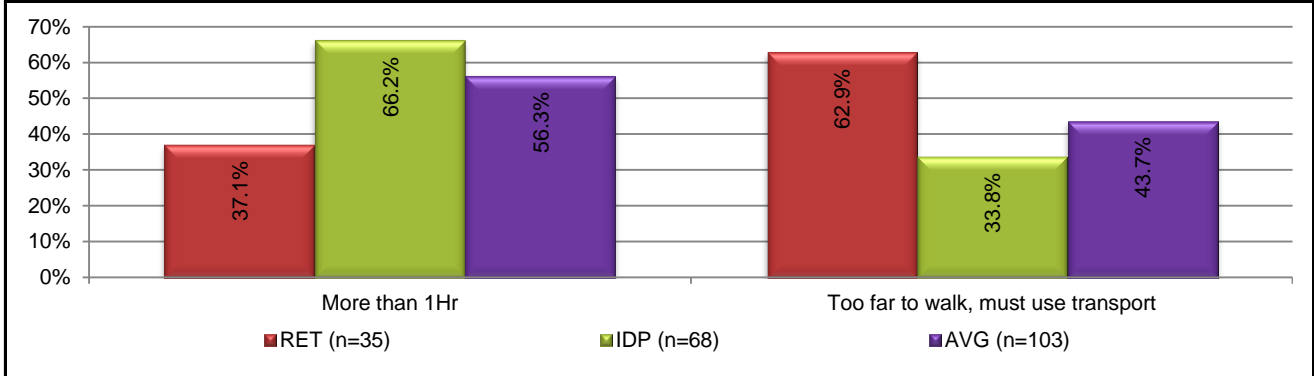

Among returnee households three-fifths (62.9%) of them stated that District Centre is too far to walk, must use transport while three-fifths (66.2%) of them stated that District Centre is more than 1 hour. In the last three months, the main reasons for travelling to the District Centre for both IDP and returnee households were to purchase goods or services or to work. Moreover, Over three-fifths (62.9%) of returnee households and three-quarters (72.1%) of IDP households stated that police station is 15-60 minutes away.

Over two-fifths (45.7%) of returnee households and over two-quarters (55.9%) of IDP households stated that public health centre is 15-60 minutes away from their households. For the vast majority in returnee and IDP households, the nearest private health clinic is either too far to walk to or 15-60 minutes away. The nearest hospital is too far to walk to for both returnee and IDP households.

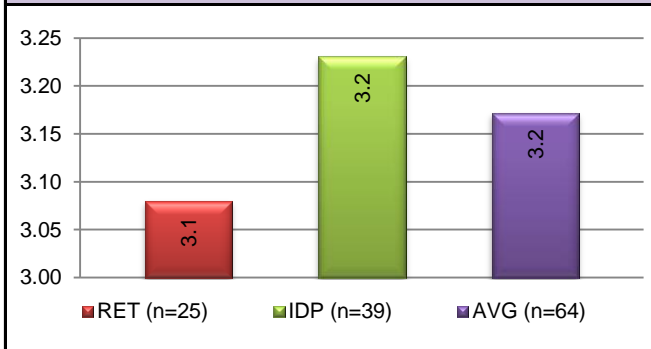

Two-fifths (44.1%) of returnee stated that their employment area is less than 15 minutes away while one-third (36.8%) of IDP households stated their employment area is 15-60 minutes away. Over three-quarters (77.1%) of returnee households and two-quarters (50.0%) of IDP households stated that their access to transport is less than 15 minutes away.

For returnee and IDP household, the nearest primary and secondary schools for boys are located less than 15 minutes away on foot while primary and secondary schools for girls are located 15-60 minutes away. In addition, the nearest high schools for boys and girls are located too far to walk, must use transport.

