

CCCM Cluster Somalia Dashboard

as of July 2020

General update

CCCM partners have either completed or have ongoing risk communication activities (awareness raising on COVID-19) in 921 IDP sites out of 2344 IDP sites nationally, covering 1,091,009 persons (42% out of total 2.6 million). Partners closely collaborated with Radio Ergo in airing-out COVID-19 messages and mobilized IDP communities to listen to these important segments and provide feedback.

Site clean-up campaigns were conducted by 34 community members in Qasahley IDP site in Dollow through partner mobilization efforts. Moreover, 450 community members (300F/150M) from IDP sites in Kahda and Daynile were engaged to carry out site improvement activities through Cash-for-Work initiatives.

Partners trained 50 Camp Management governance structures for newly targeted IDP sites in Hudur to support site improvement activities. Furthermore, in Baidoa, 20 community outreach workers and 280 CCCM stakeholders including camp management committees were trained on camp management approaches.

A multi-purpose community center was constructed for IDPs living in Berdale, and will be equipped with essential furnishing to improve coordination at the site-level. In Benadir, site governance structures for 40 IDP sites in Daynile and Hodan districts were established.

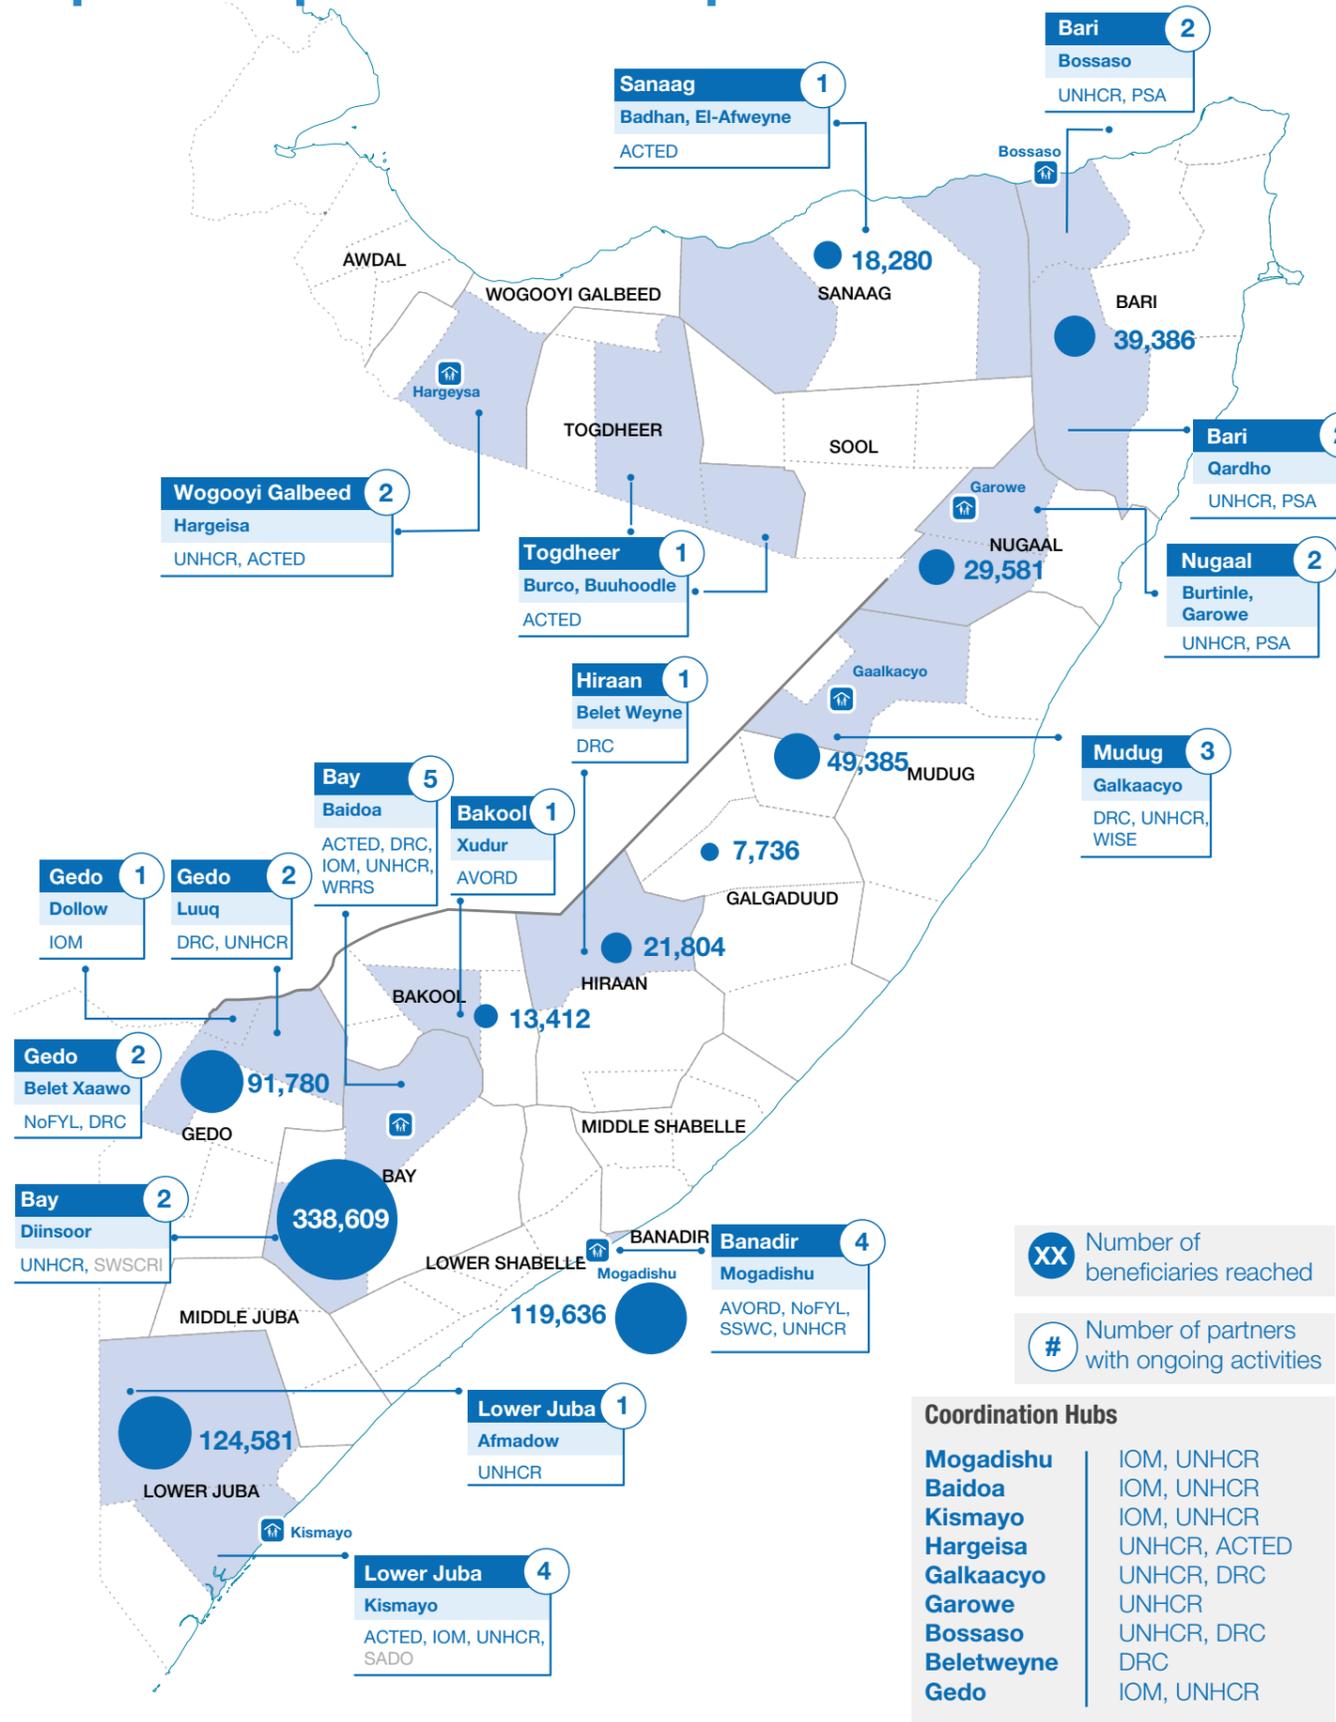

Service mapping and service monitoring conducted by CCCM partners in their areas of operations flagged service gaps at various IDP sites in Galkayo and Benadir; the cluster shared these gaps with service providers and cluster coordinators for further follow up.

CCCM partners conducted evictions risk mapping and identified sites that are at heightened risk of eviction with this data shared with the HLP AOR. In certain districts like Baidoa, partners enhanced efforts to uphold the eviction moratorium through engagement with religious leader and landowners.

