

Key sector achievements

The sector's main objective is to ensure full transition of comprehensive primary health care services for refugees into national and local government systems, in line with the Health Sector Integrated Refugee Response Plan (2019-2024), launched in January 2019.

Achievements

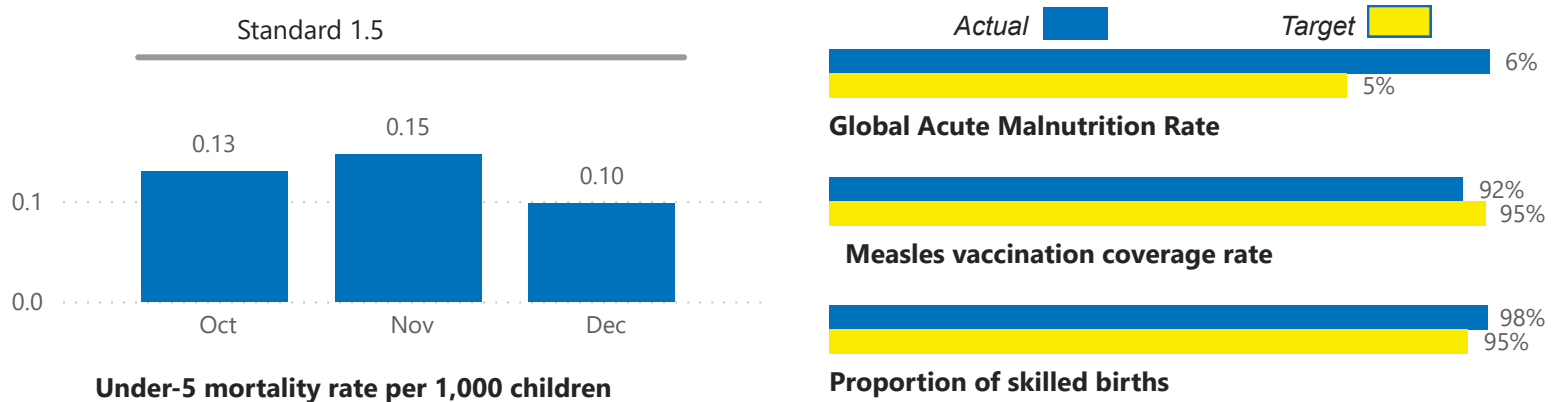

During reporting period, the under-five and crude mortality rates were kept low at 0.13 and 0.05 (per 1000 people) per month, respectively, while the standard is below 1.5 and 0.75. The leading cause of mortality are Malaria (16%), Neonatal deaths (13%), Lower respiratory tract infection (12%), Anemia (6%) and Liver diseases (6%) among the general population.

A total of 608,434 consultations were registered in Q4 2023 (26% nationals & 74% refugees). With each clinician receiving on average 46 consultations a day against the standard of <50. The major disease burdens were Malaria (43%), Upper respiratory tract infection (10%), Lower respiratory tract infection (8%), Skin diseases (6%) and urinary tract infection (4%) of the general population

A total of 12,518 (6,950 refugees & 5,568 nationals) live births were registered in the quarter of which 98% were attended by skilled health workers and 11% by

