

Multi-Sector Needs Assessment - July 2018

All Camps, Ukhiya/Teknaf, Cox's Bazar, Bangladesh

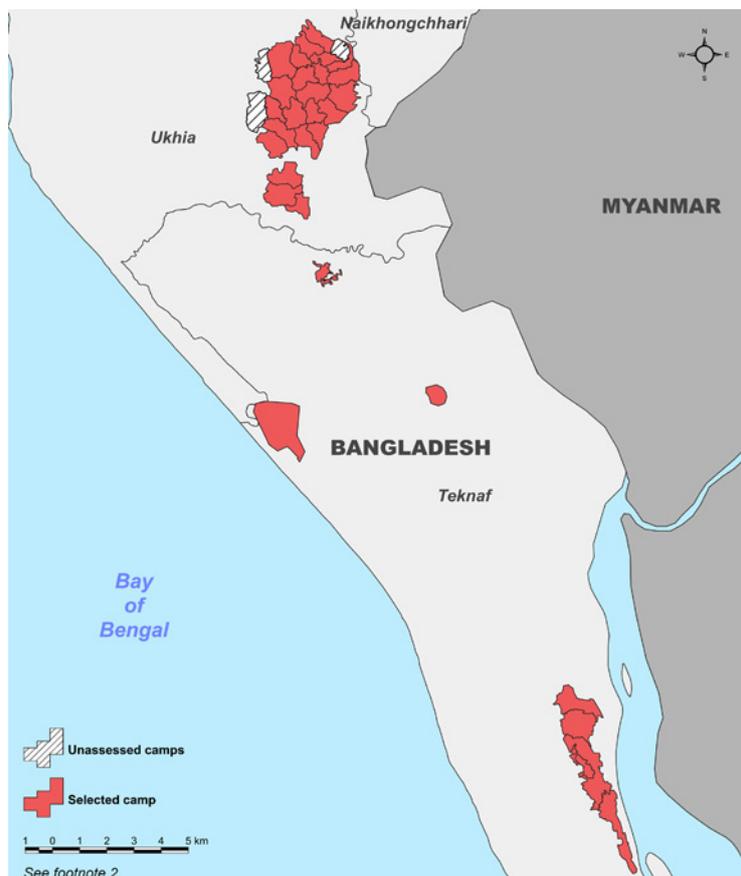

Background and Methodology

An estimated 723,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017¹. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The monsoon season began in May and continues into September, threatening the vast majority of refugees living in makeshift shelters and settlements highly vulnerable to floods and landslides.

To understand the evolving priority needs of the refugees, an inter-agency Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 31 refugee sites using a household survey methodology. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

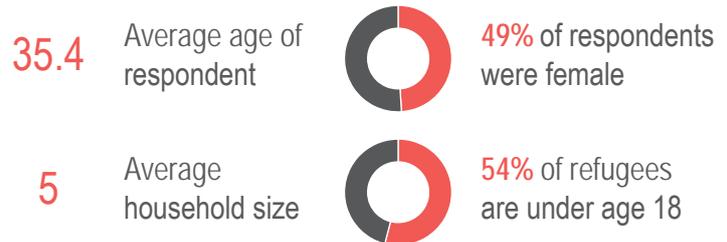

Results of this MSNA are generalizable to the aggregate level with 95% confidence level and 5% margin of error. This factsheet presents an analysis of data collected in all 31 camps where 3,171 households were surveyed between 2 and 31 July 2018.

In order to avoid duplication, data on WASH and Food Security were not extensively collected. WASH data was collected by REACH in April 2018 and can be found [here](#)³. More information on Food Security can be found in the Light Food Security Monitoring exercise by VAM / WFP.

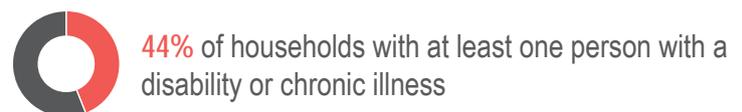

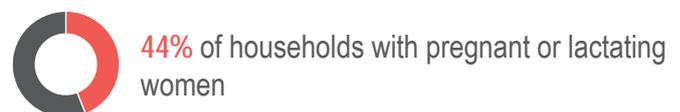

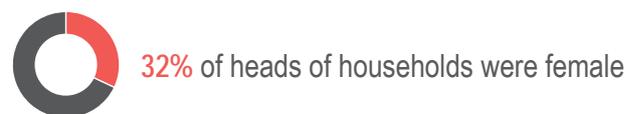

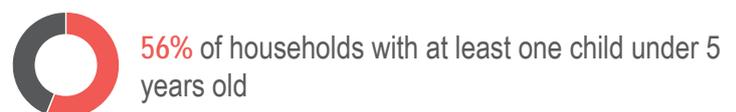

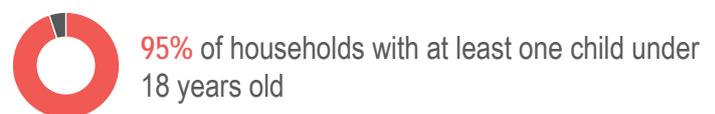

Population in camp (individuals)¹ **863,880**

Population in camp (families)¹ **199,470**

Demographics

Composition of surveyed households

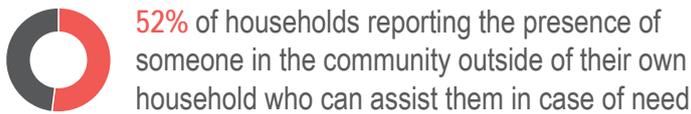

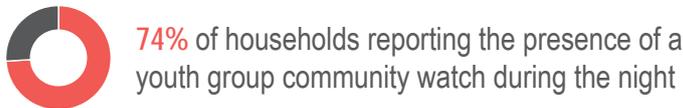

1. As defined by UNHCR in the population data and key demographical indicators (15 July dataset)
 2. The boundaries and names used on this map do not imply official endorsement or acceptance by the United Nations
 3. REACH, Bangladesh WASH Camp Profiling Factsheets, July, 2018. <https://bit.ly/2pgqFLX>

Multi-Sector Needs Assessment - July 2018

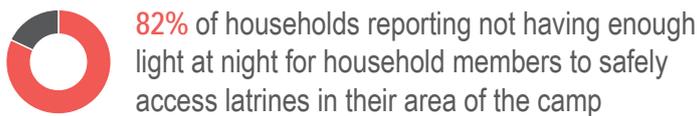

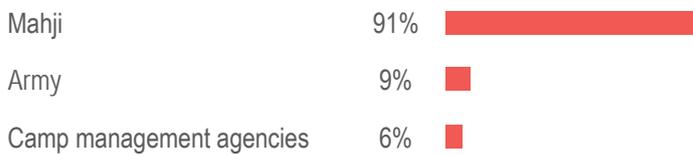

All Camps, Ukhiya/Teknaf, Cox's Bazar, Bangladesh

Protection

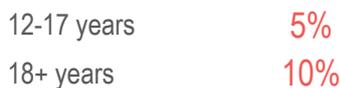

% of households reporting safety concerns (read: fears) for boys and girls (aged under 18)^{4,5}

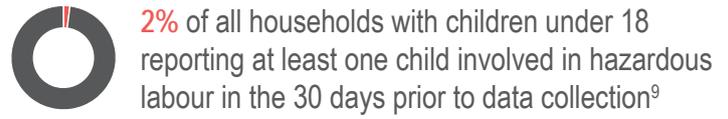

% of households reporting first port of call for assistance in dealing with safety or security issues^{4,6}

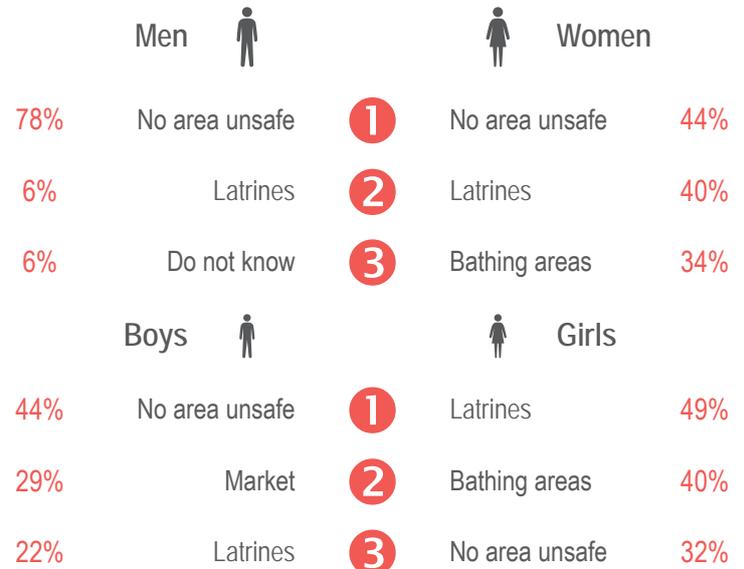

% of women reported to be attending activities at an NGO-run space where only women and girls are allowed in the 7 days prior to data collection⁷

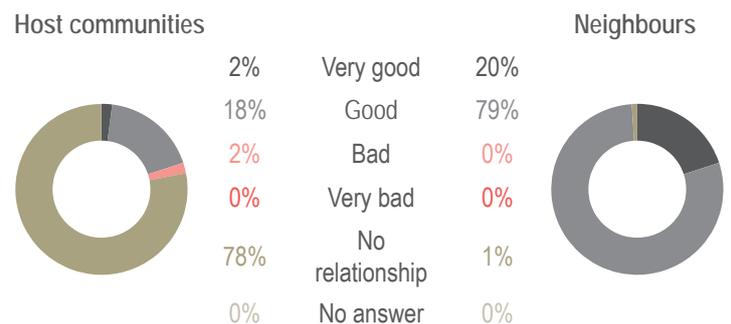

% of children reported to be attending activities at an NGO-run safe space for children in the 7 days prior to data collection⁸

% of households reporting areas in the camp where men, women, boys, and girls do not feel safe^{4,10}

% of households reporting different relationships with Bangladeshi host community and refugee neighbours in the same block

4. Respondents could select multiple options

5. Three most common safety concerns for boys and girls are shown

6. Three most common first ports of call for assistance are shown

7. Respondents were asked to report information for each woman in their household. This indicator shows the proportion of all individual women reported

8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

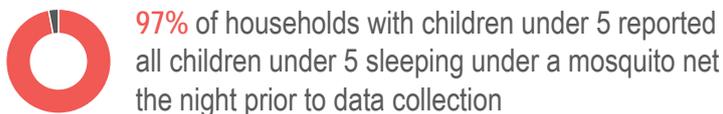

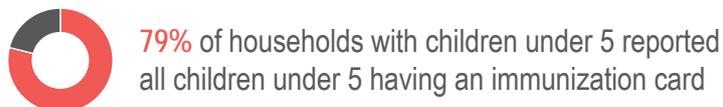

9. In this assessment hazardous labour was defined as: working with heavy machinery or lifting heavy objects, exposure to harmful chemicals, exposure to extreme heat (eg. furnace, bakery), working more than 40 hours per week, working at night (between 8 pm and 6 am), and using sharp objects.

10. Three most common areas where men, women, boys and girls do not feel safe are shown

Multi-Sector Needs Assessment - July 2018

All Camps, Ukhiya/Teknaf, Cox's Bazar, Bangladesh

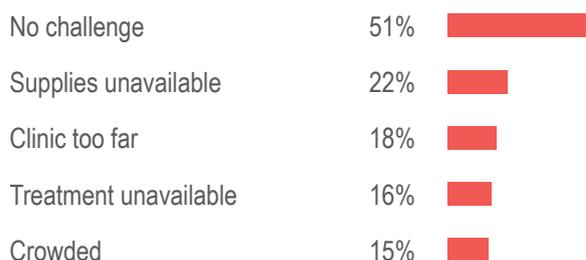

Health

% of households reporting seeking treatment for an individual with a serious illness in the 30 days prior to data collection⁴

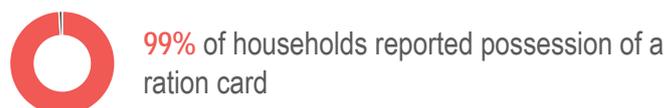

% of households reporting challenges in accessing NGO run clinics since arriving in the camp^{4,11}

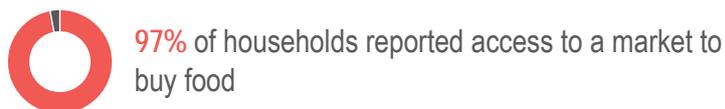

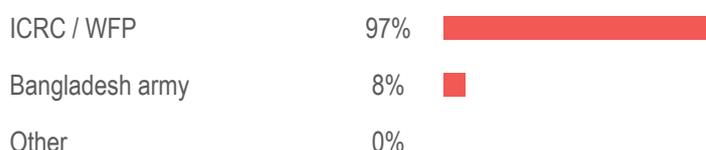

% of households with children under 5 reported receiving a breast milk substitute, infant formula or baby bottles through donation in the 30 days prior to data collection⁴

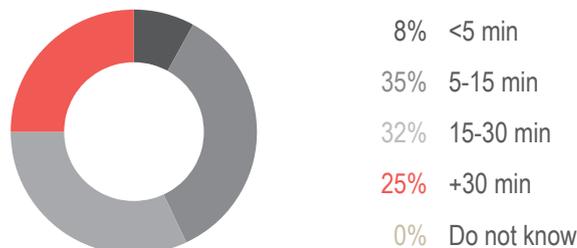

Food Security

% of households reporting receiving food assistance in the 30 days prior to data collection⁴

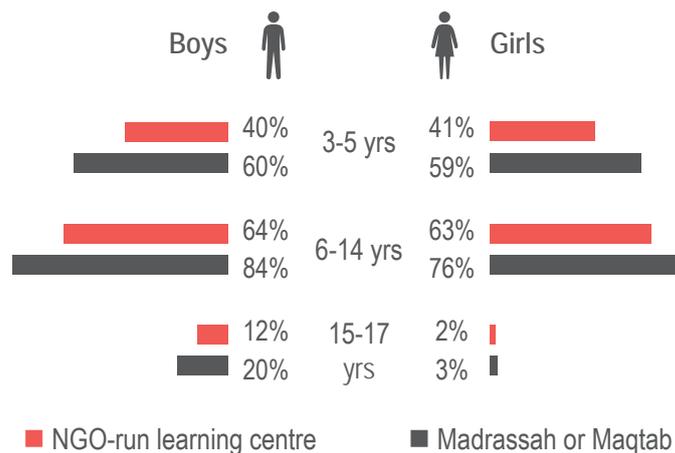

% of households reporting travel time on foot to food markets

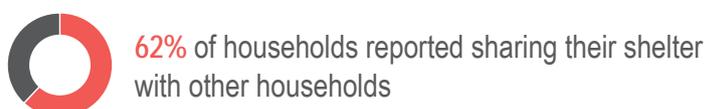

Education

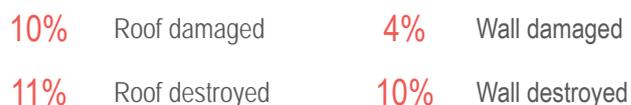

% of children reported to be attending learning centres in the 7 days prior to data collection^{4,8}

