

Information Management Working Group - Minutes

10 August 2022

Online meeting

Agenda

1. *Review of minutes of last meeting*
2. *Update on 5W and Framework*
3. *Update on ongoing Assessments*
4. *A.O.B.*

1. Review of minutes of last meeting

2. Update on 5W and Framework

The Technical workshop on the RRP Funding and Progress Report was held on 28th July, conducted by UNHCR and with the participation of several partners. UNHCR informed of the next steps agreed during the session and the importance to involve all actors on this process.

Action points:

- Partners that have not submitted their cumulative and July activity and presence data via the 5W template, might send it by end of this week (12th August) – UNHCR remain available for any required support
- UNHCR will follow up with partners and consolidate/publish the data on the operational data portal, once all data is received from partners

3. Update on ongoing Assessments

UNHCR informed of the ongoing assessments at country level:

The Site monitoring and needs assessment as interagency initiative with IOM, and supported by REACH, continue as planned: data collection phase will finish by the 12th August, and the final report will be finalized by mid-September.

MSNA data collection is finished and UNHCR/REACH start working on the analysis – as part of this, there will be a general presentation by beginning of September to the IM WG with the preliminary findings. Also, sectoral presentation will be held on the specific WG to support the sectoral analysis of the MSNA.

It was discussed to create an Assessment registry to include all assessments from different actors and map all ongoing/planned initiatives in the country.

Action points:

- UNHCR/REACH will present preliminary findings to the IMWG beginning of September.
- UNHCR will start building an Assessment Registry that will be shared in the next IMWG.

4. A.O.B.
