

Summary of the April May seeds and tools distribution Operation - 5 may 2014 -

WFP - In April, 83% of deliveries from Bangui were sent to the provinces. WFP is also setting up staging areas and deploying mobile storage capacity; two were deployed to Ndélé and Bria in April.

FAO - More than 67% of the seeds and tools have been delivered within the country and are being positioned in the affected areas for distribution. As planned, distribution started the third week of April and 3 500 households have already received assistance. Due to a severe increase in insecurity in FAO's partners distribution areas, delivery will last until end of May.

- **Seeds delivered:** 70 % of procured seeds have been delivered in FAO Hubs in CAR ; the remaining quantities will be transported to the border in the forthcoming week.
- **Households assisted:** distribution started in Bozoum and Bossangoa one week ago with 2 NGOs (CORDAID and CRS). Delivery will accelerate as additional NGOs will also start distributions next week.

FAO	HHs	Seeds (MT)	Tools
Cluster Objective	250 000		
FAO Objective	150 000		
Funded for Agriculture Season	76 000	1 797	150 000
Delivered FAO	48 160	1 236	110 000
Distributed FAO	8 300	207	16 560
WFP Seeds protection			
Beneficiaries Reached			200 000
Delivered WFP			3 844 (MT)
Distributed WFP			2 280 (MT)

Constraints

This week a number of attacks by armed groups targeted UN and NGOs vehicles and staff. The deteriorating security situation impacts heavily on the speed of transportation of inputs to FAO's distribution hubs as well as on partners' distributions in general;

- Armed groups attacked 2 convoys of FAO's partners (CORDAID and PU-AMI). As a result of the attacks, three contractors' drivers were killed on the road from Bangui to Sibut on 1st May and several tons of seeds were looted;
- Localized heavy rains and deteriorated roads delay convoys;

Conclusion

- Corrective actions are taken including the local procurement of quality seeds (Paoua, Kaga Bandoro and Bambari) to avoid delays. Convoys on risky axes are being closely monitored and coordinated with MISCA and other UN and partner organizations.
- Distribution is expected to be completed in time for the planting season.

Préfecture	Partner	Families	Distribution starting date
Lobaye	COOPI	1,500	12-May
Lobaye	Tearfund	1,000	19-May

FAO and WFP joint planning for seeds and tools distribution and seed protection

WFP, FAO and implementing partners are jointly assisting vulnerable population to optimize seeds and tools distribution and avoid seed consumption where needed.

NGOs partners: Acted, Caritas, Coheb, Coopi, Cordaid, CRS, DRC, IRC, PU-AMI, Solidarités, Tearfund, Triangle, World Vision

The difference in the number of households between the two maps is because firstly partnerships are being finalization in some prefectures and secondly some areas do not require seeds protection.

CAR: Implementing partners (April 2014)

The boundaries and names shown and the designations used on this map do not imply official endorsement or acceptance by the United Nations. Final boundary between the Republic of Sudan and the Republic of South Sudan has not yet been determined. Final status of the Abyei area is not yet determined.
