UNHCR Hotels in islands ⁴	Units	Current places	Current population
Lesvos	6	187	191
Chios	3	70	68

¹UNHCR and Operational Partners.

²Actual capacity is calculated as the subtraction of current places minus 17% which is this week's estimated average natural loss for mainland and 7% for islands. Natural loss is the number of places that cannot currently be used because of damages/repairs, protection issues, family size, etc. The formula applies to all type of accommodation. Actual capacity is a close estimate of available places to be used as reference.

³Occupancy rate is calculated as the percentage of current population over actual capacity.

*The actual available capacity is estimated to be at 625. This derives from 125 places on islands and 500 places on mainland. It can be used for immediate planning.

⁴The additional 257 places provided by UNHCR in hotels in the islands have been set up as an interim winterization solution.
