Communication categories

## Specific Protection Needs (SPN)

The Specific Protection Needs make it possible to identify the vulnerabilities that people present and the protection risks they face. In this sense, people may have one or several SPNs, and these may change during a given period.

SPNs Categories

## Main subcategories of SPNs registered in PRIMES

-  **28%** Without legal documentation
-  **27%** Unmet basic needs
-  **9%** Without access to services
-  **7%** Children at risk of not attending school
-  **6%** Father/mother/or single caregiver in charge of the household

Among the local number of SPN, 28% of people are without legal documentation, meaning that they either do not possess any documentation or are in an irregular situation; some might be at risk of statelessness. 27% have unmet basic needs, with difficulties in achieving a adequate standard of living, including access to food, clothing, housing, water, sanitation and health care.
