Mortality	<p>02 (02 refugees and 00 nationals) deaths of under 5's and 00 among individuals > 5 years were reported. 02 deaths from health centers and 00 from the community. There was no (00) maternal death and 00 death among neonates and 00 stillbirths.</p> <ul style="list-style-type: none"> ▪ Crude mortality rate (CMR): 0.02 deaths/10,000/day. ▪ U5MR: 0.1 deaths/10,000/day. 	Health Workers per 10,000 Population	Total # skilled staff= 140 (medical officers, clinical officers, nurses and midwives). This translates to 12/10,000 population. Given the current population of under 118,251 (96,170 Rhino Camp, 19,174 Omugo and 56,657 nationals (Total 172,001), children <5 years 24,362 as at 31 st November 2017.		
Reproductive Health Mortality / HIV, TB care	<p>Antenatal Care:</p> <ul style="list-style-type: none"> ▪ Total ANC: 199 (73 refugees and 126 nationals) total ANC visits were made ▪ First ANC Visit: 37 (17 refugees and 20 nationals) attended ANC1 ▪ Fourth ANC visits: 28 (18 refugees and 10 nationals) attended ANC4 <table border="1" data-bbox="336 952 1469 1608"> <tr> <td data-bbox="336 952 946 1608"> <p>Labour and delivery care:</p> <ul style="list-style-type: none"> • 54 (32 refugees and 22 nationals) deliveries were conducted by skilled health workers. <p>Post-natal Care (PNC)/</p> <ul style="list-style-type: none"> • 116 (61 Refugees and 57 Nationals) mothers attended PNC. <p>Family planning services:</p> <ul style="list-style-type: none"> • 07 refugees were initiated on modern contraceptives <p>Elimination of mother to child HIV transmission (eMTCT) services:</p> <ul style="list-style-type: none"> • 37 (17 refugees and 20 nationals) pregnant mothers who attended ANC1 were offered HIV testing services and all were found HIV negative. • No (00) HIV positive delivery, therefore, 100% eMTCT coverage. </td> <td data-bbox="946 952 1469 1608"> <p>HIV and AIDS services:</p> <ul style="list-style-type: none"> • 01 (00 refugees and 01 national) individual was newly identified HIV positives. • 210 (139 refugees and 71 nationals) individuals were offered HIV testing services. • 01 new HIV positives was initiated on HIV care and support. • 6,592 pieces of condoms were distributed for HIV prevention in the community. <p>TB care and treatment:</p> <ul style="list-style-type: none"> • No (00) individual tested TB positives </td> </tr> </table>			<p>Labour and delivery care:</p> <ul style="list-style-type: none"> • 54 (32 refugees and 22 nationals) deliveries were conducted by skilled health workers. <p>Post-natal Care (PNC)/</p> <ul style="list-style-type: none"> • 116 (61 Refugees and 57 Nationals) mothers attended PNC. <p>Family planning services:</p> <ul style="list-style-type: none"> • 07 refugees were initiated on modern contraceptives <p>Elimination of mother to child HIV transmission (eMTCT) services:</p> <ul style="list-style-type: none"> • 37 (17 refugees and 20 nationals) pregnant mothers who attended ANC1 were offered HIV testing services and all were found HIV negative. • No (00) HIV positive delivery, therefore, 100% eMTCT coverage. 	<p>HIV and AIDS services:</p> <ul style="list-style-type: none"> • 01 (00 refugees and 01 national) individual was newly identified HIV positives. • 210 (139 refugees and 71 nationals) individuals were offered HIV testing services. • 01 new HIV positives was initiated on HIV care and support. • 6,592 pieces of condoms were distributed for HIV prevention in the community. <p>TB care and treatment:</p> <ul style="list-style-type: none"> • No (00) individual tested TB positives
<p>Labour and delivery care:</p> <ul style="list-style-type: none"> • 54 (32 refugees and 22 nationals) deliveries were conducted by skilled health workers. <p>Post-natal Care (PNC)/</p> <ul style="list-style-type: none"> • 116 (61 Refugees and 57 Nationals) mothers attended PNC. <p>Family planning services:</p> <ul style="list-style-type: none"> • 07 refugees were initiated on modern contraceptives <p>Elimination of mother to child HIV transmission (eMTCT) services:</p> <ul style="list-style-type: none"> • 37 (17 refugees and 20 nationals) pregnant mothers who attended ANC1 were offered HIV testing services and all were found HIV negative. • No (00) HIV positive delivery, therefore, 100% eMTCT coverage. 	<p>HIV and AIDS services:</p> <ul style="list-style-type: none"> • 01 (00 refugees and 01 national) individual was newly identified HIV positives. • 210 (139 refugees and 71 nationals) individuals were offered HIV testing services. • 01 new HIV positives was initiated on HIV care and support. • 6,592 pieces of condoms were distributed for HIV prevention in the community. <p>TB care and treatment:</p> <ul style="list-style-type: none"> • No (00) individual tested TB positives 				
<ul style="list-style-type: none"> • Achievements and Impact <p>OPD Consultations: 3,141 (2,079 refugees and 1,062 nationals) new OPD consultations were made with 66% being refugees and 33% being to nationals.</p> <p>Upper respiratory infections topped the most common ailments among the consultations with 31% and Malaria was second with 26% of the consultations and acute watery diarrhoea was among 5% of the OPD consultations. Therefore malaria, URTI and AWD contributed to 63% of the overall consultations as below. The incidence of malaria and watery diarrhoea is estimate at 7 cases/1000 persons/week, RTI 9 cases/1000 persons /week and AWD 2 cases/ 1000/ week respectively.</p> <p>Mortality and Morbidity:</p>					

