	<b>11,624</b>	<b>Awaiting</b>

## December-Syrians

### Registration

- 13,400 individuals registered vs. 12,000 in November
- Slight increase mainly due to increased capacity of staff

### Renewal-Verification

- Close to 22,500 individuals verified.
- In 2014, approximately 470,000 individuals have been verified.

### Appointments Requested

- 19,500 appointments requested vs. 14,000 requests in November; an unexpected increase possibly due to the temporary lift in border restrictions for few days.

### Inactivations

- 4,800 individuals inactivated through the five verification methodologies.

## Example from Jordan

**Standard 6: Child protection monitoring - "Objective" and "timely" information on "child protection concerns" is collected in an ethical manner and systematically triggers or informs prevention and response activities.**

What does this mean for Jordan?	What is realistic in practice in Jordan?	Additional key guidance for Jordan (excerpt only)	Verification / Indicators
<p><b>Objective information:</b> refers to "how" the information is being collected, using objective tools and triangulation of information, rather than who collects the information.</p> <p><b>Timely information:</b> can be collected on a monthly basis in camps and host communities for incident reporting; and every 4 months for situation reporting.</p> <p><b>Child protection concerns:</b> will include all types of child protection concerns for incident reporting; and five areas for situation monitoring: child labour, UASC, CAAAG, violence against children and justice for children.</p> <p><b>Note:</b> It is more difficult to carry out assessments in host communities, than in the camp setting. However, more than 75% of the refugees are residing in host communities. There is sensitivity on reporting on topics such the recruitment of children into armed forces and groups, and sexual violence.</p>	<p><b>Priority Actions for Jordan:</b></p> <ul style="list-style-type: none"> <li>- Analyse existing research, assessment, surveillance or other available info;</li> <li>- Agree on the concerns to be monitored, including definitions and indicators;</li> <li>- Engage in coordinated assessments using agreed tools; avoid agency-specific assessments wherever possible;</li> <li>- Define and agree on the roles and responsibilities of the various actors participating in conducting the assessments at CPWG level</li> <li>- For incidents monitoring, work toward harmonization of the different child protection monitoring systems: Government Monitoring System, CPIMS, GBVIMS, Progress and Rais</li> <li>- Develop an information sharing protocol between the different actors to support the harmonisation of the systems</li> <li>- Agree on disaggregating data to age, sex, child protection concerns and location</li> <li>- Prior to any data collection, train data collectors on interviewing skills and techniques and the SOPs</li> </ul>	<p><b>1. Use existing monitoring systems</b> in Jordan (CPIMS and GBV IMS, FPD paper system, national case tracking NCFA, PROGRES, RAIS)</p> <p><b>2. Border Monitoring:</b> Large number of children and families are living on the border between Syria and Jordan. These children - and the child protection risks that they may be facing - are not captured in the assessment, monitoring and response initiatives as humanitarian agencies have limited access to these areas on both sides of the border.</p> <p><b>In country references:</b></p> <ul style="list-style-type: none"> <li>- SOPs pages 79-81</li> <li>- Assessment 2012: Findings from the Inter-Agency Child Protection and Gender-Based Violence</li> <li>- Assessment in the Za'atari Refugee Camp on Gender-based Violence and Child Protection among Syrian refugees in Jordan, with a focus on early marriage</li> <li>- ToR CAAC (Working Group on Children and Armed Conflict for Syria in Jordan</li> <li>- Regional Response Plan for Syria</li> </ul>	<ol style="list-style-type: none"> <li>1. A common situation monitoring framework is in place, including indicators, data collection methods and frequency of data collection by mid-2014</li> <li>2. The information included in the CP monitoring systems are disaggregated by age, sex, child protection concerns and location.</li> <li>3. Inter-agency incidents reporting is carried out on a monthly basis.</li> <li>4. Inter-agency "response monitoring" is carried out on a monthly basis through activity information.</li> <li>5. The members of the CP and GBV sector groups will report every three months on the indicators in the Regional Response Plan (RRP).</li> </ol>