Shelter & Non-Food Items

% of households reporting destruction or damage of their shelter in the 30 days prior to data collection

4. Respondents could select multiple options

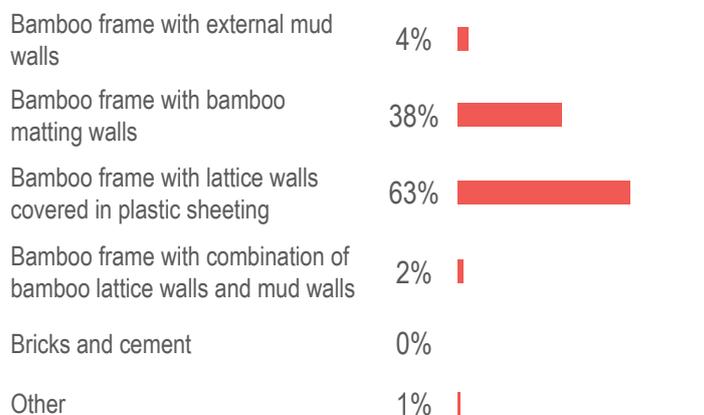

8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

11. Five most common health care access challenges are shown

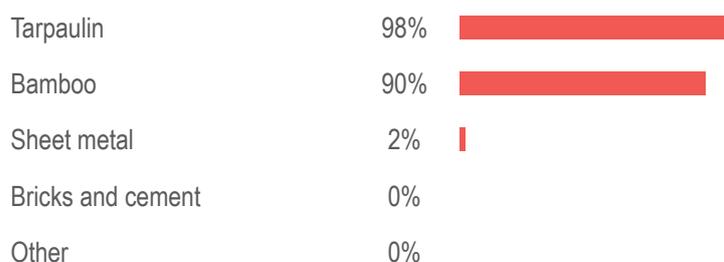

Multi-Sector Needs Assessment - July 2018

All Camps, Ukhiya/Teknaf, Cox's Bazar, Bangladesh

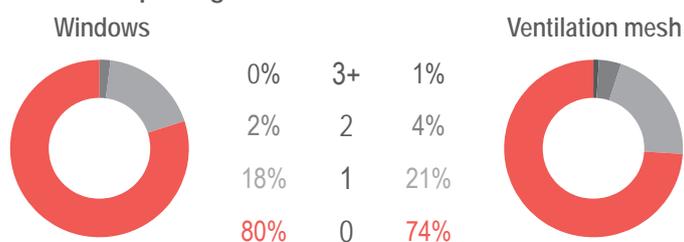

% of households reporting using different materials for the frame and walls of the household shelter⁴

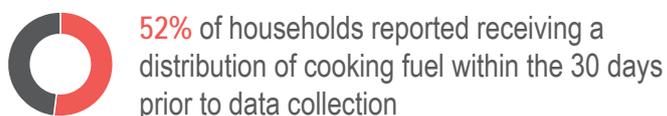

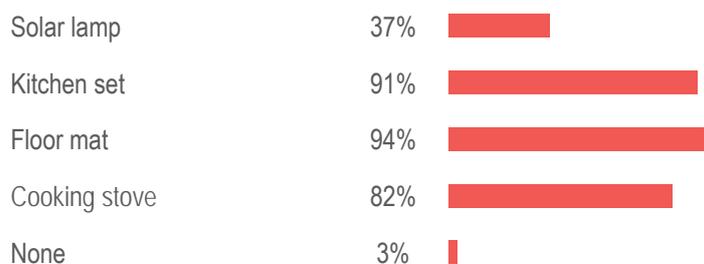

% of households reporting using different materials for the roof of the household shelter⁴

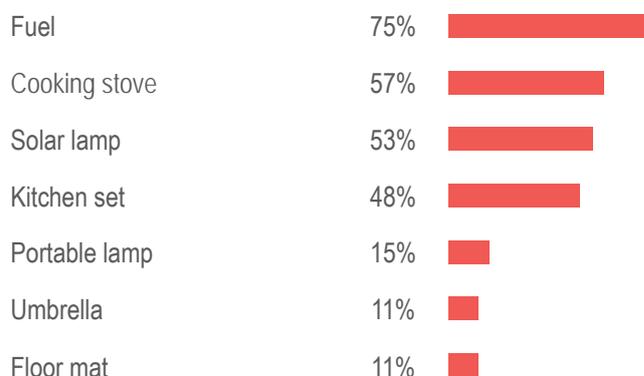

% of shelters with windows and ventilation mesh, by number of openings

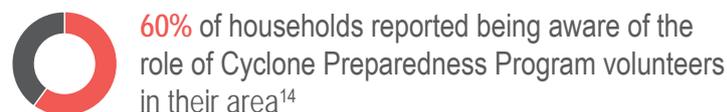

% of households reporting ownership of the following non-food items at the time of data collection

% of households reporting most urgently needed non-food items^{12,13}

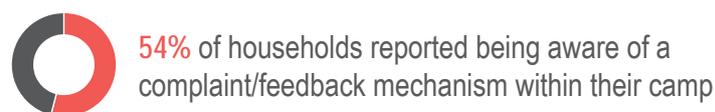

Site Management

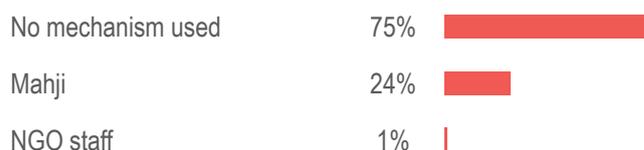

% of households reporting steps they would take to prepare for an approaching cyclone^{4,15}

Communication with Communities

% of households reporting use of complaint/feedback mechanisms in the 30 days prior to data collection^{4,16}

4. Respondents could select multiple options

12. Respondents could select up to 3 options

13. Seven most common non-food item needs are shown

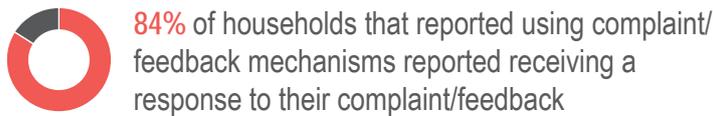

14. CPP is a joint community-based disaster risk reduction initiative of the Government of Bangladesh and the Bangladesh Red Crescent Society. It trains volunteers to deliver cyclone warnings to communities, assist with shelter and rescue, and provide medical attention

15. Three most common steps for cyclone preparedness are shown

16. Three most common complaint mechanisms used are shown

Multi-Sector Needs Assessment - July 2018

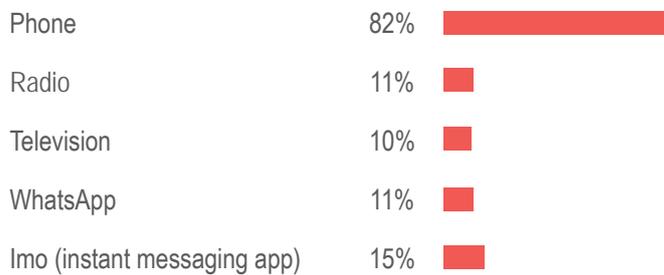

All Camps, Ukhiya/Teknaf, Cox's Bazar, Bangladesh

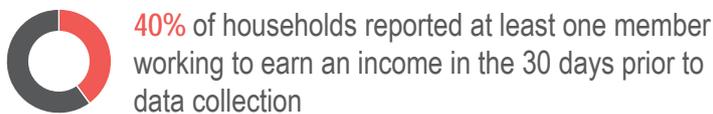

% of households reporting barriers to using complaint/feedback mechanisms^{4,17}

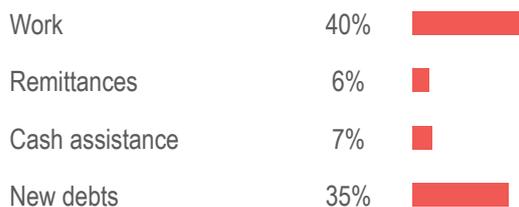

% of households reporting use of information channels in the 7 days prior to data collection⁴

Livelihoods

% of households reporting income from different sources in the 30 days prior to data collection⁴

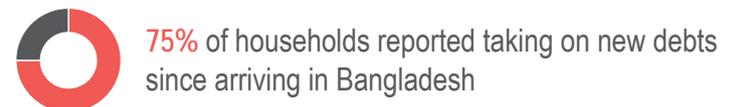

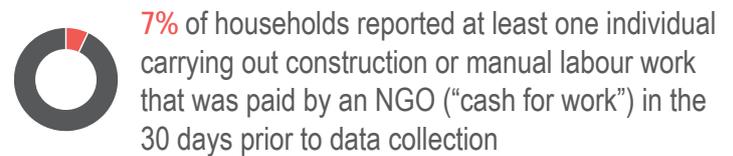

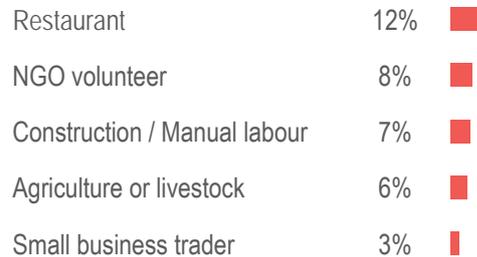

2,089 Median household income in Bangladeshi Taka (BDT)^{18,19}

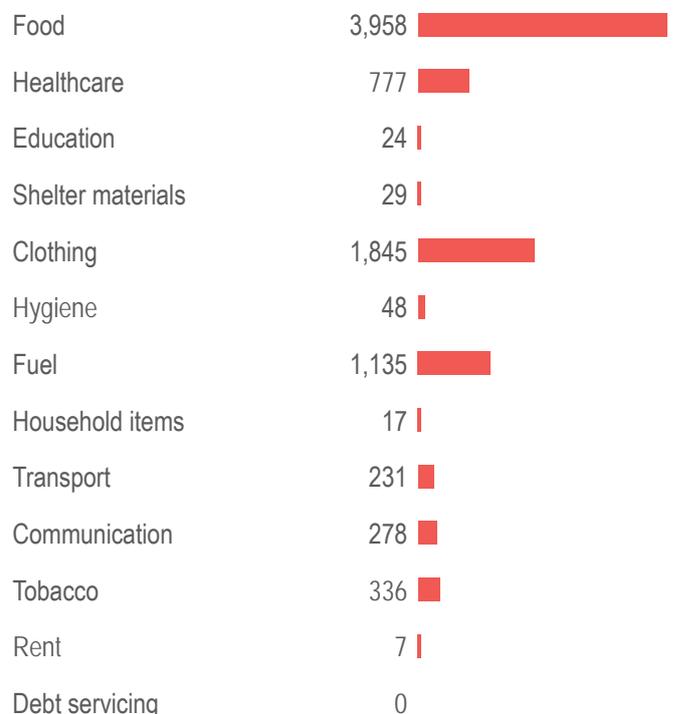

% of individuals reported to be working to earn an income in the 30 days prior to data collection

% of households reporting earning an income from different types of employment in the 30 days prior to data collection^{4,20}

Median reported monthly household expenditure in the 30 days prior to data collection, in Bangladeshi Taka¹⁹

4. Respondents could select multiple options

17. Three most common barriers to accessing complaint mechanisms are shown

18. Income from employment, remittances, cash assistance and new debts

19. USD 1 = BDT 84.2 (as of 3 September 2018). Source: www.xe.com

20. Five most common employment sectors shown

Multi-Sector Needs Assessment - July 2018

Camp 1E, Ukhiya, Cox's Bazar, Bangladesh

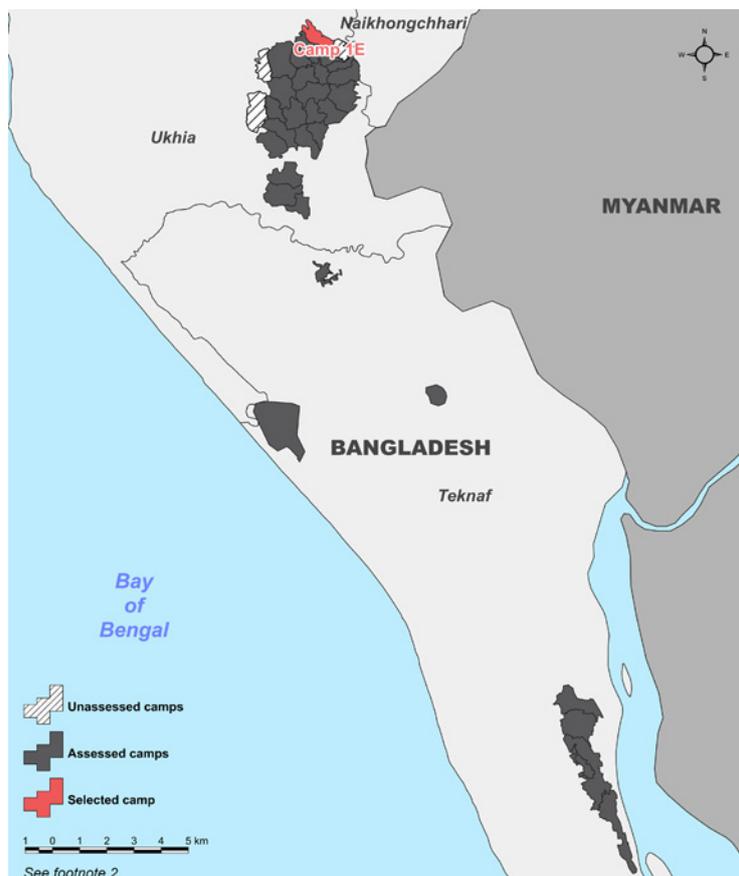

Background and Methodology

An estimated 723,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017¹. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The monsoon season began in May and continues into September, threatening the vast majority of refugees living in makeshift shelters and settlements highly vulnerable to floods and landslides.

To understand the evolving priority needs of the refugees, an inter-agency Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 31 refugee sites using a household survey methodology. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

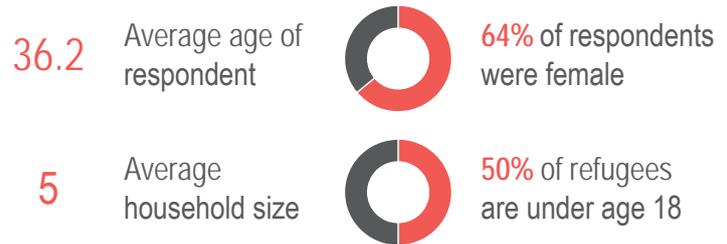

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Camp 1E where 98 households were surveyed between 2 and 31 July 2018.

In order to avoid duplication, data on WASH and Food Security were not extensively collected. WASH data was collected by REACH in April 2018 and can be found [here](#)³. More information on Food Security can be found in the Light Food Security Monitoring exercise by VAM / WFP.

