

CCCM Cluster Somalia Dashboard

as of April 2019

General update

Action plans were developed by Site Management Committees in Sanaag to identify maintenance activities to be conducted in their sites. Once the action plans are validated, the camp management partner operating in the site will support committees to carry out the projects.

CCCM Partners conducted a Go and See visit with representatives of 15 IDP sites to the new Baidoa Public Site. Communities were shown the site and services available, including the security posts, plot sizes, water collection points, and lockable household latrines.

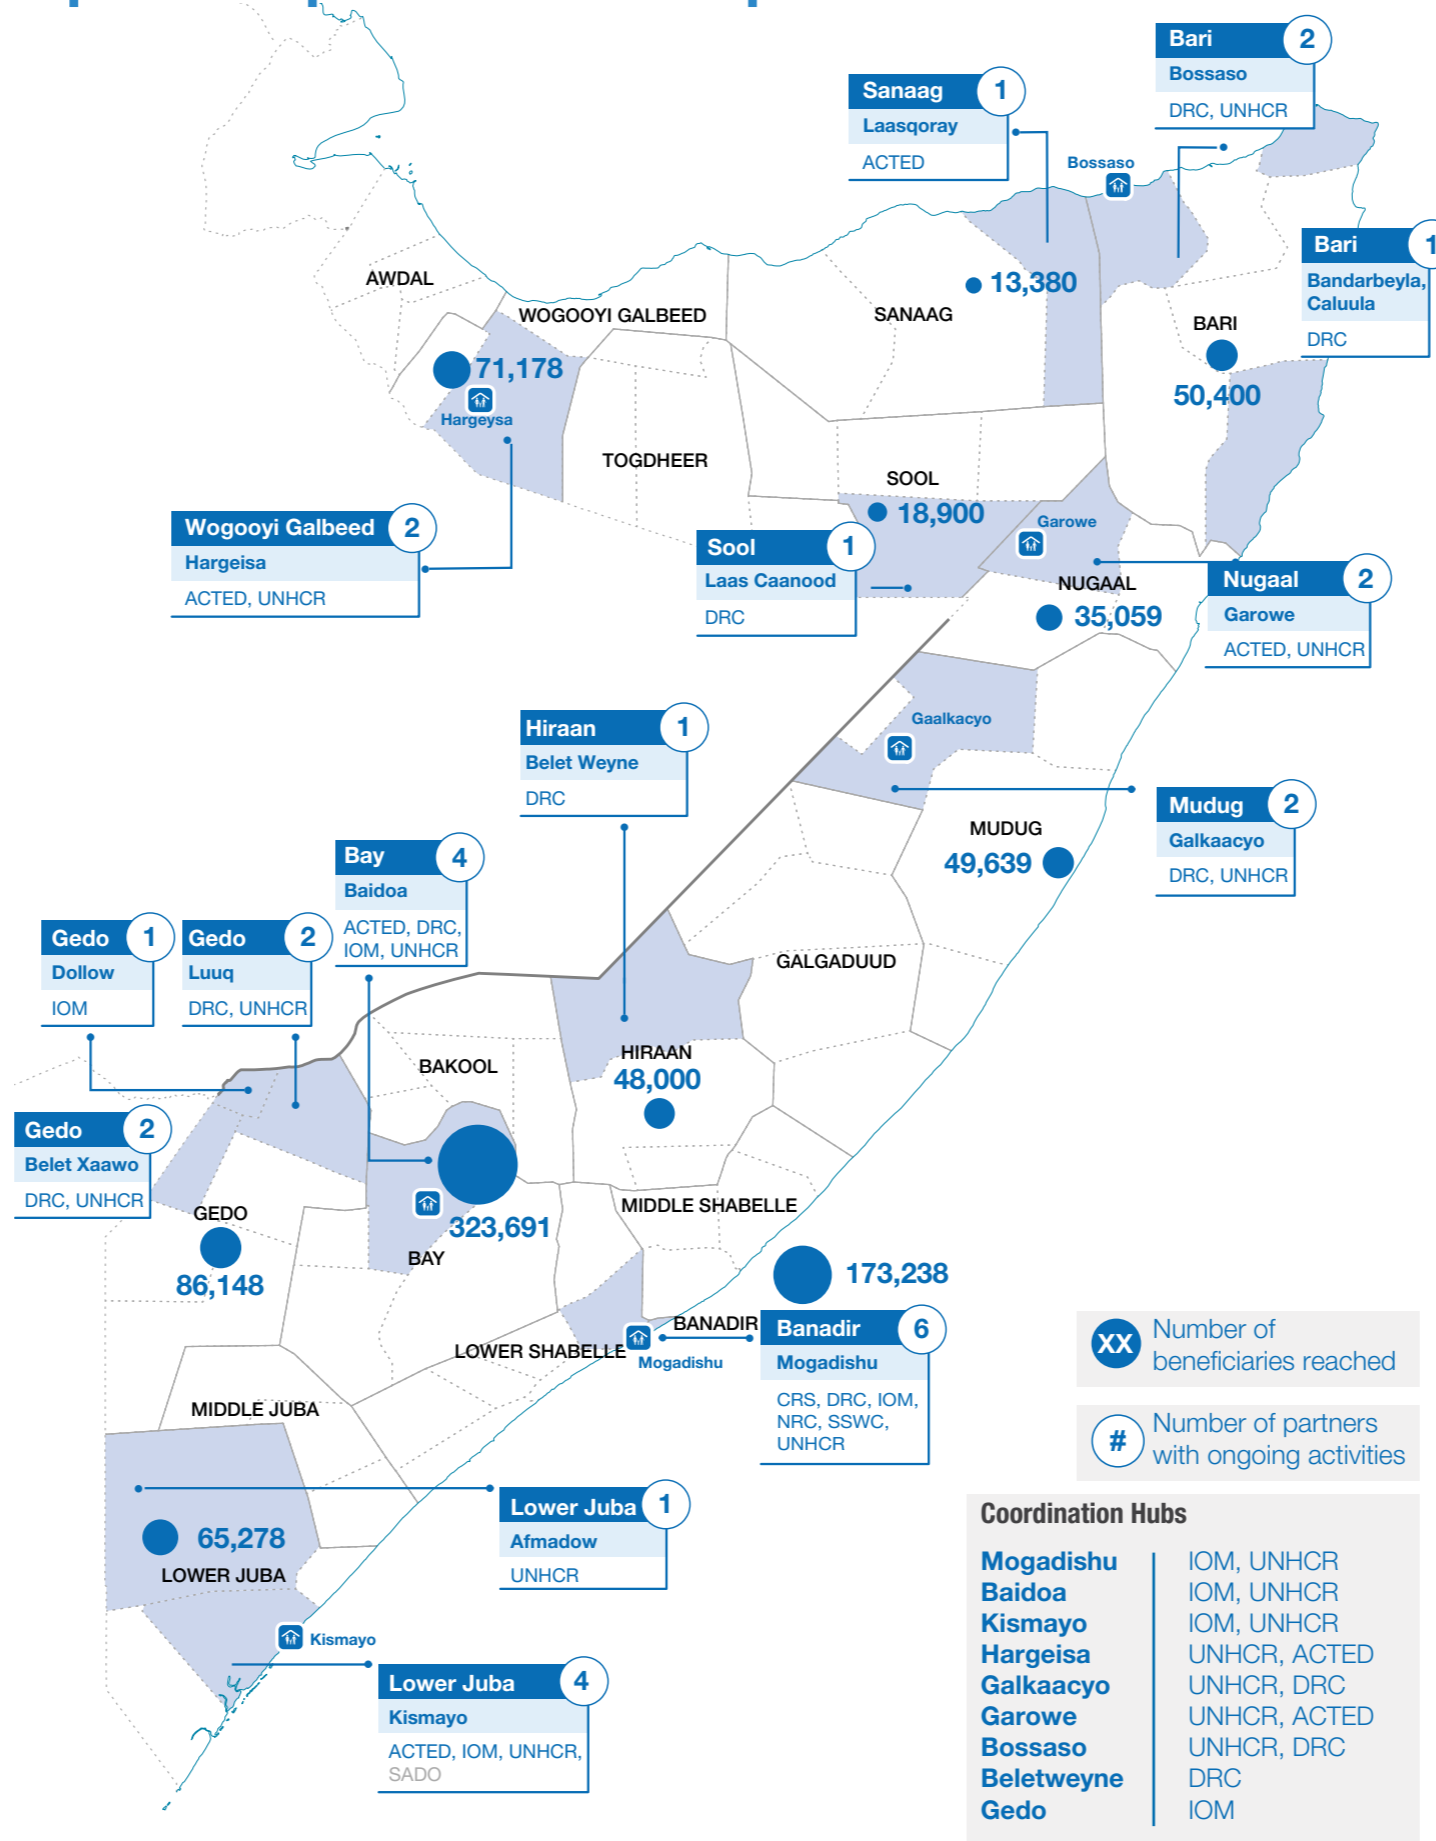

107 households (921 individuals) were evicted by private land owners in Baidoa. CCCM teams supported the relocation of the 107 HHs in to other sites with formal land lease agreement for 5 years. The camp management team mobilized neighboring IDPs to facilitate their integration into their new community

In an effort to improve site safety and security at night, CCCM partners completed the installation of 72 solar lamps in Garowe and Burtinle IDP sites. These lights provide dawn to dusk lighting which allow site residents to move freely at night by mitigating protection risks for women and girls who are most vulnerable to attacks and abuse particularly when it is dark.

CCCM partners conducted camp clean ups in 25 sites in Banadir using a cash for work modality.

