Pledge Refinement Form (statelessness-related pledges)

Pledges submitted by States in the context of the Global Refugee Forum¹ present commitments made by States to address statelessness in their territory. The purpose of pledges is to galvanize political commitment and foster collaboration among different actors. While pledging entities cannot fundamentally change the content of their existing pledges, they have the flexibility to refine their pledges to make it more action oriented and measurable. This process enables pledging entities to ensure their pledges are sufficiently clear and specific.