Multi-Sector Needs Assessment - July 2018

Camp 3, Ukhiya, Cox's Bazar, Bangladesh

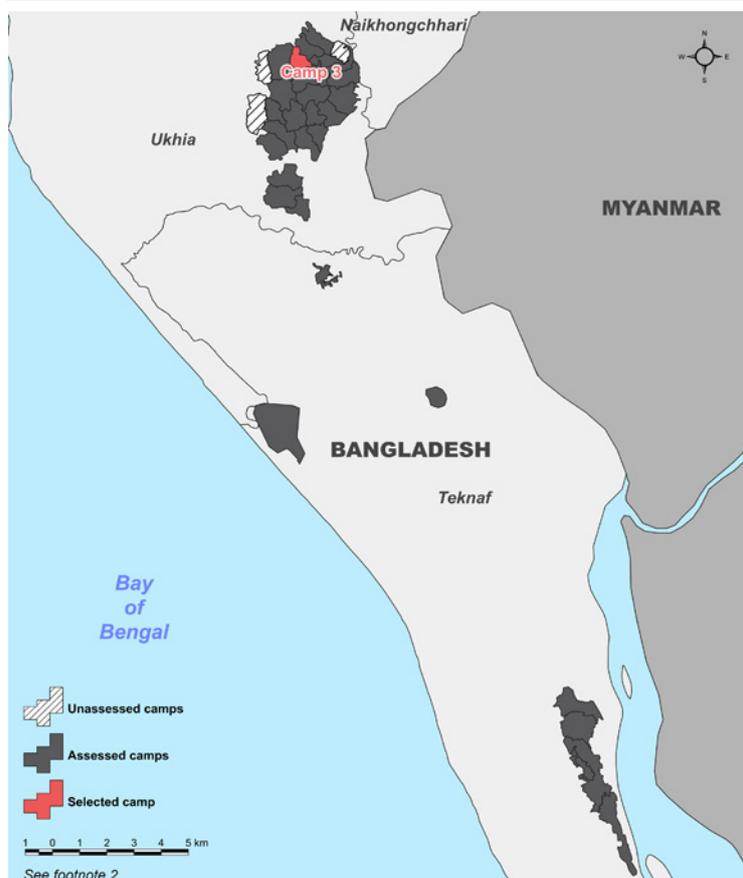

Background and Methodology

An estimated 723,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017¹. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The monsoon season began in May and continues into September, threatening the vast majority of refugees living in makeshift shelters and settlements highly vulnerable to floods and landslides.

To understand the evolving priority needs of the refugees, an inter-agency Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 31 refugee sites using a household survey methodology. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Camp 3 where 99 households were surveyed between 2 and 31 July 2018.

In order to avoid duplication, data on WASH and Food Security were not extensively collected. WASH data was collected by REACH in April 2018 and can be found [here](#)³. More information on Food Security can be found in the Light Food Security Monitoring exercise by VAM / WFP.

Population in camp (individuals)¹ **39,257**

Population in camp (families)¹ **9,118**

36.7 Average age of respondent **51%** of respondents were female

4.9 Average household size **54%** of refugees are under age 18

Demographics

Composition of surveyed households

97% of households with at least one child under 18 years old

49% of households with at least one child under 5 years old

48% of heads of households were female

34% of households with pregnant or lactating women

40% of households with at least one person with a disability or chronic illness

1. As defined by UNHCR in the population data and key demographical indicators (15 July dataset)

Multi-Sector Needs Assessment - July 2018

Camp 7, Ukhiya, Cox's Bazar, Bangladesh

Protection

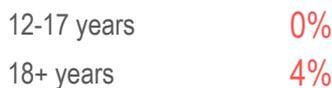

% of households reporting safety concerns (read: fears) for boys and girls (aged under 18)^{4,5}

% of households reporting first port of call for assistance in dealing with safety or security issues^{4,6}

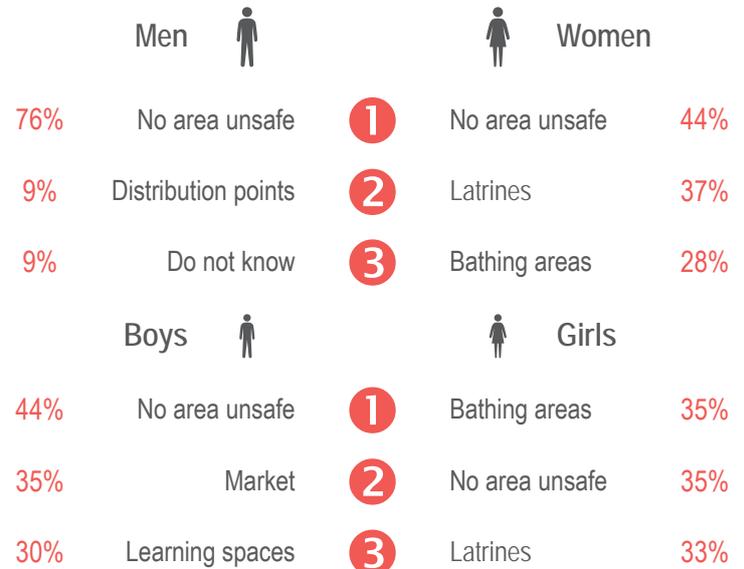

% of women reported to be attending activities at an NGO-run space where only women and girls are allowed in the 7 days prior to data collection⁷

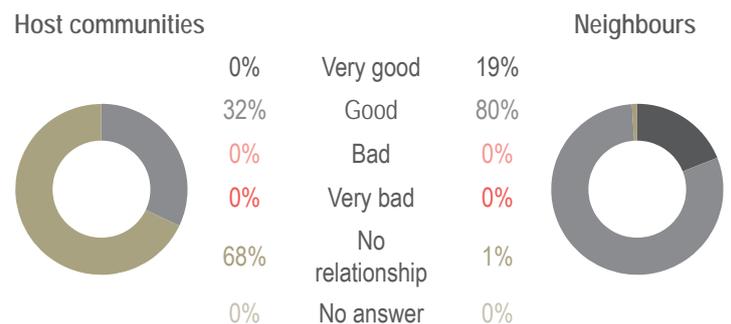

% of children reported to be attending activities at an NGO-run safe space for children in the 7 days prior to data collection⁸

% of households reporting areas in the camp where men, women, boys, and girls do not feel safe^{4,10}

% of households reporting different relationships with Bangladeshi host community and refugee neighbours in the same block

4. Respondents could select multiple options

5. Three most common safety concerns for boys and girls are shown

6. Three most common first ports of call for assistance are shown

7. Respondents were asked to report information for each woman in their household. This indicator shows the proportion of all individual women reported

8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

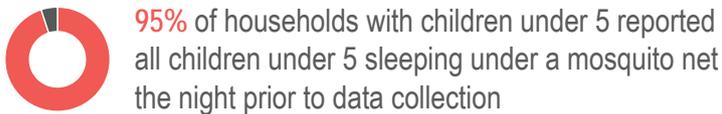

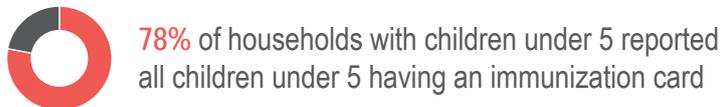

9. In this assessment hazardous labour was defined as: working with heavy machinery or lifting heavy objects, exposure to harmful chemicals, exposure to extreme heat (eg. furnace, bakery), working more than 40 hours per week, working at night (between 8 pm and 6 am), and using sharp objects.

10. Three most common areas where men, women, boys and girls do not feel safe are shown

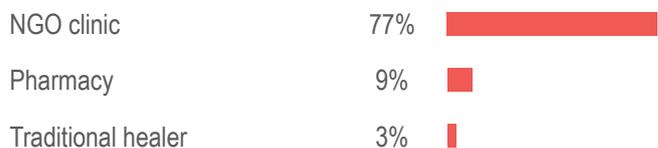

Multi-Sector Needs Assessment - July 2018

Camp 7, Ukhiya, Cox's Bazar, Bangladesh

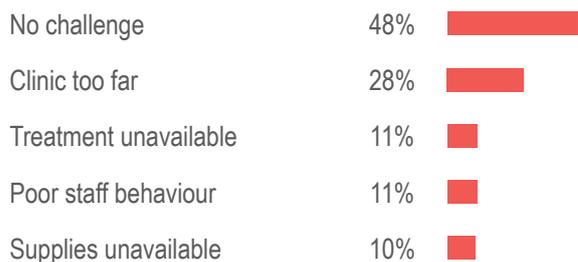

Health

% of households reporting seeking treatment for an individual with a serious illness in the 30 days prior to data collection⁴

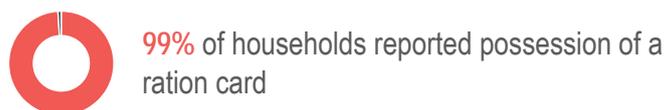

% of households reporting challenges in accessing NGO run clinics since arriving in the camp^{4,11}

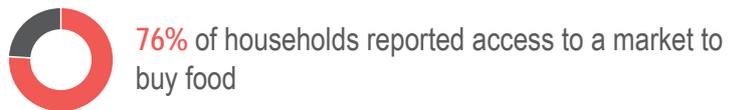

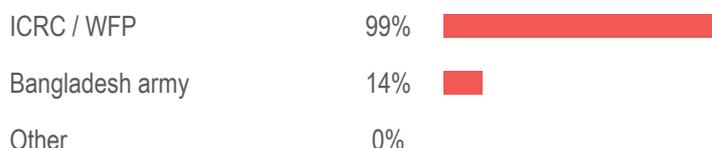

% of households with children under 5 reported receiving a breast milk substitute, infant formula or baby bottles through donation in the 30 days prior to data collection⁴

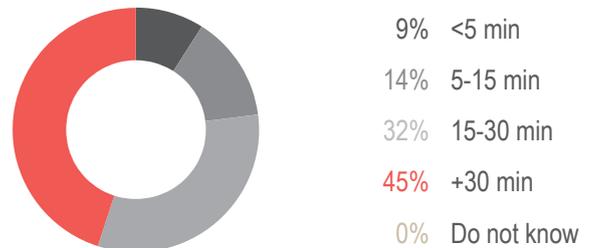

Food Security

% of households reporting receiving food assistance in the 30 days prior to data collection⁴

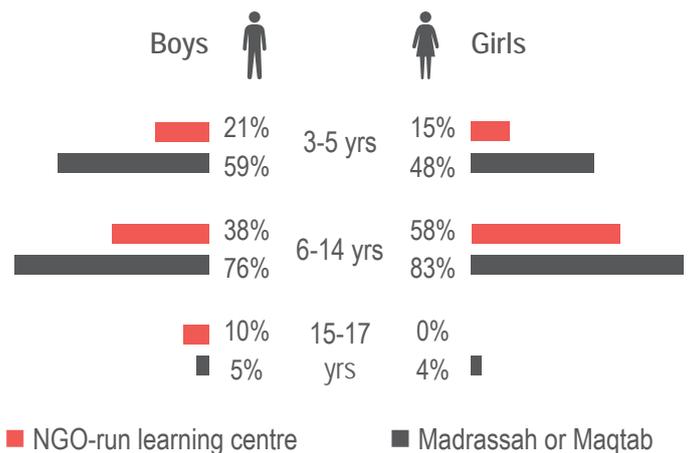

% of households reporting travel time on foot to food markets

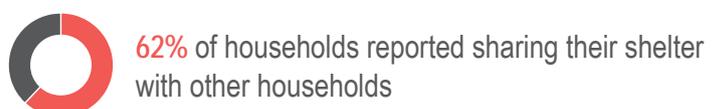

Education

% of children reported to be attending learning centres in the 7 days prior to data collection^{4,8}

Shelter & Non-Food Items

% of households reporting destruction or damage of their shelter in the 30 days prior to data collection

4. Respondents could select multiple options

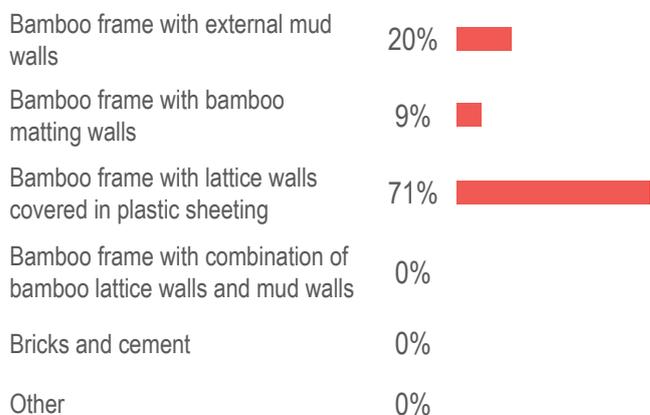

8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

11. Five most common health care access challenges are shown

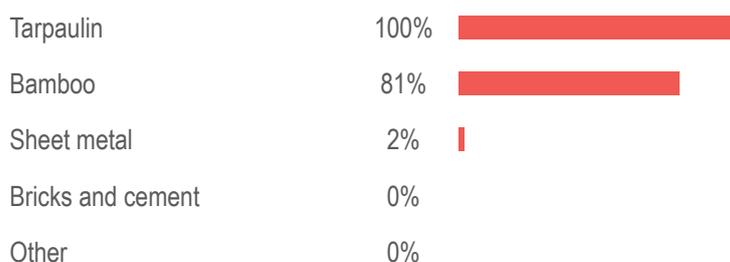

Multi-Sector Needs Assessment - July 2018

Camp 7, Ukhiya, Cox's Bazar, Bangladesh

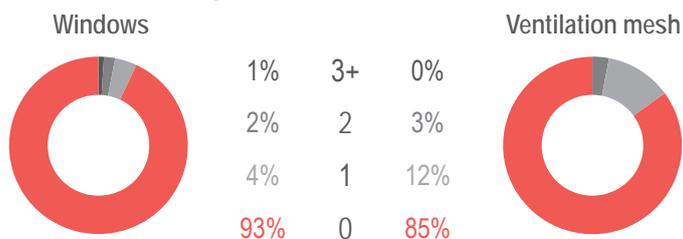

% of households reporting using different materials for the frame and walls of the household shelter⁴

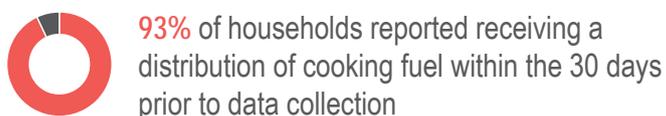

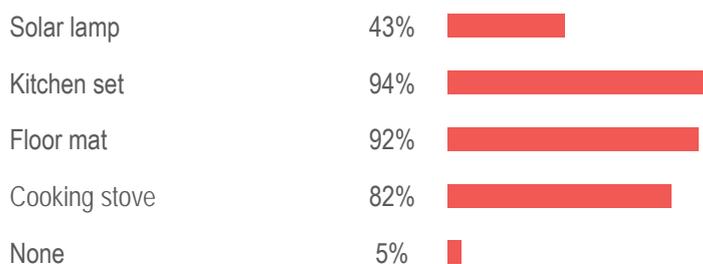

% of households reporting using different materials for the roof of the household shelter⁴