Key performance indicators

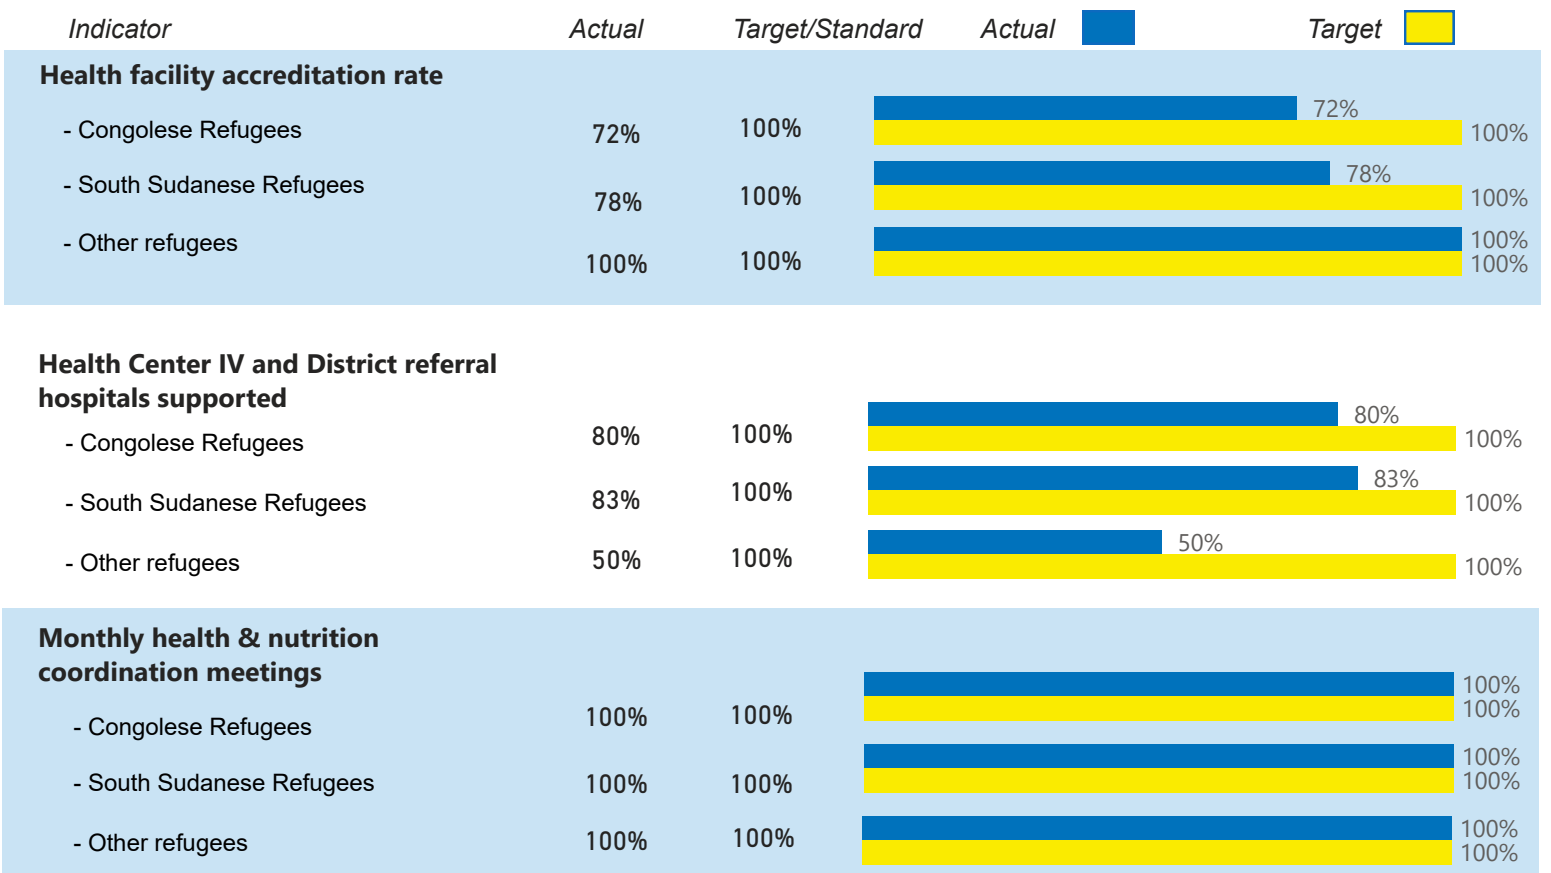

OUTCOME 1: Improved access to adequate preventive, promotive and curative services for communicable and non communicable diseases

Indicator	Actual	Target/Standard	Actual	Target
Under-5 mortality rate per 1,000 children per month				
- Congolese Refugees	0.14	1.5	0.14	1.50
- South Sudanese Refugees	0.14	1.5	0.14	1.50
- Other refugees	0.05	1.5	0.05	1.50
Global Acute Malnutrition rate				
- Congolese Refugees	2%	5%	2%	5%
- South Sudanese Refugees	9%	5%	9%	5%
- Other refugees	3%	5%	3%	5%
Consultations per clinician per day				
- Congolese Refugees	40	50.0	40	50
- South Sudanese Refugees	32	50.0	32	50
- Other refugees	46	50.0	46	50

OUTCOME 2: Improved HIV-TB prevention, care and treatment services

OUTCOME 3: Strengthening the national health care system capacity to cope with the increasing demand for health services by refugees and host population.