The CCCM subnational focal point in Somaliland conducted a two-day capacity building training for participants from Somaliland National Displacement and Refugee Agency (NDRA) on camp coordination and camp management. The aim of the training was to develop shared understandings of roles & responsibilities, accountability to affected population, coordination and information management in camps and camp-like settings in order to contribute to effective settlement responses and quality intervention to ensure improvements in service provision to internally displaced persons (IDPs) living in communal settings. The 2-day training was the first CCCM capacity building trainings delivered in Somaliland.

Operational presence of cluster partners

Overall Objective

To improve the living conditions and protection of IDPs in sites and settlements and ensure equitable access to services and assistance of all persons in need, with a clear focus on moving toward attaining durable solutions with full participation of the displaced and host communities.

Strategic indicators	Target	Achieved
# of IDP reached by CCCM partners	1.8 million	934,911
# of sites with established CCCM mechanisms	1,926 sites	742 sites
# of districts covered by the Detailed Site Assessment	2,000+ sites	60 districts

Baseline data

2.6 million IDPs in Somalia
2,000+ IDP sites in Somalia

Gaps

- Restricted humanitarian access in some parts of south and central Somalia
- Lack of information on service provision at site level
- Lack of land tenure and forced evictions inhibit the ability of partners to improve living conditions in sites
- Low levels of community participation and AAP inhibit ability to improve beneficiary targeting to include marginalized populations

XX Number of beneficiaries reached
Number of partners with ongoing activities