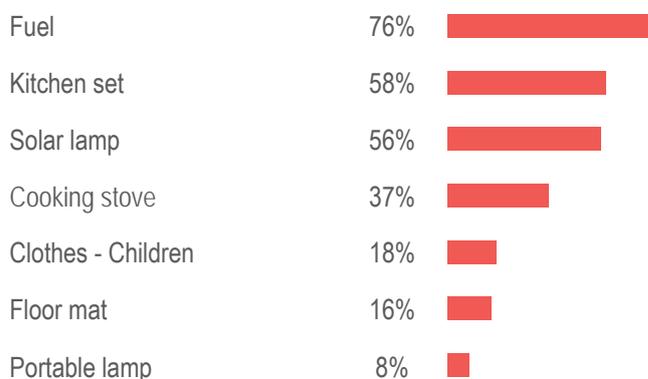

% of shelters with windows and ventilation mesh, by number of openings

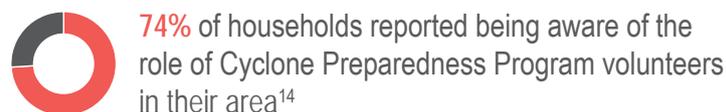

% of households reporting ownership of the following non-food items at the time of data collection

% of households reporting most urgently needed non-food items^{12,13}

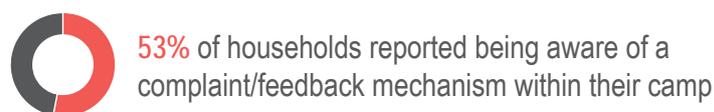

Site Management

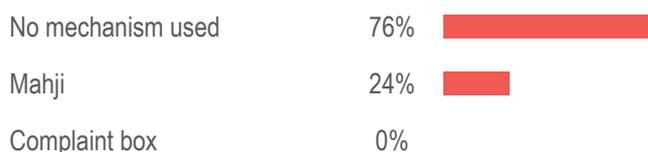

% of households reporting steps they would take to prepare for an approaching cyclone^{4,15}

Communication with Communities

% of households reporting use of complaint/feedback mechanisms in the 30 days prior to data collection^{4,16}

4. Respondents could select multiple options

12. Respondents could select up to 3 options

13. Seven most common non-food item needs are shown

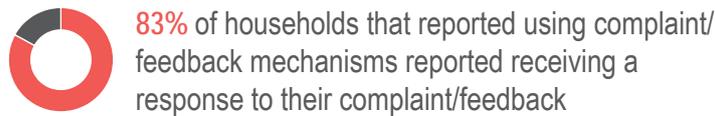

14. CPP is a joint community-based disaster risk reduction initiative of the Government of Bangladesh and the Bangladesh Red Crescent Society. It trains volunteers to deliver cyclone warnings to communities, assist with shelter and rescue, and provide medical attention

15. Three most common steps for cyclone preparedness are shown

16. Three most common complaint mechanisms used are shown

Multi-Sector Needs Assessment - July 2018

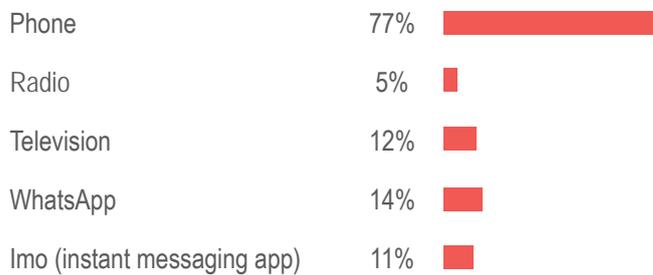

Camp 7, Ukhiya, Cox's Bazar, Bangladesh

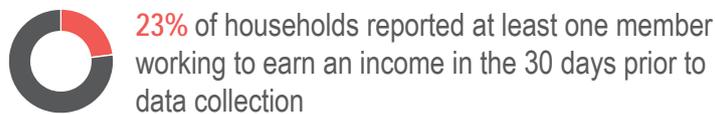

% of households reporting barriers to using complaint/feedback mechanisms^{4,17}

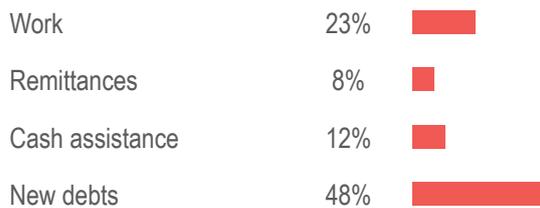

% of households reporting use of information channels in the 7 days prior to data collection⁴

Livelihoods

% of households reporting income from different sources in the 30 days prior to data collection⁴

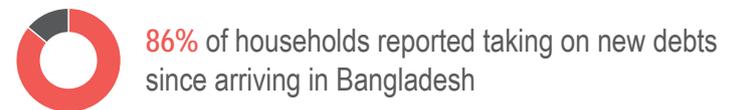

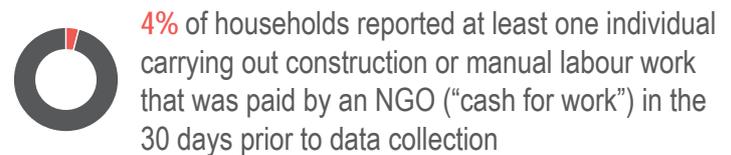

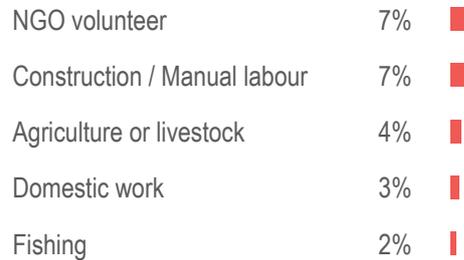

1,500 Median household income in Bangladeshi Taka (BDT)^{18,19}

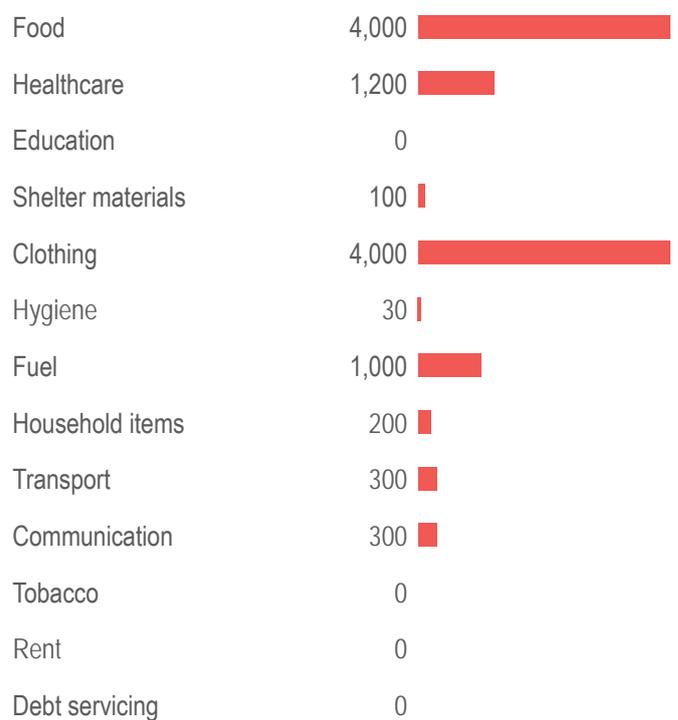

% of individuals reported to be working to earn an income in the 30 days prior to data collection

% of households reporting earning an income from different types of employment in the 30 days prior to data collection^{4,20}

Median reported monthly household expenditure in the 30 days prior to data collection, in Bangladeshi Taka¹⁹

4. Respondents could select multiple options

Multi-Sector Needs Assessment - July 2018

Camp 8E, Ukhiya, Cox's Bazar, Bangladesh

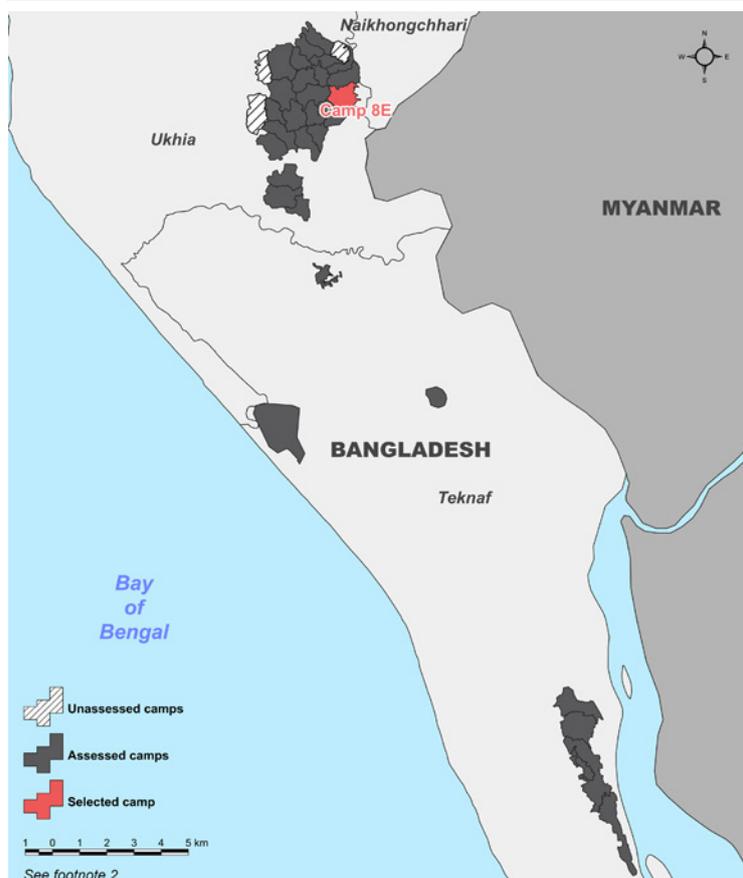

Background and Methodology

An estimated 723,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017¹. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The monsoon season began in May and continues into September, threatening the vast majority of refugees living in makeshift shelters and settlements highly vulnerable to floods and landslides.

To understand the evolving priority needs of the refugees, an inter-agency Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 31 refugee sites using a household survey methodology. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Camp 8E where 87 households were surveyed between 2 and 31 July 2018.

In order to avoid duplication, data on WASH and Food Security were not extensively collected. WASH data was collected by REACH in April 2018 and can be found [here](#)³. More information on Food Security can be found in the Light Food Security Monitoring exercise by VAM / WFP.

Population in camp (individuals)¹ **33,036**

Multi-Sector Needs Assessment - July 2018

Camp 11, Ukhiya, Cox's Bazar, Bangladesh

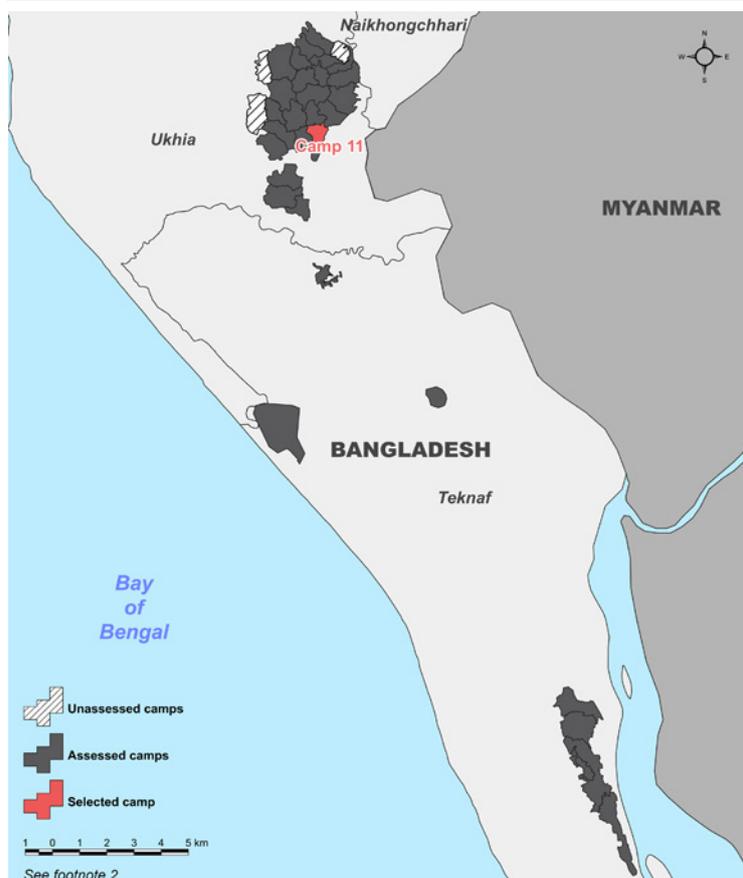

Background and Methodology

An estimated 723,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017¹. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The monsoon season began in May and continues into September, threatening the vast majority of refugees living in makeshift shelters and settlements highly vulnerable to floods and landslides.

To understand the evolving priority needs of the refugees, an inter-agency Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 31 refugee sites using a household survey methodology. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Camp 11 where 99 households were surveyed between 2 and 31 July 2018.

In order to avoid duplication, data on WASH and Food Security were not extensively collected. WASH data was collected by REACH in April 2018 and can be found [here](#)³. More information on Food Security can be found in the Light Food Security Monitoring exercise by VAM / WFP.

Population in camp (individuals)¹ **32,272**

Population in camp (families)¹ **7,331**

36.3 Average age of respondent **51%** of respondents were female

Multi-Sector Needs Assessment - July 2018

Camp 15, Ukhiya, Cox's Bazar, Bangladesh

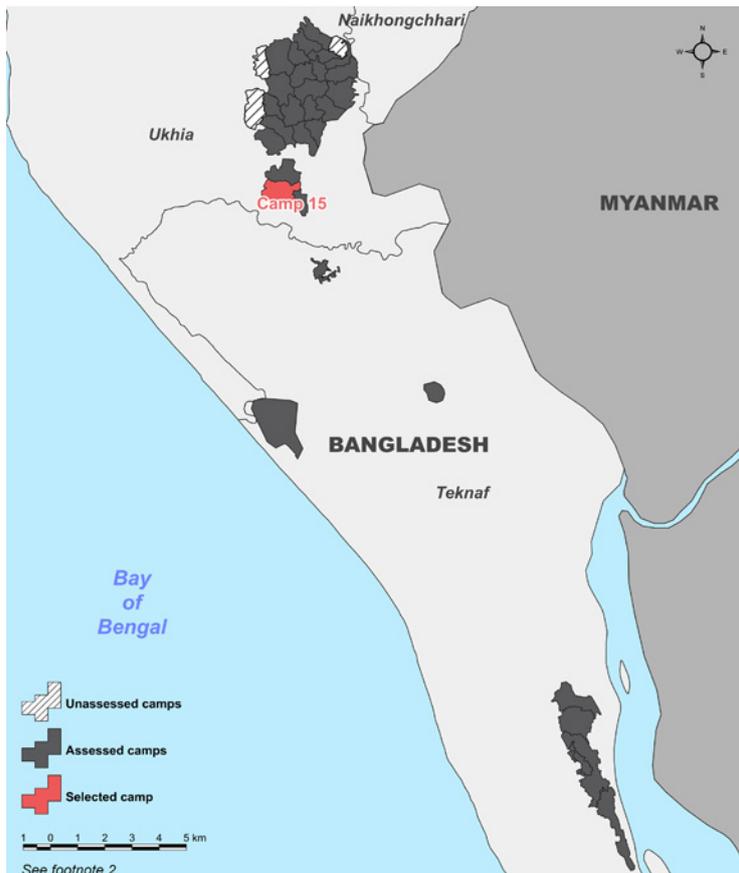

Background and Methodology

An estimated 723,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017¹. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The monsoon season began in May and continues into September, threatening the vast majority of refugees living in makeshift shelters and settlements highly vulnerable to floods and landslides.

