Uganda Refugee Response Plan (RRP) 2024-2025

Quarters ▼

Quarter 2 ▼

Overview →

The Sector Overview:

The GBV sector is dedicated to fostering long-term changes in attitudes and behaviors regarding gender roles, norms, and gender-based violence, ensuring survivors and those at risk receive timely, survivor-centered case management services and comprehensive, multi-sectoral support. By 2025, the sector aims to build a robust, inclusive national GBV system that prevents, mitigates, and responds to all forms of gender-based violence, working with refugee communities to shift attitudes and reduce incidents. Guided by the GBV Strategy for Uganda Operation 2021-2025, the sector's objectives include preventing GBV by addressing root causes, identifying risks, implementing specific interventions, establishing a quality response and case management system, and fostering partnerships for better protection and solutions for forcibly displaced and stateless persons. The funding requirement for 2024 is 25M USD

The Result Analysis:

As of June 2024, 2,105 cases of Gender-Based Violence (GBV) have been reported. If current trends continue, we anticipate around 4,200 cases by year-end, marking a 28% decrease from 2023 and an 11% decrease from 2022. **Key factors influencing these numbers** include a **67% reduction in GBV case workers**—from 165 in 2023 to 55 in 2024—affecting case identification and support, and a **7% drop in awareness reach** from 136,457 to 127,034 individuals, likely impacting reporting rates.

Despite these challenges, training for women and men in functional and community-based structures on GBV prevention is progressing well, with **2,932 trained against a target of 4,000**. However, **only 483 out of 2,105 satisfaction surveys were completed**, reflecting the strain on staffing. Notably, the number of closed cases has risen from 628 in June 2023 to 870 in June 2024, attributed to improved caseworker training and monitoring.

The Key challenges/opportunities:

Major challenges in GBV response efforts include an inadequate caseworker ratio, with high turnover affecting care quality; a shortage of survivor-centered centers offering confidential support for women and girls; and limited access to essential services, often requiring survivors to travel long distances. Additionally, funding constraints impede comprehensive prevention programs, while economic support for survivors and access to dignity kits remain insufficient.

To address these issues, it is crucial to engage community-based structures and women-led organizations to support caseworkers by providing basic training for non-specialized tasks, optimizing case management by prioritizing and effectively closing cases, and repurposing existing community centers or safe spaces to offer confidential counseling and empowerment services. These measures can enhance coverage and efficiency, improving overall GBV response efforts and the well-being of survivors.

The Sector Priorities:

In the next quarter, **the GBV sector shall enhance coordination by integrating GBV interventions with MGLSD, OPM, and KCCA**, supported by funding and technical assistance. It will also focus on **mainstreaming GBV across sectors** and updating the risk mitigation plan with the necessary training and tools. **Investing in community-driven prevention approaches** like SASA, EMAP, and Girl Shine is crucial, along with **providing comprehensive GBV case management**, including counseling, multi-sectoral services, and strengthened referral pathways, supported by financial resources, trained case workers, and infrastructure.
