# Report on Education in Emergency (EiE) Gender Analysis Report 

2019/04/08
Asuka Ishii
Programme Coordinator

AAR Japan have concluded that below relevant discrepancies have been found between education of boys and girls. These data based on the grade promotion and PLE examination reflects the reality of the school better than its attendance and enrollment. The data have been collected from the settlements where AAR Japan is implementing activities, namely Bidibidi settlement zone 5 and Imvepi settlement all zones $(1,2,3)$ and are dated as of 2018 academic year.

The schools targeted for this survey are:
Bidibidi Settlement Zone 5: Yangani PS, Ariwa PS, Okubani PS, Ombechi PS, Ayivu PS, Ariwa SS Imvepi Settlement Zone 1: Longamere PS, Emmanuel PS

Imvepi Settlement Zone 2: Inyau PS, Imvepi PS, Supiri PS, Torit PS, Afeya PS, Lanya PS, Awa PS, Imvepi SS

Imvepi Settlement Zone 3: Yacha PS, Unity Progressive PS, Equatoria PS
However, it is important to note that data analysis based on only 1 academic year does not allow us to conclude to a statistical generalization of the trend and can only be served as potential insights that are arising.

## Quantitative Analysis:

1. Girls tends to fail to pass grade more than boys.

The chart below shows that there is a gender gap of grade promotion where boys are succeeding more than girls. The gaps are $5 \%-7 \%$ at Primary school, increasing to $12 \%-14 \%$ for ALP and $13 \%-23 \%$ at secondary school showing a gaps widening as the age of learners' increase.

Chart 1: Grade Pass Analysis by school

| Grade Pass Analysis |  | Bidibidi Zone 5 |  |  |  |  |  | Imvepi Settlement All Zones |  |  |  |  |  |

*Roundup to the nearest decimal

This gaps widening can also be observed per grade within primary school. As the chart 2 shows, more the grade ups, more the gaps are in somehow widen especially from P1 to P4. For Bidibidi
zone 5, the gap seems to be rectified at P6 (only $2 \%$ between girls and boys) but it can be attributed to the overall low level of grade passing rate that is $28 \%$. As for Imvepi P5, this gaps recovery shows some peculiarity but correlation have been found from the drop-off rate showed in chart 3 that Imvepi 2018 P5 Girls are relatively exceptional good performers compared to other grade.

Chart 2: Grade Pass Analysis within Primary School per grade

## Chart 3: Drop-off and Survival Rate at Imvepi Settlement.

| Dropoff Rate | P1 | P1-P2 | P2-P3 | P3-P4 | P4-P5 | P5-P6 |
| :--- | :--- | ---: | ---: | ---: | ---: | ---: |
| Boys |  | $25 \%$ | $18 \%$ | $14 \%$ | $9 \%$ | $7 \%$ |
| Girls |  | $45 \%$ | $11 \%$ | $11 \%$ | $4 \%$ | $8 \%$ |
| Survival Rate | P1 | P2/P1 | P3/P1 | P4/P1 | P5/P1 | P6/P1 |
| Boys | $100 \%$ | $75 \%$ | $58 \%$ | $44 \%$ | $35 \%$ | $28 \%$ |
| Girls | $100 \%$ | $55 \%$ | $44 \%$ | $33 \%$ | $29 \%$ | $22 \%$ |
| Number per class | P1 | P2 | P3 | P4 | P5 | P6 |
| Boys | 2,066 | 1,557 | 1,192 | 907 | 715 | 577 |
| Girls | 2,179 | 1,202 | 963 | 726 | 634 | 470 |

2. Girls tend to dropout school more than boys.

The chart 3 shows that in Imvepi Settlement, the survival rate of primary pupils to reach P6 is only $22 \%$ for girls while $28 \%$ for boys and a gap of $6 \%$ is perceived.
In Primary school, the number of boys and girls attending P1 are mostly equal with $2 \%$ to $3 \%$ of differences, but this gaps widen as the grade increase.

Regarding Secondary school, in 2018, both settlements have only one school. In that regards, school management and policy may strongly influence the ratio and no statistical generalization can be made. However, the gender gap widening trend is further deepen at Secondary school level.

Chart 4: Girls Ratio per grade

*Roundup to the nearest decimal
3. Girls tends to fail to succeed to Primary Leaving Examination (PLE) 8\% more than boys.
Taken the overall PLE succeeding rate of all schools in zone $5,79 \%$ of boys succeed to pass grade while only $71 \%$ for girls. Moreover, the number of girls (133) taking PLE are far less than boys (298). Assuming that the number of girls and boys enrolled at P1 level are equal between gender for each group of age, this induces that at the end of Primary school, girls have $65 \%$

| Chart 5: PLE Results Bidibidi Zone 5 |  |  |  |  |
| :--- | ---: | ---: | ---: | ---: |
| PLE | Fail | Pass | TOTAL | Pass \% |
| Boys | 63 | 235 | 298 | $79 \%$ |
| Girls | 39 | 94 | 133 | $71 \%$ |
| School | Fail |  | Pass | TOTAL |
| Ariwa PS | 7 | 19 | 26 | $73 \%$ |
|  | 6 | 16 | 22 | $73 \%$ |
| Ayivu PS | 14 | 38 | 52 | $73 \%$ |
|  | 5 | 20 | 25 | $80 \%$ |
| Okubani PS | 0 | 23 | 23 | $100 \%$ |
|  | 3 | 15 | 18 | $83 \%$ |
| Ombechi PS | 20 | 39 | 59 | $66 \%$ |
|  | 12 | 18 | 30 | $60 \%$ |
| Yangani PS | 22 | 116 | 138 | $84 \%$ |
|  | 13 | 25 | 38 | $66 \%$ | (133/298) of probability less to sit for PLE exam. No data collection was made for Imvepi Settlement.

4. Lack of infrastructure for girls does not cater girls need to come to school.

Among the 15 schools in Imvepi settlement, only 3 schools have girls changing room and most of the school do not have enough latrines to reach the 40 pupils per stance as per the standard suggests.
5. Girls tend to be more out of school than boys.

The survey conducted by World Vision in October 2018 in all zones of Bidibidi, shows that ratio of refugee girls that have never attended school is $8 \%$ for PS and $3 \%$ for SS while refugee boys represents $0 \%$ for both PS and SS from the sampled population. Such acts of deprivation affect girls' education and result in illiteracy, poverty and increases health related risks largely attributed to the lack of basic education among women.

## Qualitative Analysis:

6. When asked the reasons why girls passing rate are low than boys through a simple questionnaire to head teacher of each school in both settlements, 3 main reasons have always come as the top challenges.
7. Attitude of girls towards education and their self-esteem,
8. Housework time that girls have to do at home,
9. Community including parents' understanding towards girls' education.

Chart 6: Reasons Why Girls Passing rate are lower than boys

7. Question on what kind of solutions can increase girls' enrollment, attendance and motivation to school were also complementary asked. The answer that get the most support was to put emphasize on the importance to sensitize girls, communities, parents and guardians so they can feel relieved to come to school. Indeed, sensitization is to be the most extensive solution to cover the 3 top problems raised in the previous paragraph. Other big point was the distribution of scholastic materials to motivate them; hygienic materials such as sanitary pads and soaps. Guidance for secondary school, vocational schools were also mentioned to sensitize girls on their career potential and future.

Chart 7: Solutions on how to increase the enrollment and attendance of girls