To understand the evolving priority needs of the refugees, an inter-agency Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 31 refugee sites using a household survey methodology. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Camp 15 where 96 households were surveyed between 2 and 31 July 2018.

In order to avoid duplication, data on WASH and Food Security were not extensively collected. WASH data was collected by REACH in April 2018 and can be found [here](#)³. More information on Food Security can be found in the Light Food Security Monitoring exercise by VAM / WFP.

Population in camp (individuals)¹ **49,298**

Population in camp (families)¹ **11,145**

36.8 Average age of respondent

47% of respondents were female

5.1 Average household size

53% of refugees are under age 18

Demographics

Composition of surveyed households

96% of households with at least one child under 18 years old

56% of households with at least one child under 5 years old

38% of heads of households were female

46% of households with pregnant or lactating women

36% of households with at least one person with a disability or chronic illness

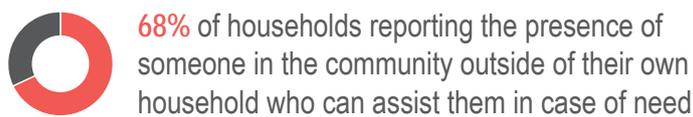

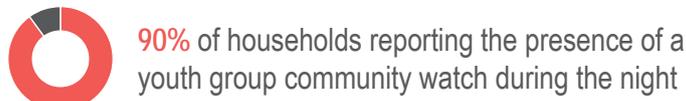

1. As defined by UNHCR in the population data and key demographical indicators (15 July dataset)

Multi-Sector Needs Assessment - July 2018

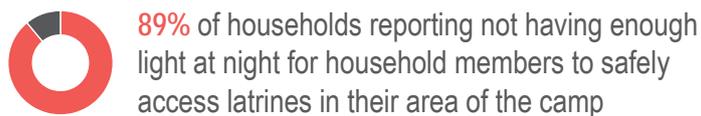

Camp 15, Ukhiya, Cox's Bazar, Bangladesh

Protection

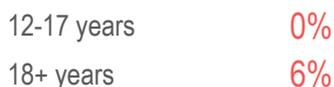

% of households reporting safety concerns (read: fears) for boys and girls (aged under 18)^{4,5}

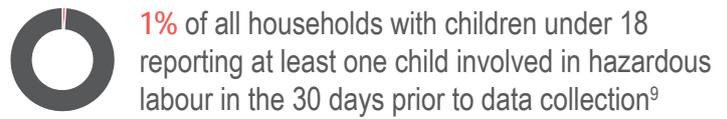

% of households reporting first port of call for assistance in dealing with safety or security issues^{4,6}

% of women reported to be attending activities at an NGO-run space where only women and girls are allowed in the 7 days prior to data collection⁷

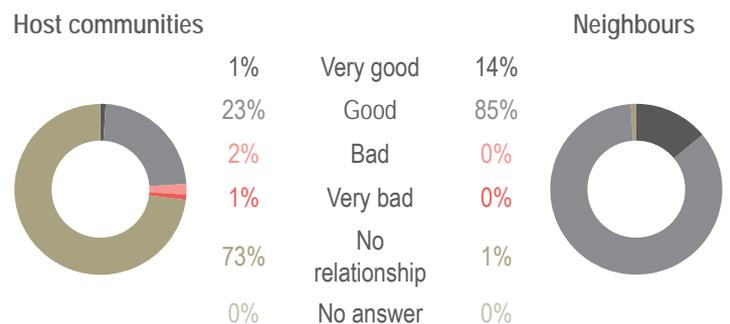

% of children reported to be attending activities at an NGO-run safe space for children in the 7 days prior to data collection⁸

% of households reporting areas in the camp where men, women, boys, and girls do not feel safe^{4,10}

% of households reporting different relationships with Bangladeshi host community and refugee neighbours in the same block

4. Respondents could select multiple options

5. Three most common safety concerns for boys and girls are shown

6. Three most common first ports of call for assistance are shown

7. Respondents were asked to report information for each woman in their household. This indicator shows the proportion of all individual women reported

8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

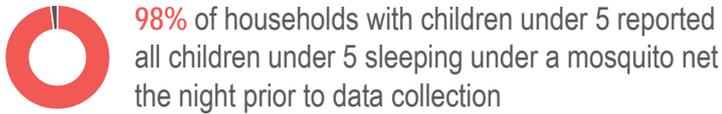

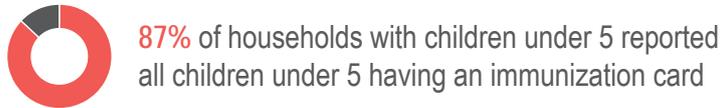

9. In this assessment hazardous labour was defined as: working with heavy machinery or lifting heavy objects, exposure to harmful chemicals, exposure to extreme heat (eg. furnace, bakery), working more than 40 hours per week, working at night (between 8 pm and 6 am), and using sharp objects.

10. Three most common areas where men, women, boys and girls do not feel safe are shown

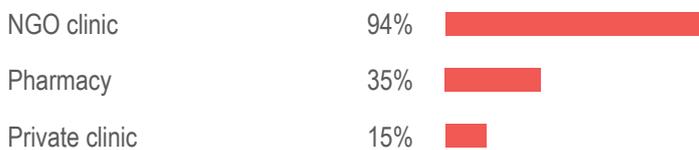

Multi-Sector Needs Assessment - July 2018

Camp 15, Ukhiya, Cox's Bazar, Bangladesh

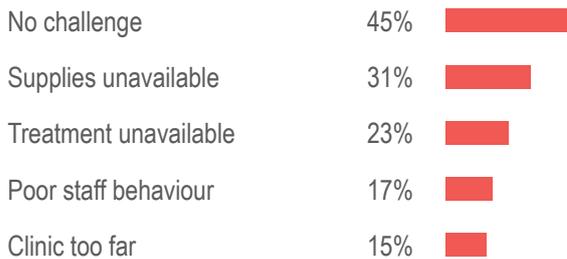

Health

% of households reporting seeking treatment for an individual with a serious illness in the 30 days prior to data collection⁴

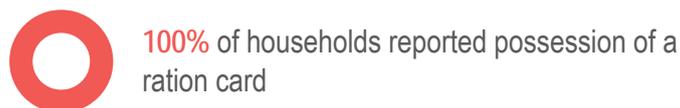

% of households reporting challenges in accessing NGO run clinics since arriving in the camp^{4,11}

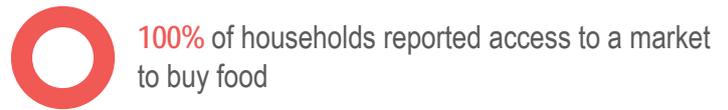

% of households with children under 5 reported receiving a breast milk substitute, infant formula or baby bottles through donation in the 30 days prior to data collection⁴

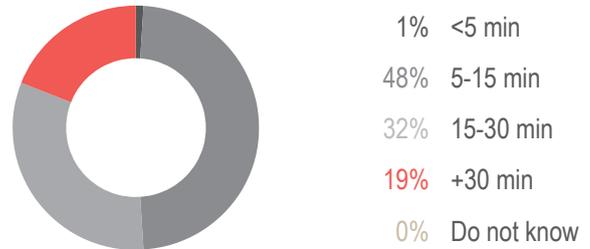

Food Security

% of households reporting receiving food assistance in the 30 days prior to data collection⁴

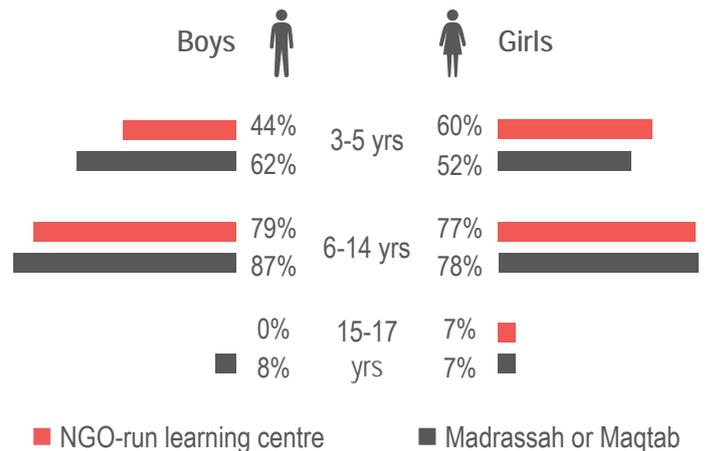

% of households reporting travel time on foot to food markets

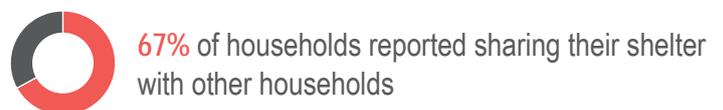

Education

% of children reported to be attending learning centres in the 7 days prior to data collection^{4,8}

Shelter & Non-Food Items

% of households reporting destruction or damage of their shelter in the 30 days prior to data collection

4. Respondents could select multiple options

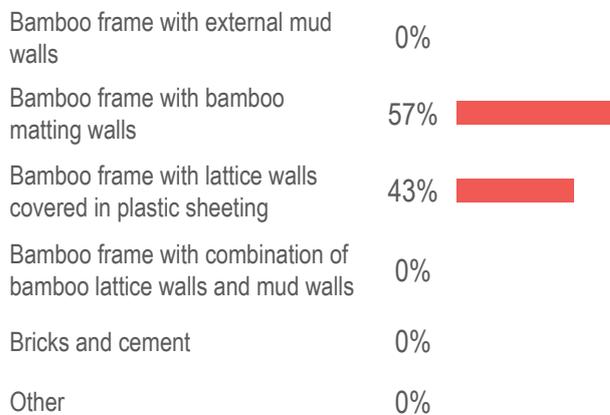

8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

11. Five most common health care access challenges are shown

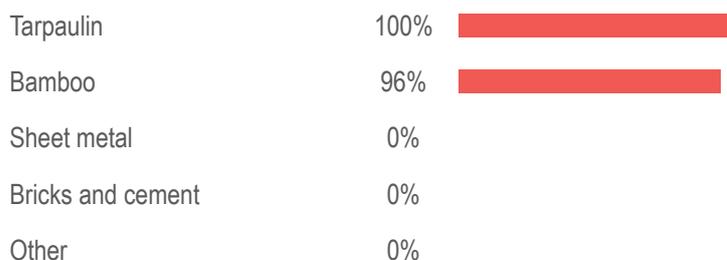

Multi-Sector Needs Assessment - July 2018

Camp 15, Ukhiya, Cox's Bazar, Bangladesh

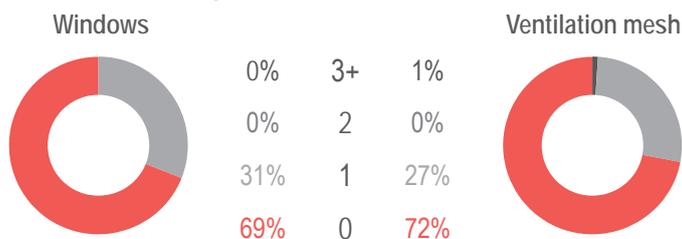

% of households reporting using different materials for the frame and walls of the household shelter⁴

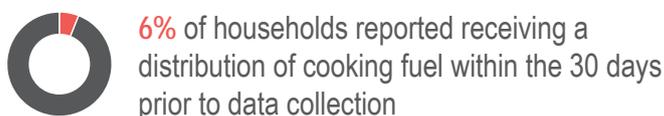

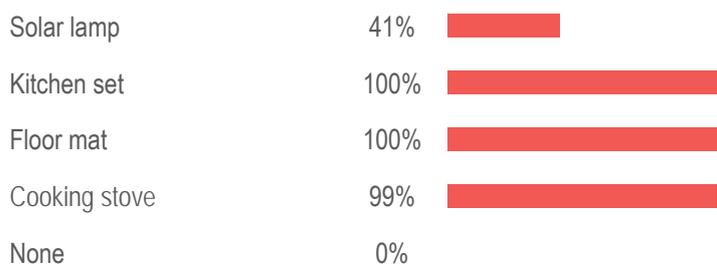

% of households reporting using different materials for the roof of the household shelter⁴

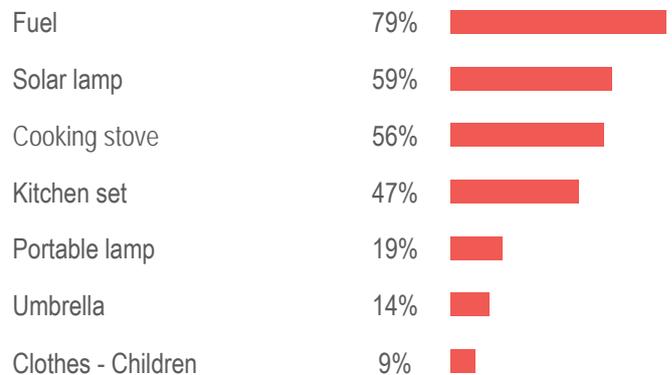

% of shelters with windows and ventilation mesh, by number of openings

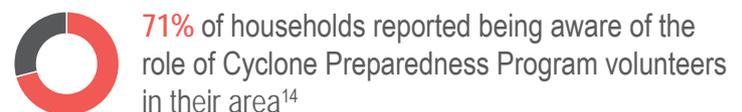

% of households reporting ownership of the following non-food items at the time of data collection

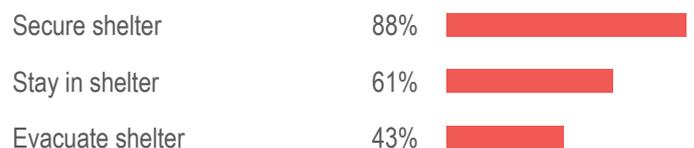

% of households reporting most urgently needed non-food items^{12,13}

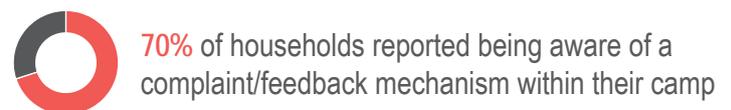

Site Management

% of households reporting steps they would take to prepare for an approaching cyclone^{4,15}

