SITUATION UPDATE

Pakistan has generously hosted millions of Afghans for over four decades. By the end of 2025, Pakistan continued to host over 2.8 million Afghans, with approximately 70 per cent of refugees residing outside refugee villages. As most Afghan refugees and other Afghan nationals in Pakistan live in urban and peri-urban areas alongside host communities, the response plan targeted 3 million Afghan refugees and other Afghan populations, as well as 1.5 million host community members.

Recognizing the continued presence of Afghan refugees and other Afghan nationals in Pakistan, the 2025 Regional Refugee Response Plan (RRP), developed through inter-agency consultations and engagement with the Government of Pakistan, sought to preserve protection space, strengthen self-reliance, and support host communities.

In 2025, the implementation of the Government's Illegal Foreigners Repatriation Plan (IFRP), including its expansion to Proof of Registration (PoR) card holders, significantly altered the operational landscape in Pakistan. As returns increased and protection risks intensified, humanitarian partners adapted their response by prioritizing protection and life-saving assistance for the most vulnerable Afghan refugees and Afghan of other status while reducing some longer-term livelihoods and resilience activities.

Despite these challenges, RRP partners continued to deliver a coordinated, multi-sectoral response across sectors. The response remained flexible, bridging humanitarian and development assistance while addressing evolving operational and protection needs.
