

# EQUITY IN HUMANITARIAN ACTION

## REACHING THE MOST VULNERABLE LOCALITIES IN LEBANON

### OCTOBER 2013

Calculation of the Most Vulnerable Localities was based on the following data sources

1- Cadastral Boundary Shapefile which includes the 3rd admin level population distribution  
The source of the shapefile is the CDR (Council for Development and reconstruction).

2- UNDP study of 2008. It states that 28.55% of the Lebanese population is estimated to be living under 4USD/capita/day based on data collected in 2004. The poverty estimates from this study gives break down on “combined Caza” level (admin level 2), this is assumed to be the same for all the municipalities under the caza boundries

3- The refugee population distribution. This data is frequently updated by UNHCR registration unit

The top quintile of the vulnerability mapping includes 225 localities.

Republic of Lebanon

The boundaries, names and designations used on this map do not imply official endorsement of UNICEF or the United Nations. All data used are the best available at the time of map production.

- Mohafaza, Caza and Cadastral/Localities Boundaries, Rivers, Roads, Flood Risk: NPMPLT, CDR 2005  
(National Plan and Map of Rivers, Roads and Flood Risk)

(National Physical Master Plan for the Lebanese Territory)