Communication with Communities

% of households reporting use of complaint/feedback mechanisms in the 30 days prior to data collection^{4,16}

4. Respondents could select multiple options

12. Respondents could select up to 3 options

13. Seven most common non-food item needs are shown

14. CPP is a joint community-based disaster risk reduction initiative of the Government of Bangladesh and the Bangladesh Red Crescent Society. It trains volunteers to deliver cyclone warnings to communities, assist with shelter and rescue, and provide medical attention

Multi-Sector Needs Assessment - July 2018

Camp 19, Ukhiya, Cox's Bazar, Bangladesh

Protection

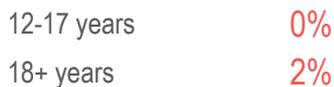

% of households reporting safety concerns (read: fears) for boys and girls (aged under 18)^{4,5}

% of households reporting first port of call for assistance in dealing with safety or security issues^{4,6}

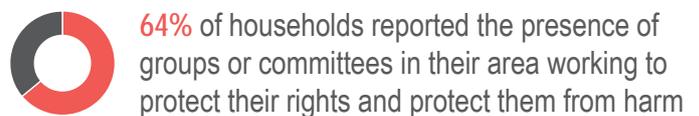

% of women reported to be attending activities at an NGO-run space where only women and girls are allowed in the 7 days prior to data collection⁷

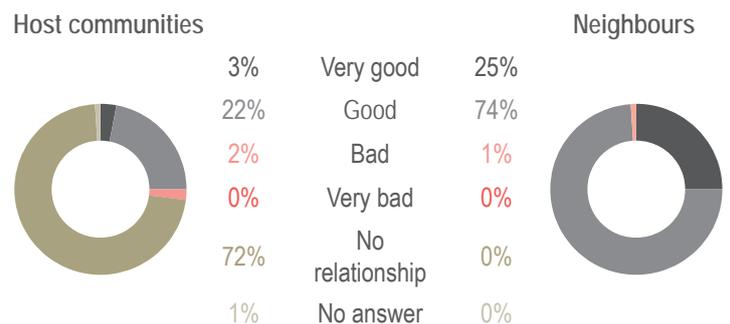

% of children reported to be attending activities at an NGO-run safe space for children in the 7 days prior to data collection⁸

% of households reporting areas in the camp where men, women, boys, and girls do not feel safe^{4,10}

% of households reporting different relationships with Bangladeshi host community and refugee neighbours in the same block

4. Respondents could select multiple options

5. Three most common safety concerns for boys and girls are shown

6. Three most common first ports of call for assistance are shown

7. Respondents were asked to report information for each woman in their household. This indicator shows the proportion of all individual women reported

8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

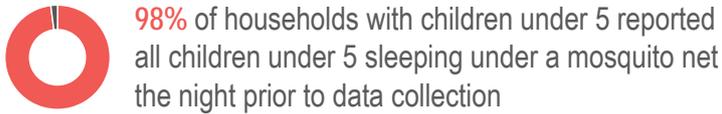

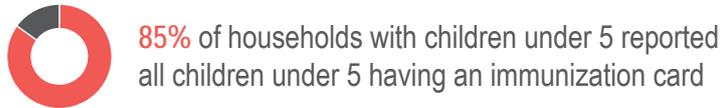

9. In this assessment hazardous labour was defined as: working with heavy machinery or lifting heavy objects, exposure to harmful chemicals, exposure to extreme heat (eg. furnace, bakery), working more than 40 hours per week, working at night (between 8 pm and 6 am), and using sharp objects.

10. Three most common areas where men, women, boys and girls do not feel safe are shown

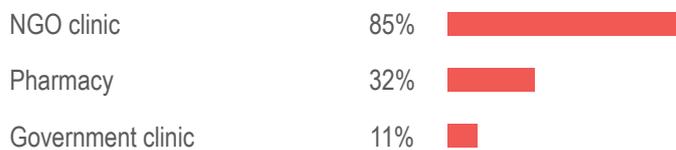

Multi-Sector Needs Assessment - July 2018

Camp 19, Ukhiya, Cox's Bazar, Bangladesh

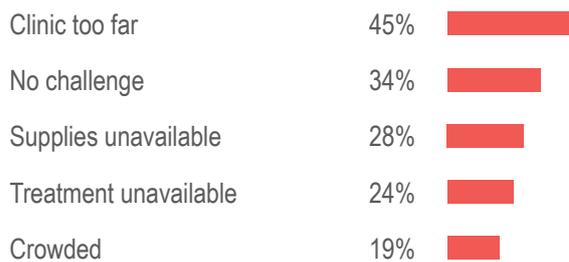

Health

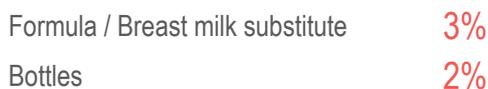

% of households reporting seeking treatment for an individual with a serious illness in the 30 days prior to data collection⁴

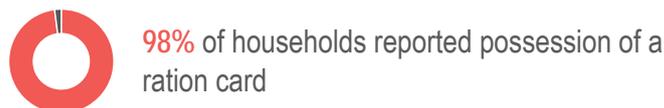

% of households reporting challenges in accessing NGO run clinics since arriving in the camp^{4,11}

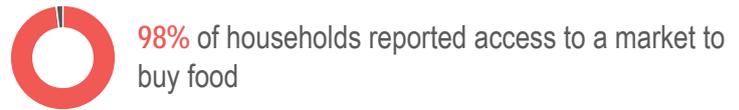

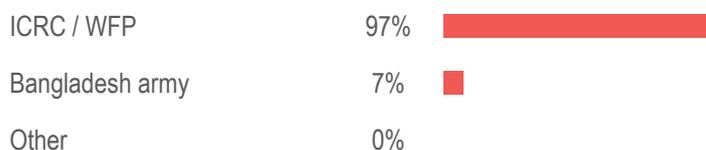

% of households with children under 5 reported receiving a breast milk substitute, infant formula or baby bottles through donation in the 30 days prior to data collection⁴

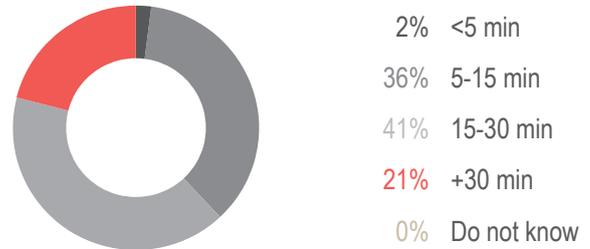

Food Security

% of households reporting receiving food assistance in the 30 days prior to data collection⁴

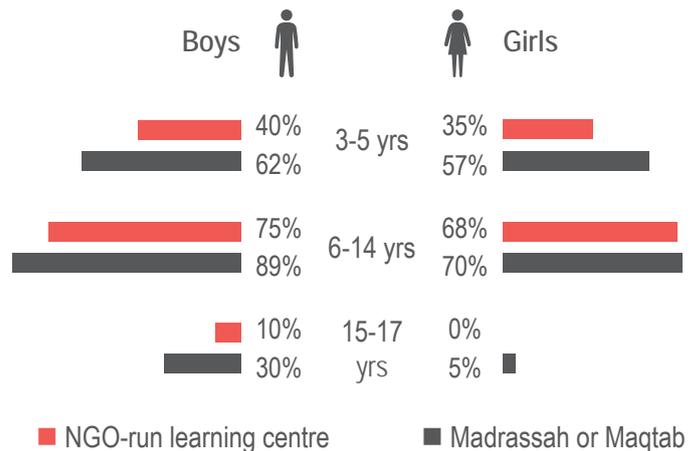

% of households reporting travel time on foot to food markets

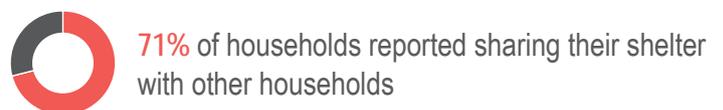

Education

% of children reported to be attending learning centres in the 7 days prior to data collection^{4,8}

Shelter & Non-Food Items

% of households reporting destruction or damage of their shelter in the 30 days prior to data collection

4. Respondents could select multiple options

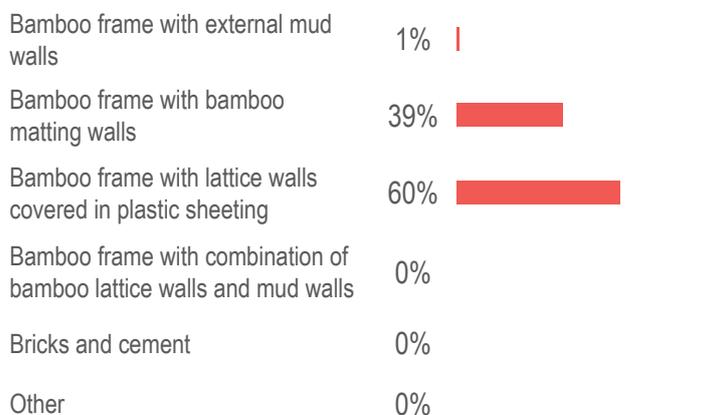

8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

11. Five most common health care access challenges are shown

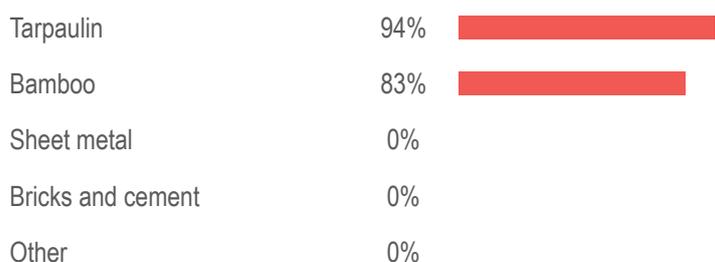

Multi-Sector Needs Assessment - July 2018

Camp 19, Ukhiya, Cox's Bazar, Bangladesh

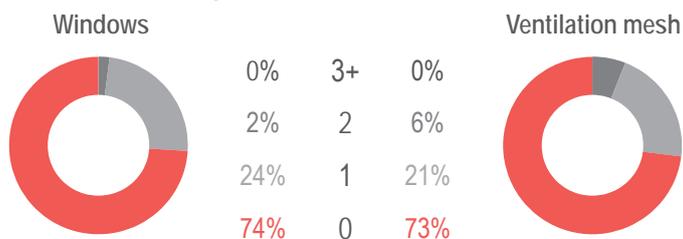

% of households reporting using different materials for the frame and walls of the household shelter⁴

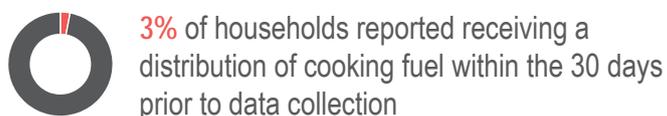

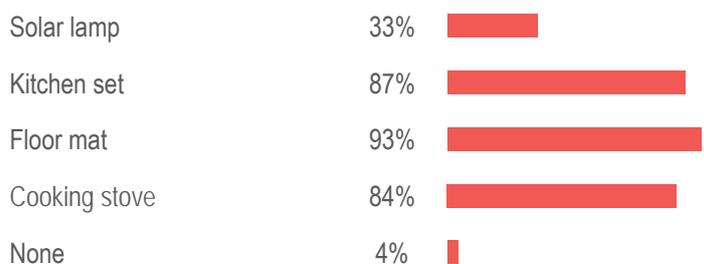

% of households reporting using different materials for the roof of the household shelter⁴

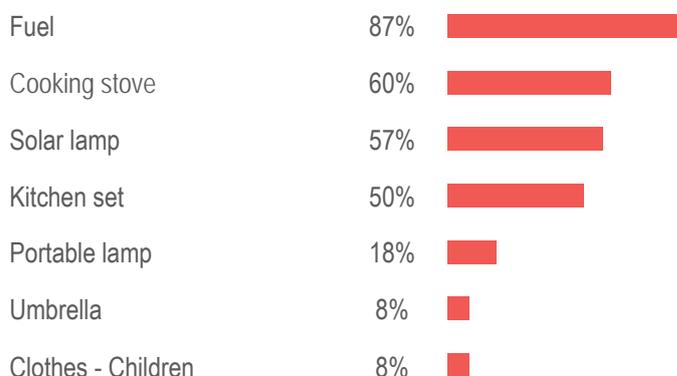

% of shelters with windows and ventilation mesh, by number of openings

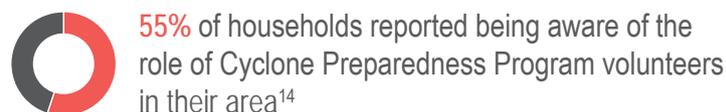

% of households reporting ownership of the following non-food items at the time of data collection

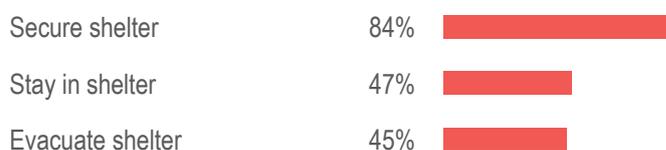

% of households reporting most urgently needed non-food items^{12,13}

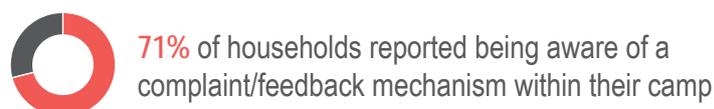

Site Management

% of households reporting steps they would take to prepare for an approaching cyclone^{4,15}

Communication with Communities

% of households reporting use of complaint/feedback mechanisms in the 30 days prior to data collection^{4,16}

4. Respondents could select multiple options

12. Respondents could select up to 3 options

13. Seven most common non-food item needs are shown

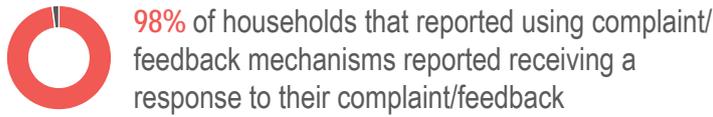

14. CPP is a joint community-based disaster risk reduction initiative of the Government of Bangladesh and the Bangladesh Red Crescent Society. It trains volunteers to deliver cyclone warnings to communities, assist with shelter and rescue, and provide medical attention

