¹Actual capacity is calculated as the addition of occupied places plus available places.

The number of places that cannot currently be used because of damages/repairs, protection issues, family size, end of contract, etc. is the natural loss.

²Occupancy rate is calculated as the percentage of current population over actual capacity.

The available capacity is 890 places (mainland: 858 / islands: 32).

Out of them, 243 places are reserved (mainland: 230 / islands: 13).