- 02 (02 refugee and 00 nationals) deaths occurred. Of which 02 where under 5 years and 00 among above 5 years. 00 deaths were reported from the community and 02 from health facilities. Therefore, the Crude Mortality Rate (CMR) and Under-5 year mortality rates are estimated at 0.01 deaths/10,000/day and 0.1 deaths/10,000/day which is below the emergency threshold of 1 and 2 deaths/10,000/day respectively. The probable/ cause of death being 01 pneumonia and 01 severe anaemia.

Community Disease surveillance and control of Outbreaks

- No (00) reports of suspected diseases of outbreak potential was reported. In the settlement out of the 269 trained VHT's 194 are actively involved in reporting cases from the community to health facilities.

Others activities and highlights in the week

- SCI continued to conduct daily outreaches in Omugo extension and Ofua I health post. SCI reached 735 (660 refugees and 75 nationals) with medical consultations in the community.
- MTI, GRI and SCI continued to carryout routine static and outreach activities in the 7 zones of Rhino Camp settlement and other partners most notably Arua district local government at Siripi, GRI at Odoubu HCII, MTI at Ofua, Olujobo and Ocea and Omugo I health post.

Identified Needs and Remaining Gaps

- No major challenges reported.

Nutrition

Partners: Andre Foods International (AFI), Pentecostal Assemblies of God (PAG), Save the Children International (SCI), Medical Teams International (MTI), Global Refuge International, ADLG, CUAMM Doctors with Africa, WHH, AMREF

Narrative

Achievements and Impact

- 44 children < 5 years and 22 pregnant and lactating women were screened for their nutritional status at Kuluba transit center with a proxy GAM rate of 2.2%.
- In the Rhino settlement, 2,266 children less than 5 years and were screened. Therefore, the weekly proxy Global acute malnutrition in Rhino Camp settlement is 0.9%. The proxy GAM rate were distributed as follows with Siripi at 5.0%, Omugo zone at 2.8%, Ofua at 4.1%, and Olujobo at 0.0%.
- 19 individuals were enrolled in targeted Supplementary feeding program and 87 mothers in maternal child health nutrition program.
- 16 individuals in the targeted supplementary feeding programme were exited from nutrition programmes, of which only 15 had cured, 00 transferred out, 00 transferred to OTP/ITP, 00 defaulters, and 01 non response. Overall for Rhino Camp settlement recovery rate in week 01 was 94%. Other performance 0% death rates, 01 (6.3%) non response rate, defaulter rates 0 (0%) within acceptable standards of less than 15%.

Other nutrition activities during the week

- **Health Education and IYCF sensitization:** AFI reached 649 individuals with maternal IYCF messages.
- **IYCF through mother baby areas:** During the week SCI continued to run 3 MBA's in Eden and in Rhino Camp and 03 in Omugo.

Identified Needs and Remaining Gaps

- No major challenges reported in epidemiological week 01
