Internally displaced people
Source: OCHA

941,000

Planning population of DRC refugees by December 2018.

BASIC INFORMATION

POPULATION FIGURES

- The figures in this report have been updated to reflect the results of a **continuous biometric registration and verification exercise** in countries of asylum.
- The total figures include additions (new arrivals and births) and subtractions (departures, deaths, no-shows during food distributions and deactivations).

EMERGENCY LEVELS

- On 20 April 2018, the **highest emergency level (L3)**, which was declared by the UN on 20 October 2017 for six months for some parts of DRC, including the Kasai region, South Kivu and Tanganyika provinces, was deactivated.
- The L1 which was activated on 10 September 2017 for Zambia and the L2 on 16 February for Uganda, are ongoing.

FUNDING

- As of the end of July, UNHCR received **\$37.5 million** for the DRC situation, representing **only 10 per cent** of the total requirements for 2018, which amount to \$368.7 million.
- The interagency Regional Refugee Response Plan (RRRP) for the DRC situation has received **\$59.6 million**, as at 17 July, representing only **11 per cent** of the total requirements for 2018, which amount to \$547 million.
