# December 2014 Explanatory Notes

This Indicator Report provides a monthly snapshot of the regional response to the South Sudan Situation. The indicators included report on the Post 15 December 2013 South Sudan caseload only. The report is prepared through collaboration with the reporting country and the Regional Support Hub, Nairobi.

The notes below provide further contextual information on various sector indicators. Please note that Kampala is an urban area where refugees are not directly supported by UNHCR and its partners, so many of the indicators are not applicable to Kampala.

## **GBV**

GBV reporting among the South Sudanese population remains low with activities to increase sensitization and reporting ongoing across all hosting areas.

## **WASH**

Figures are based on UNHCR's Water Monitoring System. As Uganda moves out of the initial emergency phase water yield is being monitored at every individual hand pump rather than taking an average to increase accuracy. Water availability is calculated based on population figures of registered refugees in the settlements.

## **NUTRITION**

The methodology used to calculate Acute Malnutrition prevalence in Uganda is MUAC. Currently only new arrivals are being screened and numbers of these are decreasing. A comprehensive nutrition survey is expected to be released later in December which will provide more complete nutritional data. In November, the following number of children were screened upon arrival:

- Adjumani - 197
- Arua - 129
- Kiryandongo - 113

## **EDUCATION**

The school age population in Uganda is as follows:

- Pre-primary: 3 - 5 years
- Primary: 6 - 12 years
- Secondary: 13 - 17 years

In Uganda primary education in public institutions is free of charge while fees are paid for secondary education. Schools in Uganda are currently on Christmas vacations until 6th February 2015 so indicators for December remain the same as November.

## **SHELTER / SITE**

Uganda does not report on average dwelling floor size per person as the refugees build their own dwelling of various sizes on their own plot. Uganda reports on plot area per person rather than camp area as the refugees live in settlements and not camps.

## **ACCESS TO ENERGY**

The Uganda operation is not currently funded to distribute domestic fuel to households.