2,138 complaints were recorded by partners through their respective CFM desk and hotline systems; out of these registered complaints, 85% were solved and closed.

Through safety audit activities, partners assessed 144 IDP sites in Kismayu and Benadir to identify mitigation measures to be taken collectively by humanitarian actors to reduce the identified risks and/or vulnerabilities identified.

Operational presence of cluster partners

Overall Objective

To improve the living conditions and protection of IDPs in sites and settlements and ensure equitable access to services and assistance of all persons in need, with a clear focus on moving toward attaining durable solutions with full participation of the displaced and host communities.

Strategic indicators	Target	Achieved
# of IDP reached by CCCM partners	1.4 million	854,190
# of sites with established CCCM mechanisms	1,600 sites	824 sites
# of sites covered by COVID-19 information sharing campaigns	1,000 sites	921 sites

Baseline data

2.6 million IDPs in Somalia
2,300+ IDP sites in Somalia

Gaps

- Restricted humanitarian access in some parts of south and central Somalia
- Lack of information on service provision at site level
- Lack of land tenure and forced evictions inhibit the ability of partners to improve living conditions in sites
- Low levels of community participation and AAP inhibit ability to improve beneficiary targeting to include marginalized populations
- COVID-19 pandemic creating changes in service modalities and the need to prioritize risk communication activities over traditional CCCM tasks

Coordination Hubs

Mogadishu	IOM, UNHCR
Baidoa	IOM, UNHCR
Kismayo	IOM, UNHCR
Hargeisa	UNHCR, ACTED
Galkaacyo	UNHCR, DRC
Garowe	UNHCR
Bossaso	UNHCR, DRC