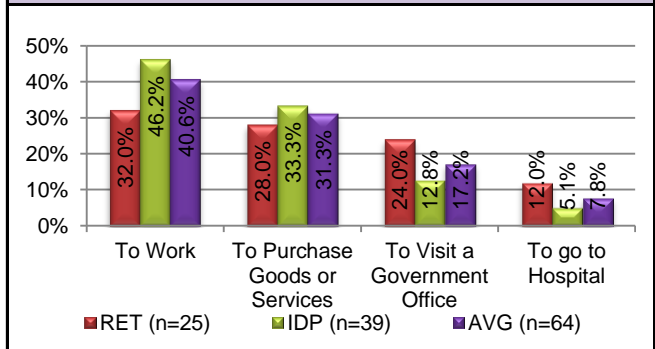

**8.1 Average time taken to walk one way to District Centre**

**9. EDUCATION PROFILE**

**Summary**

Among those aged five years and over, 48.8% of returnees and 56.3% of IDPs reported to be literate. Of these, 53.3% of returnee males and 58.8% of IDP males reported to be literate. Similarly, 43.8% of returnee females and 53.7% of IDP females reported to be literate.

Among adults aged eighteen years and over, 93.7% of returnee males and 97.7% of IDP males did not achieve any school grade. Similarly, 98.0% of returnee and 96.3% of IDP females had not achieved any school grade.

Among males aged 6 to 24 years, 70.6% of returnee males and 53.9% of IDPs males reported to be currently attending school. Among females aged 6 to 24 years, 62.3% of returnees and 59.9% of IDP females reported to be currently attending school. The main reason for not attending school given by those aged 6 to 24 years across both returnee and IDP was because they didn't like school or didn't learn enough. Furthermore, 16.4% of those aged 6 to 24 years across all three groups didn't go to school because children needed to work to help family. Also 14.0% of returnee and 14.8% of IDP members aged 6 to 24 years didn't attend school because family didn't allow them.

**10. HEALTH PROFILE**

**Summary**

57.1% of returnee households and 40.6% of IDP households had between one and two household members admitted to a health facility as an inpatient over the course of the previous month. Four-fifths (82.9%) of returnee and three-quarters (73.9%) of IDP households also had at least one member receive care from a health provider, a pharmacy or traditional healer without having to stay overnight. The private health facility was visited most by returnee and IDP, followed by the Regional Hospital. The most common reasons for seeking medical treatment by returnee households were digestive problems (18.8%), respiratory problems (18.8), cardiovascular problems (12.5%) and pregnancy problems (10.4%). Similarly, for IDP households the most common reasons were digestive diseases (15.1%), respiratory problems (13.4%), and treatment of infection problems (6.7%).