15. Three most common steps for cyclone preparedness are shown

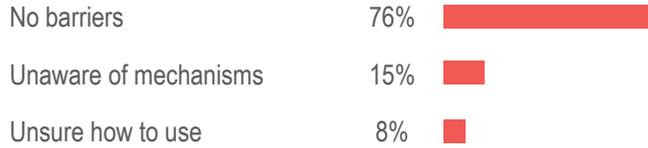

16. Three most common complaint mechanisms used are shown

Multi-Sector Needs Assessment - July 2018

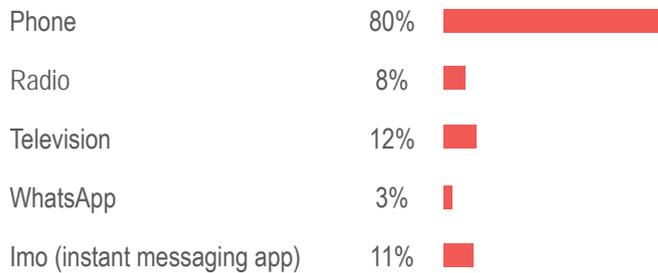

Camp 19, Ukhiya, Cox's Bazar, Bangladesh

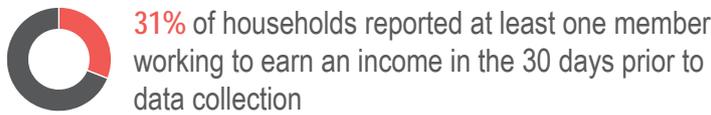

% of households reporting barriers to using complaint/feedback mechanisms^{4,17}

% of households reporting use of information channels in the 7 days prior to data collection⁴

Livelihoods

% of households reporting income from different sources in the 30 days prior to data collection⁴

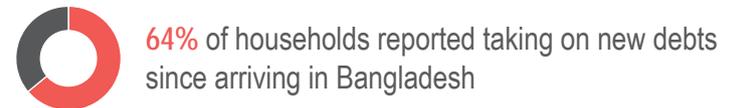

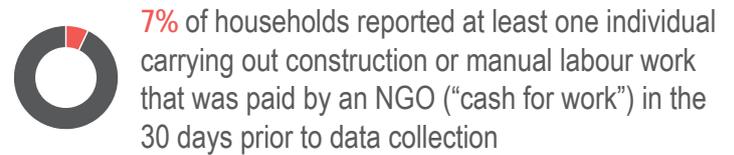

1,000 Median household income in Bangladeshi Taka (BDT)^{18,19}

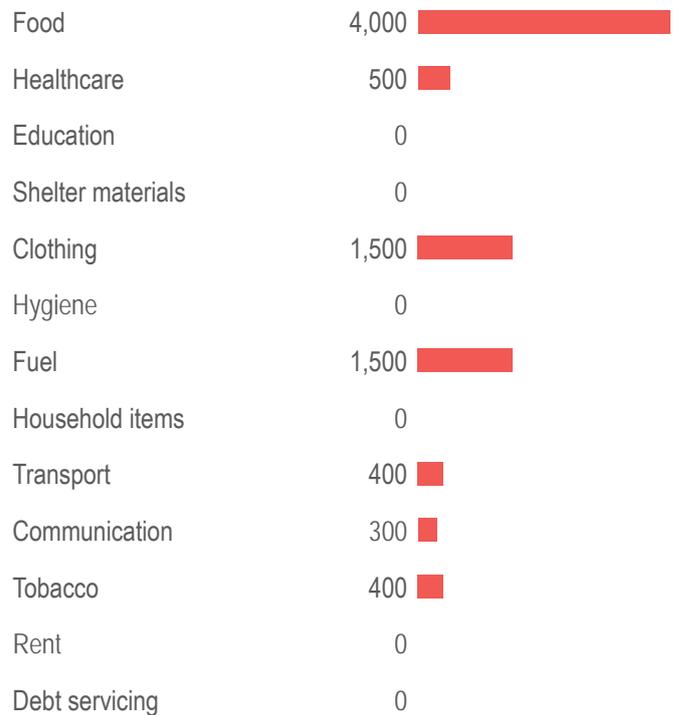

% of individuals reported to be working to earn an income in the 30 days prior to data collection

% of households reporting earning an income from different types of employment in the 30 days prior to data collection^{4,20}

Median reported monthly household expenditure in the 30 days prior to data collection, in Bangladeshi Taka¹⁹

4. Respondents could select multiple options

17. Three most common barriers to accessing complaint mechanisms are shown

18. Income from employment, remittances, cash assistance and new debts

Multi-Sector Needs Assessment - July 2018

Camp 20, Ukhiya, Cox's Bazar, Bangladesh

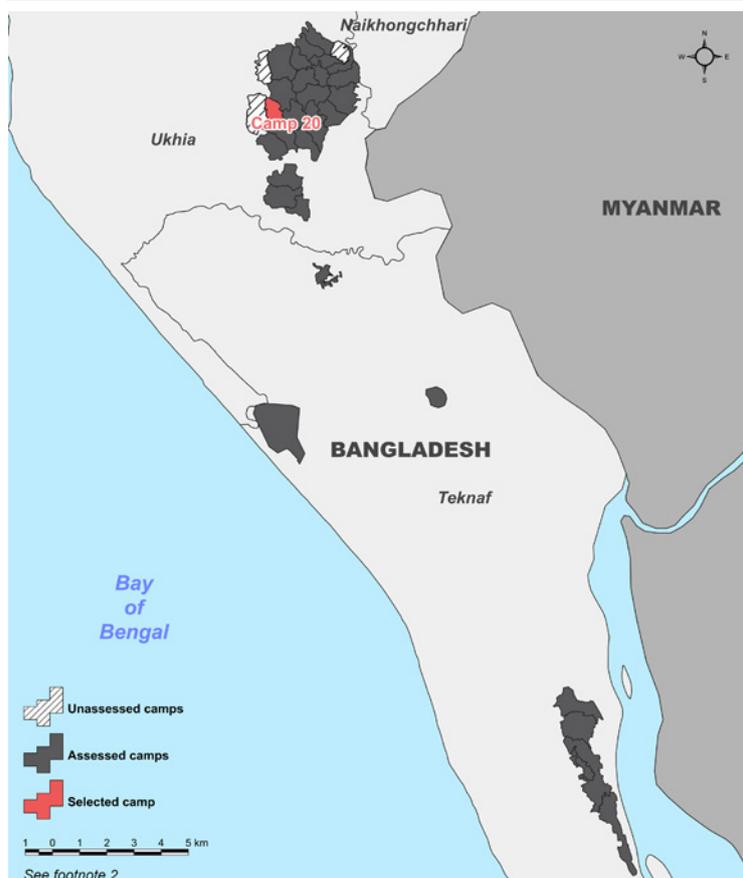

Background and Methodology

An estimated 723,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017¹. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The monsoon season began in May and continues into September, threatening the vast majority of refugees living in makeshift shelters and settlements highly vulnerable to floods and landslides.

To understand the evolving priority needs of the refugees, an inter-agency Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 31 refugee sites using a household survey methodology. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

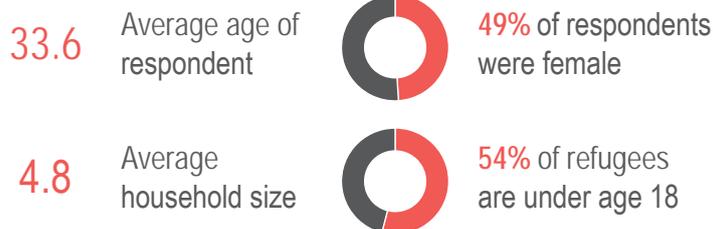

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Camp 20 where 87 households were surveyed between 2 and 31 July 2018.

In order to avoid duplication, data on WASH and Food Security were not extensively collected. WASH data was collected by REACH in April 2018 and can be found [here](#)³. More information on Food Security can be found in the Light Food Security Monitoring exercise by VAM / WFP.

Multi-Sector Needs Assessment - July 2018

Camp 24 / Leda, Teknaf, Cox's Bazar, Bangladesh

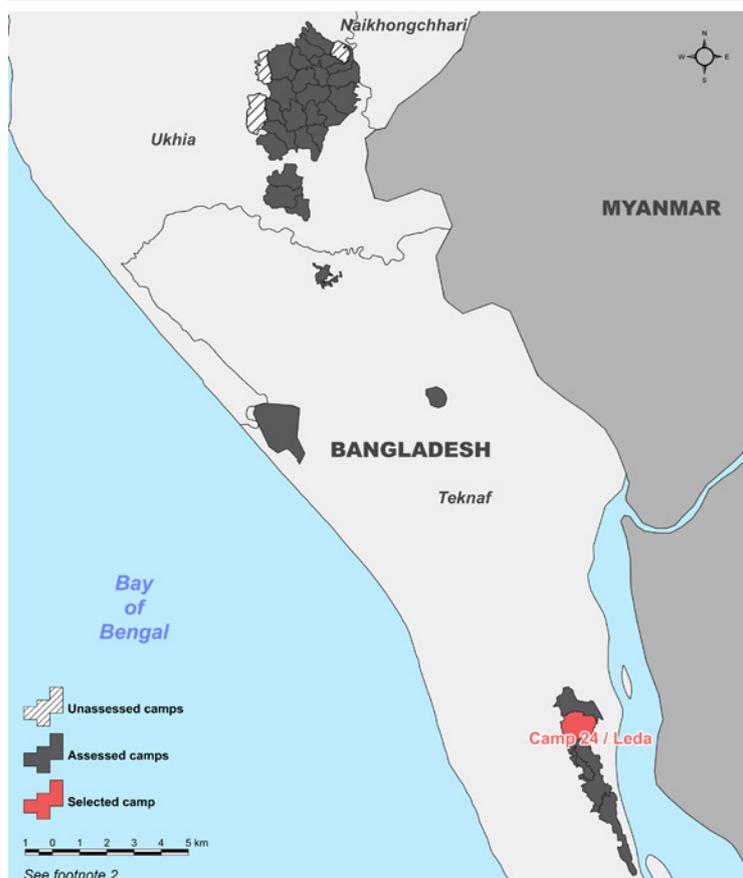

Background and Methodology

An estimated 723,000 Rohingya refugees have fled violence in Myanmar's Rakhine state since August 25, 2017¹. Most of the refugees rely on humanitarian assistance, having left with few possessions and exhausted their financial resources on the journey. The monsoon season began in May and continues into September, threatening the vast majority of refugees living in makeshift shelters and settlements highly vulnerable to floods and landslides.

To understand the evolving priority needs of the refugees, an inter-agency Multi-Sector Needs Assessment (MSNA), coordinated by the United Nations High Commissioner for Refugees (UNHCR) and with technical support from REACH, was conducted in 31 refugee sites using a household survey methodology. Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Camp 24 / Leda where 105 households were surveyed between 2 and 31 July 2018.

In order to avoid duplication, data on WASH and Food Security were not extensively collected. WASH data was collected by REACH in April 2018 and can be found [here](#)³. More information on Food Security can be found in the Light Food Security Monitoring exercise by VAM / WFP.

Support for questionnaire translation and enumerator language training was provided by Translators Without Borders.

Results of this MSNA are generalizable to the camp level with 95% confidence level and 10% margin of error. This factsheet presents an analysis of data collected in Nayapara RC where 94 households were surveyed between 2 and 31 July 2018.

In order to avoid duplication, data on WASH and Food Security were not extensively collected. WASH data was collected by REACH in April 2018 and can be found [here](#)³. More information on Food Security can be found in the Light Food Security Monitoring exercise by VAM / WFP.

Population in camp (individuals)¹ **26,915**

Population in camp (families)¹ **5,734**

37.7 Average age of respondent **44%** of respondents were female

5.8 Average household size **52%** of refugees are under age 18

Demographics

Composition of surveyed households

96% of households with at least one child under 18 years old

59% of households with at least one child under 5 years old

22% of heads of households were female

48% of households with pregnant or lactating women

45% of households with at least one person with a disability or chronic illness

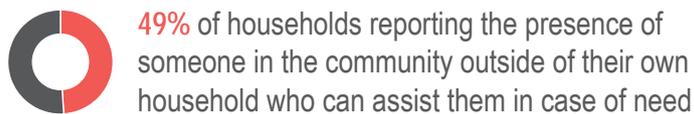

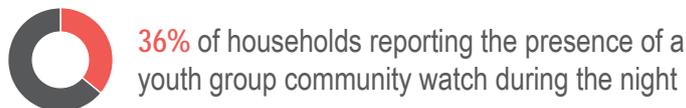

1. As defined by UNHCR in the population data and key demographical indicators (15 July dataset)

Multi-Sector Needs Assessment - July 2018

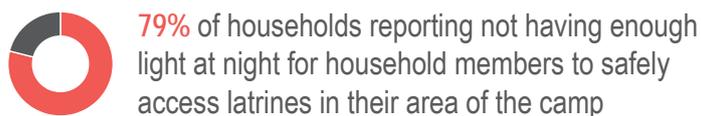

Nayapara RC, Teknaf, Cox's Bazar, Bangladesh

Protection

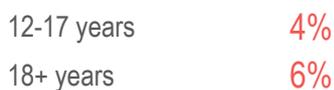

% of households reporting safety concerns (read: fears) for boys and girls (aged under 18)^{4,5}

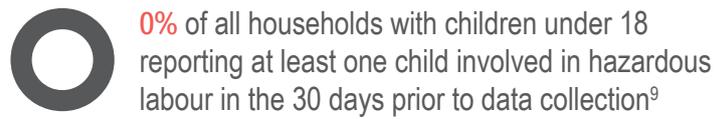

% of households reporting first port of call for assistance in dealing with safety or security issues^{4,6}

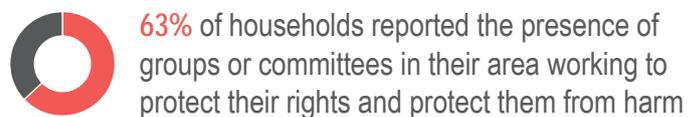

% of women reported to be attending activities at an NGO-run space where only women and girls are allowed in the 7 days prior to data collection⁷

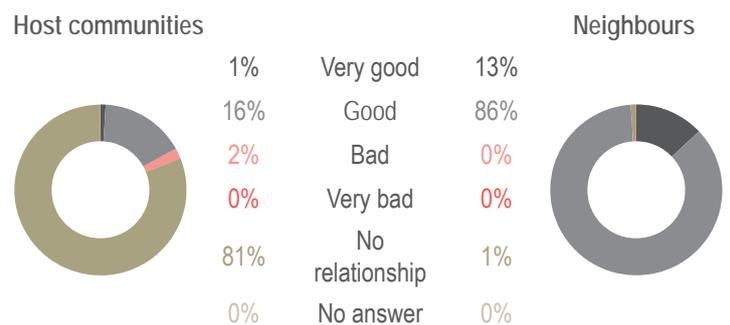

% of children reported to be attending activities at an NGO-run safe space for children in the 7 days prior to data collection⁸

% of households reporting areas in the camp where men, women, boys, and girls do not feel safe^{4,10}

% of households reporting different relationships with Bangladeshi host community and refugee neighbours in the same block

4. Respondents could select multiple options

5. Three most common safety concerns for boys and girls are shown

6. Three most common first ports of call for assistance are shown

7. Respondents were asked to report information for each woman in their household. This indicator shows the proportion of all individual women reported

8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

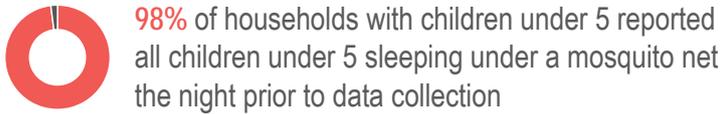

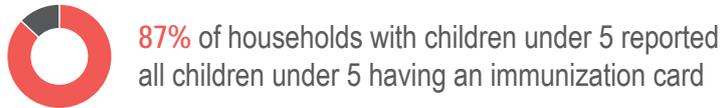

9. In this assessment hazardous labour was defined as: working with heavy machinery or lifting heavy objects, exposure to harmful chemicals, exposure to extreme heat (eg. furnace, bakery), working more than 40 hours per week, working at night (between 8 pm and 6 am), and using sharp objects.

