Conclusion

- **MSNA** will provide a better understanding of **needs** of both **displaced** and **host populations** for a large majority of crisis affected people.
- REACH is able to provide **weekly updates** to the **CSG** on **results** from the ongoing data collection
- By increasing the sample size, the MSNA will be able to breakdown data by Marz to increase the **granularity** of the **results**
- REACH will be deploying additional capacities for a **6 to 12 months** period in 2021 to i) implement a **post-winter MSNA** ii) provide **assessment** and **IM** capacities to the **IMWG** and iii) cover other **assessment** and **analysis needs** as they emerge