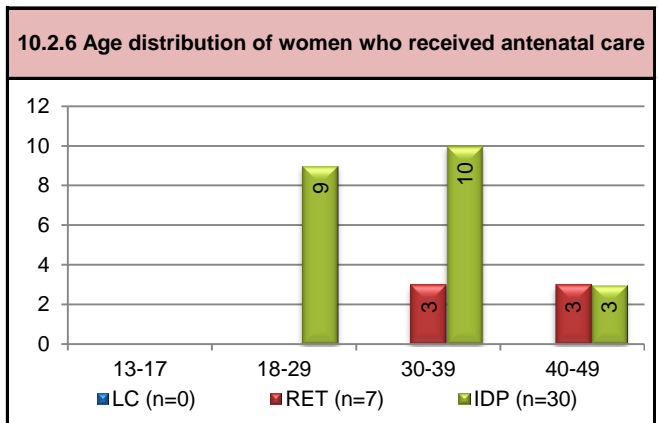

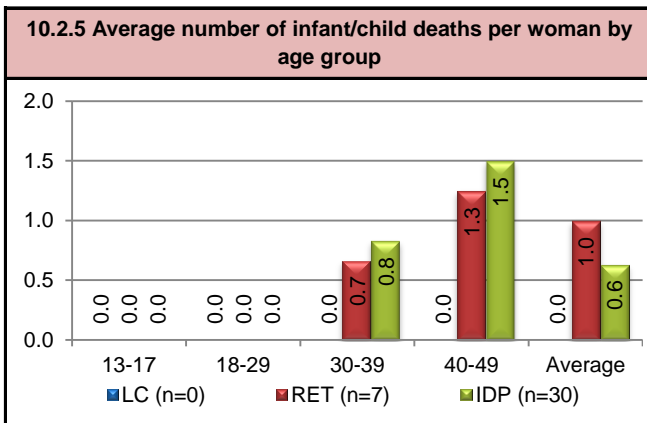

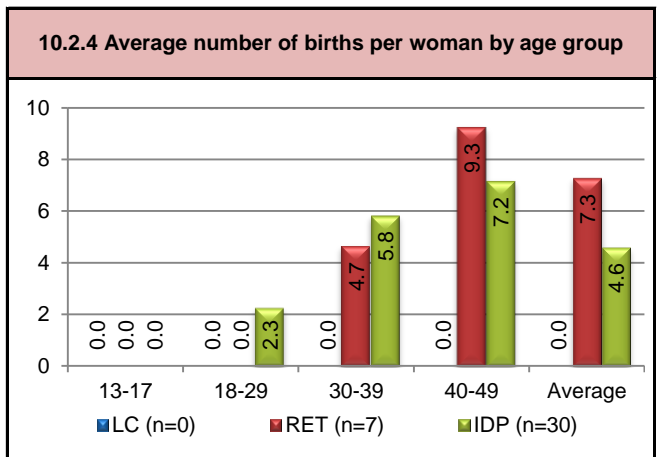

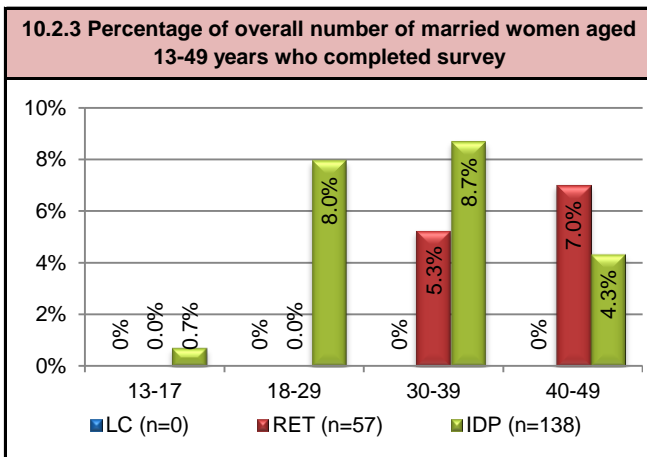

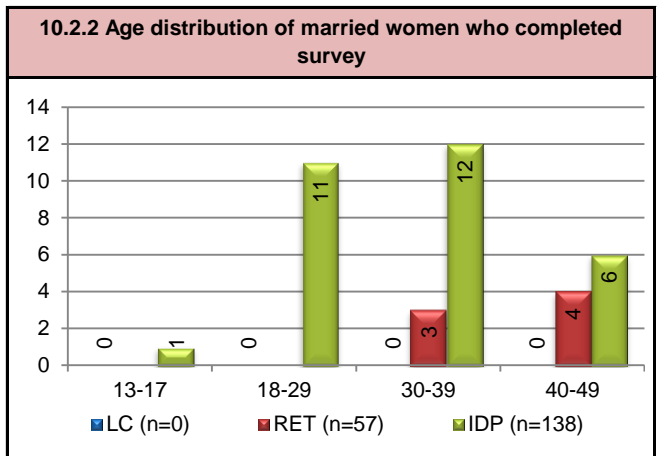

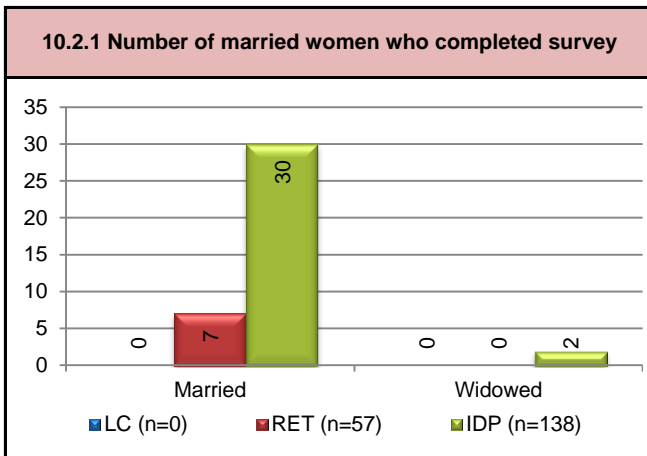

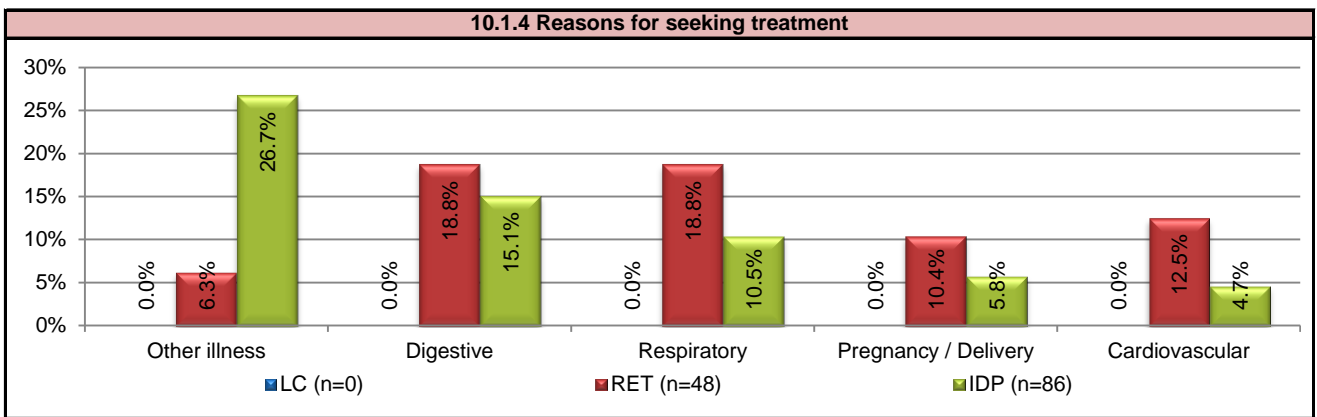

Of the 195 females aged 13-49 years that were included in the survey, a total of 37 were reported to be married among returnee households (n=7) and IDP households (n=30). Based on this data, the average number of births stands at 7.3 for returnee females and 4.6 for IDP females. Correspondingly, the average number of infant/child deaths is 1.0 for returnee females and 0.6 for IDP females. Of the 34 females aged 13-49 years that have given birth, 85.7% of returnee and 81.5% of IDP females received antenatal care during their last pregnancy with an average of 4.46 antenatal care visits per mother, and 50.0% had the assistance of a midwife during delivery.

With regard to children under the age of five, all of returnee children and 86.7% of IDP children have been registered with the civil authorities. Over the course of the previous month, 80.0% of returnee under-fives and 76.7% of IDP under-fives have received a Vitamin A capsule and two-fifths of returnee children and three-fifths of IDP children have suffered from diarrhea. In the range of (50%-60%) of both returnee and IDP children have a persistent cough.

