Lebanon Contingency Stocks Snapshot

As of 3 March 2026

Contingency stock data are regularly updated on Activity Info by partners to support emergency preparedness, gap identification, and evidence-based advocacy. This snapshot reflects the latest information reported and provides an overview of available contingency stocks across LRP sectors in the Bekaa, Beirut and Mount Lebanon (BML), North, and South regions.[1]

Situation Analysis

Current contingency stocks[2] provide limited coverage against planning assumptions under the worst-case conflict scenario thresholds. The most significant shortages are noted in Education, Food, Protection, and WaSH, supplies. Stocks are concentrated in the South and Bekaa, which are high-risk areas where needs are most significant. Pre-positioned supplies are insufficient in light of recent developments and protracted displacement, especially in the event that access constraints delay replenishment, particularly in high-risk border areas.

Bekaa: High risk of rapid displacement due to proximity to border areas. Existing stocks are being overstretched in mass influx scenarios. Gaps are most notable in Education, Protection, Health, and Food supplies.

Beirut and Mount Lebanon: Absorbing secondary displacement. Partner presence is strong, but collective shelter options are being occupied rapidly, which may constrain rapid scale-up. Supply gaps are most notable in Protection, Food, and Education.

North: High vulnerability and infrastructure fragility increase challenges. Current stocks are insufficient for Protection, Nutrition, Food, and Education, particularly in remote areas.

South: Highest-risk area under current escalation scenarios. Available stocks do not meet needs in case of widespread displacement or infrastructure damage. Access and warehousing constraints remain key risks. Gaps are most Significant in Health, Food, Shelter, and Education supplies.

Shelter	86,963	77,000	100.00%	149,000	58.36%
Core Relief Items	224,606	420,000	53.48%	455,000	49.36%
WaSH	704,419	6,141,832	11.47%	4,452,300	15.82%

[1]Notes:
- Figures reflect partner-reported contingency stock units as of 13 February 2026 and represent a point-in-time snapshot.
- Units may refer to kits or individual items/materials, depending on sector definitions and standards.
- Minimum contingency targets are defined by sectors and may vary in scope and methodology.
- Percentages indicate coverage against sector-defined minimum targets and should be interpreted for strategic planning purposes only.
- Detailed item-level information is available in the sector technical reports linked to this snapshot.

*Current Threshold: Based on 2026 LRP, covering only limited contingencies within the following:
- Potential influx of up to additional 100,000 newcomers from Syria; and
- New displacement of up to 100,000 Internally Displaced Persons (IDPs) as a contingency threshold.

**Above Current Threshold (i.e., up to 1,000,000 displaced people) for the first 2–4 weeks following the onset of large-scale displacement.

[2]Contingency Stock Units include, but are not limited to:
- Education: Kits (ECD, educational, recreational)
- Food Security and Agriculture: Food Parcels & Hot Meals
- Health: Kits (first aid, surgical, rape, STDs), Masks, Gloves
- Nutrition: Feeding Packs, Nutrients/Supplements, ECD Kits
- Protection: Kits (dignity & recreational) & Assistive Devices
- Shelter: Kits (fire & flood), Plastic Sheets, Plywood, Timber
- CRIs: Mats, Pillows, Blankets, Clothes, Heaters, Solar Lamps
- WaSH: Kits (hygine, drainage, disinfection), Dewatering Pump, Water Filter, Emergency Latrines
