

2019-2020 South Sudan RRRP

**Health & Nutrition
Food Security
WASH**

Health and nutrition

Improved health and nutrition status of refugees to reduce mortality, morbidity and malnutrition rates.

Objective 1: Health status of the population Improved

- Improve access to health services- increase functional health posts
- Improve EPI (vaccination) coverage
- Health promotion through community outreach

Objective 2: Nutritional wellbeing improved

- Further reduction of Global Acute malnutrition (GAM) (from 13,3% to < 10%)
- Strengthen cross sectoral linkages esp. food security, livelihoods & WASH

Objective 3: Optimal access to reproductive health and HIV services

- Improve ANC coverage (53% to 70% for ANC 4)
- Improve family planning uptake (prevalence from 7 to 20%)
- HIV- access to prevention, early diagnosis , care and support

Health and nutrition: resilience and inclusion

1. Sector plan links with CRRF and GoE pledges regarding basic and social services and is integrated within overall development environment: SDGs (3 & 2), National Plans (HSTP II) and UNDAF
2. Assisting host communities – PHC services available for host community free of charge (2% total consultations)
3. Building national capacity- targeted trainings, mobilise support for gambella Government Hospital to increase referral care capacity for host community and refugees
4. Nutrition link with small scale livelihoods programmes

Food Security

Provision of food assistance to prevent malnutrition and morbidity and mortality

Objectives

- Provide all refugees living in camps monthly in kind food assistance (2,100 Kcal / person/ day) and further exploration of cash to replace part of in kind
- Provide blanket supplementary feeding for children under 5 and pregnant and lactating women
- Expand fresh food voucher programmes to increase dietary diversity
- Expand small scale livelihoods initiatives inc. backyard gardening
- Linkages with nutrition programme identifying most vulnerable

WASH

Refugees and surrounding host communities will continue to access water in sufficient quality and quantity and sanitation facilities with a focus on seeking sustainability and cost efficiency

Objective 1: Ensure population has access to clean and safe water

- Support functionality of Itang Water Utility and seek expansion to other camps
- Progressive solarisation of water pumping installations

Objective 2: Ensure population lives in satisfactory hygiene and sanitation conditions

- Improve household latrine coverage & use of UDDT
- Enhance health and hygiene promotion

WASH continued

- Promote community centred WASH interventions through scaling up the piloted community-based management model by contextualizing it to fit well in the context of each refugee camp.
- Implement new innovations in sanitation programming including the conversion of waste to energy/resources as a way of ensuring sustainable sanitation.

WASH: resilience and inclusion

1. Sector plan links with CRRF and GoE pledges regarding basic and social services and is integrated within overall development environment: SDG 6, National Plans and UNDAF
2. Assisting host communities – Itang water utility provides for refugee and host community. Host community has access to other camp water supply systems.
3. Building national capacity- supporting the implementation of Utility model including capacity building