**14. SAFETY AND SECURITY**

**Summary**

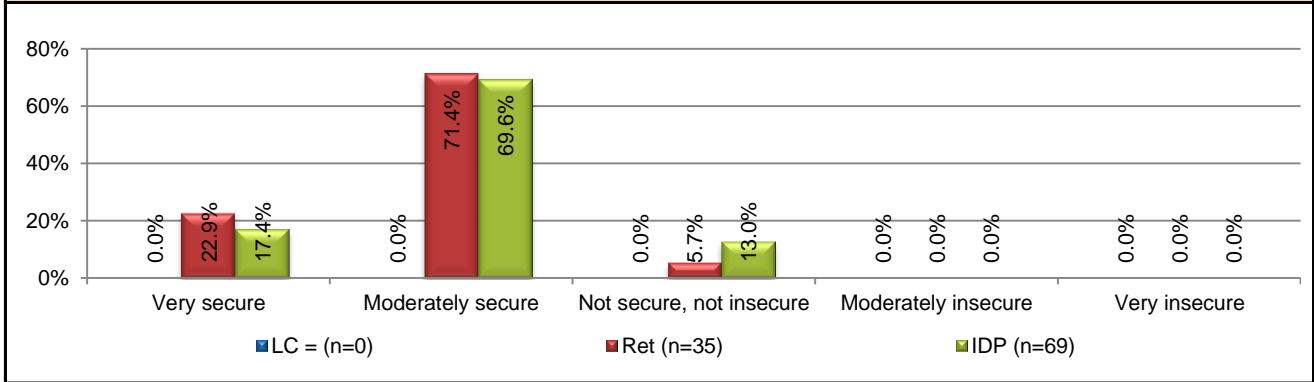

The security situation in the district was described as “moderately secure” by 71.4% of returnee households and 69.6% of IDP households. A further 22.9% of returnee households and 17.4% of IDP households described security in the area as “very secure.” Proportionally more IDP households (13.0%) consider the district to be “not secure, not insecure” compared with returnee households (5.7%).

Proportionally more IDP households (42.0%) reported “never” fearing for their personal safety and security or that of their family than returnee households (31.4%). A further 34.3% of returnee households and 26.1% of IDP households stated that they “rarely” do so. However, 22.9% of returnee households and 14.5% of IDP households reported “often” fearing for their safety.

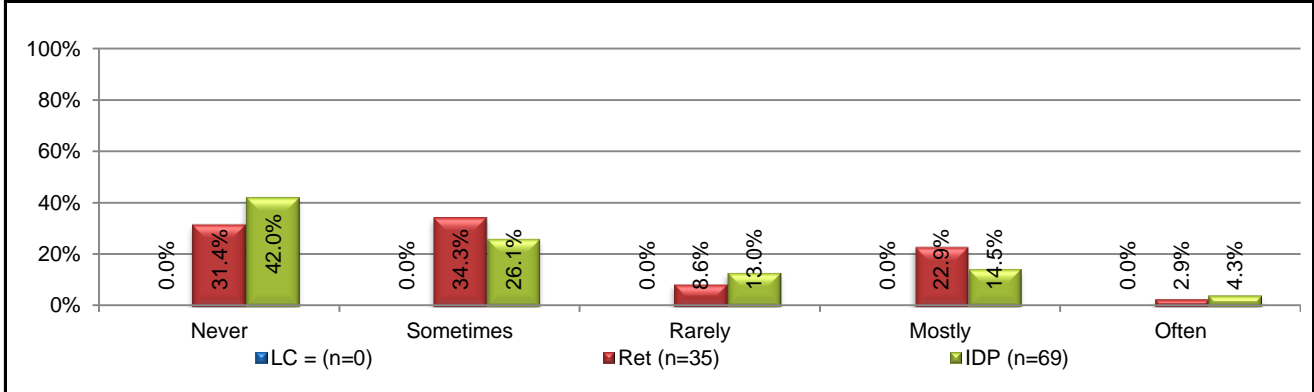

Approximately two-thirds of households in both groups reported to be “moderately satisfied” with policing in the district. A further 15.9% of IDP households and 11.4% of returnee households are “very satisfied”, while 20.0% of returnee households and 15.9% of IDP households are “not satisfied” with the police. A small proportion of IDP households (1.4%) are “very dissatisfied” with the police.

Four IDP households and one returnee household had experienced some form of violence in the three months prior to being surveyed.
