

During 2017, over 73,000 households living outside camps have been reached with assistance for shelter assistance and shelter upgrades in 2017 while some 17,500 households in camps have received similar assistance (12,000 in December). Some highlights of the Shelter Sector across the region in December include:

In Iraq, some 38 per cent of the Syrian refugee population lives in camps, where the sector's main interventions take place. In urban, peri-urban and rural areas, almost 900 families have been provided with assistance for shelter and shelter upgrades in 2017, while over 2,000 families in camps have received similar assistance (400 in December).

In Lebanon, of the households surveyed in the VASYR, 53 percent resided in dwellings that were overcrowded, had dangerous structural conditions, and/or urgently needed repairs, a large increase compared to 42 per cent in 2016. **In Jordan**, over 300 Syrians benefited from constructed, upgraded and/or improved shelters and associated facilities in December 2017, bringing the total in 2017 to 5,800. Meanwhile, access control areas for Base camp and Registration in Zaatari camp are being upgraded, including the installation of new access caravans. The implementation is expected to start on the early days of January 2018.
