Priority Needs

- Food — 37%
- Shelter — 29%
- Protection from conflict — 16%
- Livelihood support — 14%
- Transport — 4%
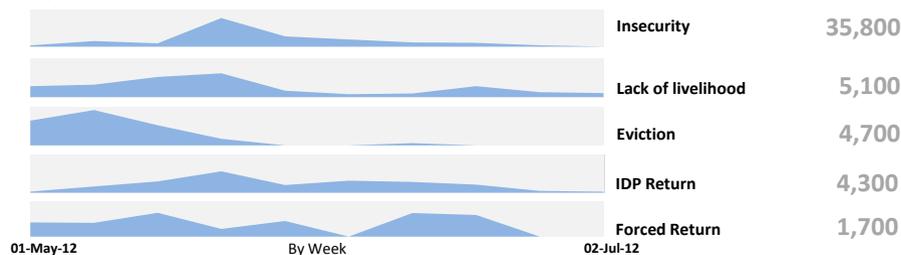

This data has been collected through the Population Movement Tracking (PMT) system. PMT is designed to capture population movement trends, not cumulative population data. Due to the fluid nature of displacement in Somalia and in order to avoid capturing multiple displacements, UNHCR limits the reporting range to a periodf three months - these figures should therefore not be added and used cumulatively.

* Please note figures have been rounded using a three tier method as follows. Figures below 100 were not rounded at all. Figures between 100 and 1,000 were rounded off to the nearest tenth, figures between 1,000 and 10,000 were rounded off to the nearest hundreth and all figures above 10,000 were rounded to a thousandth.This rounding rule was applied to the final result after all computations were undertaken.
