

Response to Q1 '20 feedback - 2019-2020 RRP Performance Tracking (Jun. '20)

The following changes have been made to the ActivityInfo platform based on feedback received after the Q1 2020 reporting cycle.

General changes / clarifications

- Direct implementation option has been added to all forms
- Some partners reported getting the message “You are offline” when they are connecting to ActivityInfo through mobile data. To avoid this, you can either:
 - Check the status of your OTT and top-up if needed; or
 - Try connecting through another mobile network operator (if possible); or
 - Tick the box “Available offline” at the top of the page when you are on a stable internet connection, you can then enter records even when your connection is not stable and they will be automatically uploaded when your connection improves
- A user validation exercise was conducted, the following users have been removed:
 - Users who have not accepted their invite 1 month after it was sent
 - Users who have not logged in to their account for at least 6 months

Sector specific changes / clarifications
