Trends of displacement drivers in Q2

In Thousands | Source: PSMN

The displacement patterns recorded in Q2 2026 reveal a profound shift in Somalia's humanitarian landscape. Unlike previous years, when flooding was the predominant driver of displacement, the crisis has evolved into a conflict- and drought-driven emergency, with these two hazards accounting for nearly 90 per cent of all recorded displacement.

This reflects the growing interaction between insecurity, climatic shocks and livelihood deterioration across the country.

Refugee and Asylum-Seekers

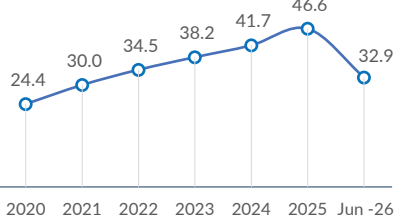

32,966

Total Refugees and Asylum-seekers

14,026 refugees | 18,940 asylum-seekers (57%)

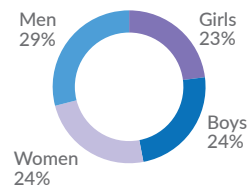

Total refugee population trend

In Thousands

The observed reduction in the refugee and asylum-seeker population in 2026 is attributed to the deactivation of 'no-show' cases identified during the 2025 verification exercise.