10. Three most common areas where men, women, boys and girls do not feel safe are shown

Multi-Sector Needs Assessment - July 2018

Nayapara RC, Teknaf, Cox's Bazar, Bangladesh

Health

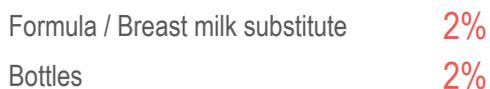

% of households reporting seeking treatment for an individual with a serious illness in the 30 days prior to data collection⁴

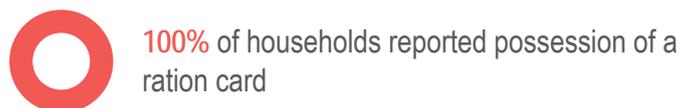

% of households reporting challenges in accessing NGO run clinics since arriving in the camp^{4,11}

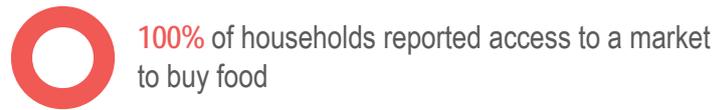

% of households with children under 5 reported receiving a breast milk substitute, infant formula or baby bottles through donation in the 30 days prior to data collection⁴

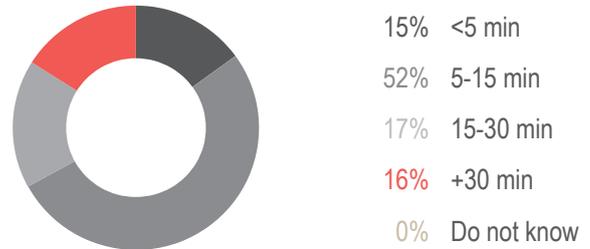

Food Security

% of households reporting receiving food assistance in the 30 days prior to data collection⁴

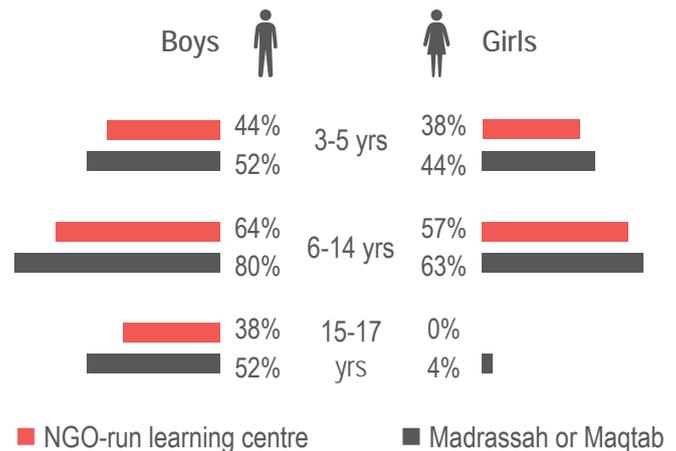

% of households reporting travel time on foot to food markets

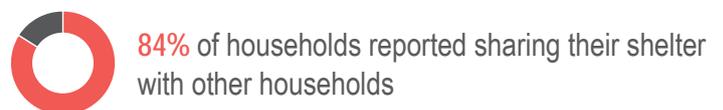

Education

% of children reported to be attending learning centres in the 7 days prior to data collection^{4,8}

Shelter & Non-Food Items

% of households reporting destruction or damage of their shelter in the 30 days prior to data collection

4. Respondents could select multiple options

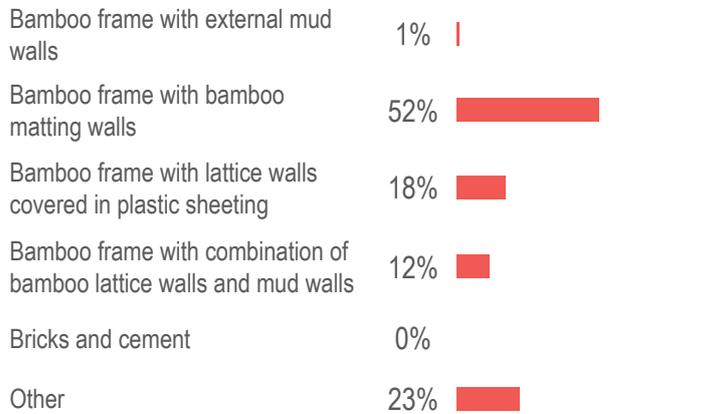

8. Respondents were asked to report information for each child in their household. This indicator shows the proportion of all individual children reported

11. Five most common health care access challenges are shown

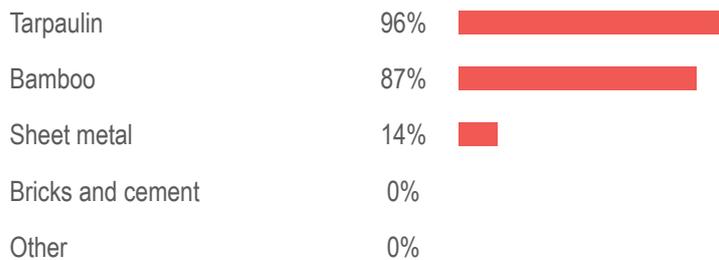

Multi-Sector Needs Assessment - July 2018

Nayapara RC, Teknaf, Cox's Bazar, Bangladesh

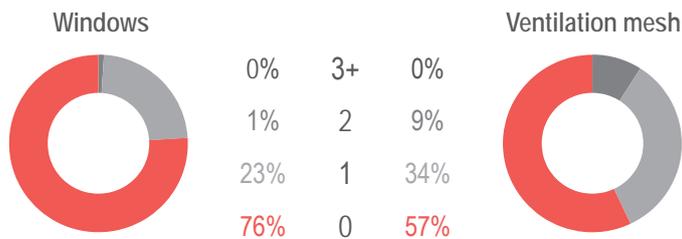

% of households reporting using different materials for the frame and walls of the household shelter⁴

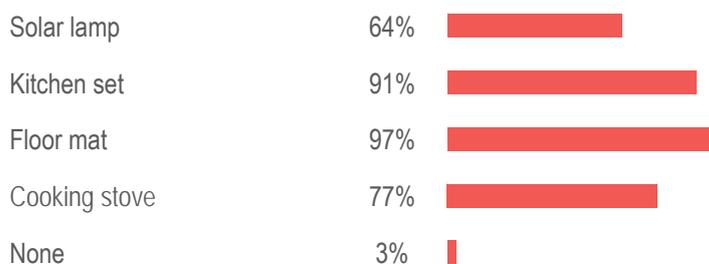

% of households reporting using different materials for the roof of the household shelter⁴

% of shelters with windows and ventilation mesh, by number of openings

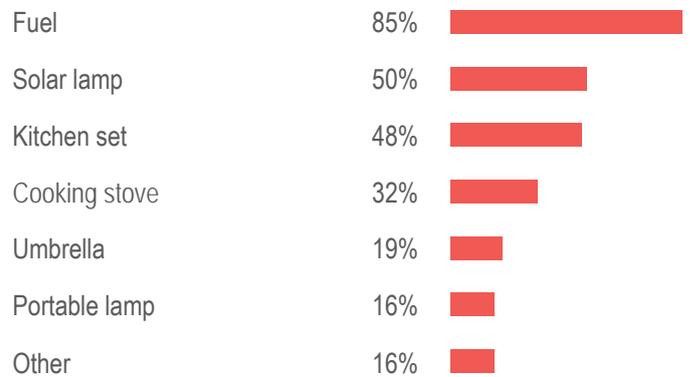

% of households reporting ownership of the following non-food items at the time of data collection

 **97%** of households reported receiving a distribution of cooking fuel within the 30 days prior to data collection

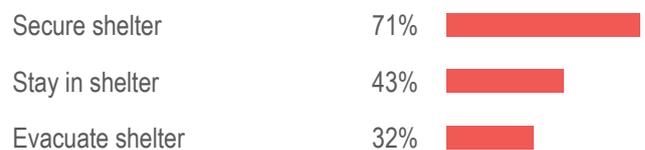

% of households reporting most urgently needed non-food items^{12,13}

Site Management

 **56%** of households reported being aware of the role of Cyclone Preparedness Program volunteers in their area¹⁴

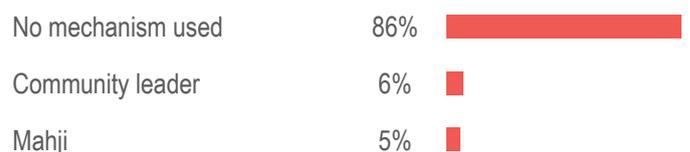

% of households reporting steps they would take to prepare for an approaching cyclone^{4,15}

Communication with Communities

 **55%** of households reported being aware of a complaint/feedback mechanism within their camp

% of households reporting use of complaint/feedback mechanisms in the 30 days prior to data collection^{4,16}

4. Respondents could select multiple options

12. Respondents could select up to 3 options

13. Seven most common non-food item needs are shown

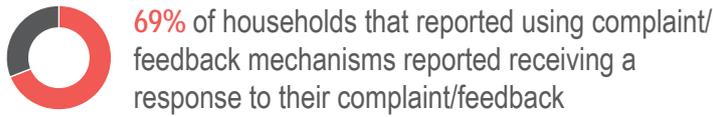

14. CPP is a joint community-based disaster risk reduction initiative of the Government of Bangladesh and the Bangladesh Red Crescent Society. It trains volunteers to deliver cyclone warnings to communities, assist with shelter and rescue, and provide medical attention

15. Three most common steps for cyclone preparedness are shown

16. Three most common complaint mechanisms used are shown

Multi-Sector Needs Assessment - July 2018

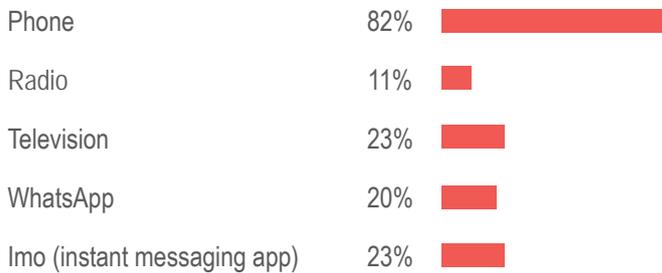

Nayapara RC, Teknaf, Cox's Bazar, Bangladesh

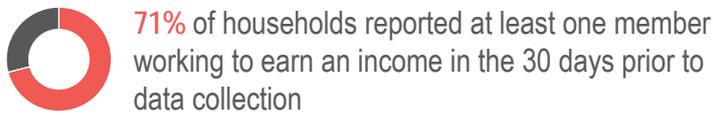

% of households reporting barriers to using complaint/feedback mechanisms^{4,17}

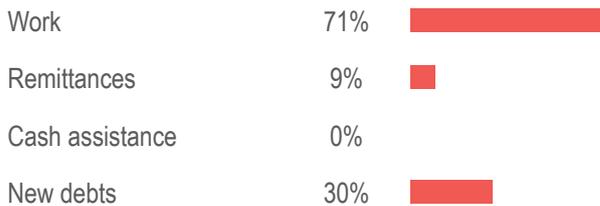

% of households reporting use of information channels in the 7 days prior to data collection⁴

Livelihoods

% of households reporting income from different sources in the 30 days prior to data collection⁴

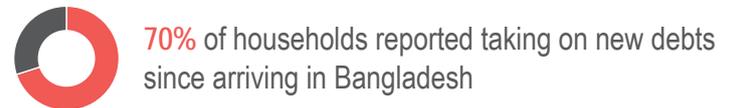

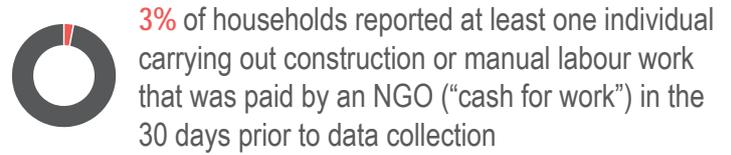

6,000 Median household income in Bangladeshi Taka (BDT)^{18,19}

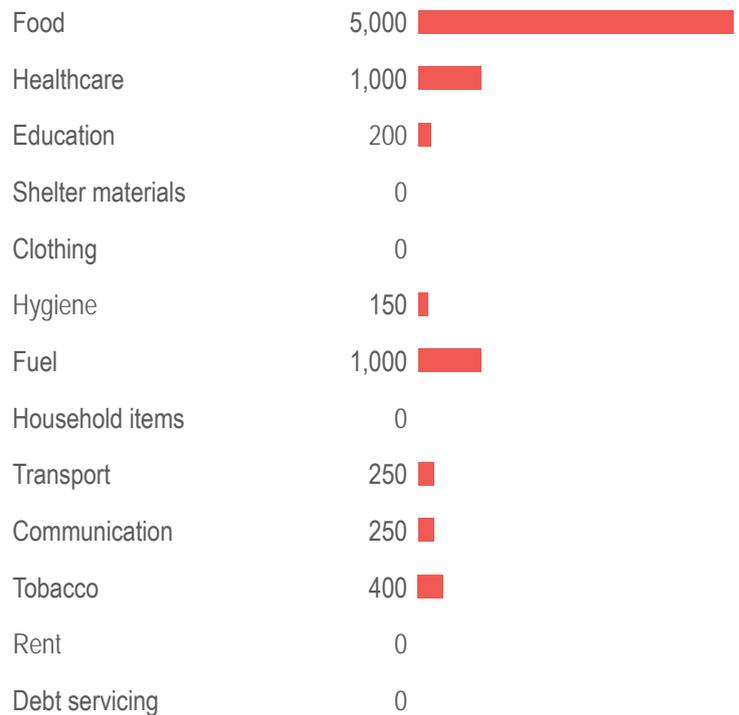

% of individuals reported to be working to earn an income in the 30 days prior to data collection

% of households reporting earning an income from different types of employment in the 30 days prior to data collection^{4,20}

Median reported monthly household expenditure in the 30 days prior to data collection, in Bangladeshi Taka¹⁹

4. Respondents could select multiple options

17. Three most common barriers to accessing complaint mechanisms are shown

18. Income from employment, remittances, cash assistance and new debts

19. USD 1 = BDT 84.2 (as of 3 September 2018). Source: www.xe.com

20. Five most common employment sectors shown
