- Ongoing recruitment for Education, Protection, Health/Nutrition experts for Diffa team.
- Regular joint missions from UNICEF Maradi and Niamey

Sub working groups led by the Government and supported by UNICEF and other partners at regional level:

- WASH sub working group
- Protection sub working group
- Health and Nutrition sub working group
- Education sub working group

SUPPLIES

- 4,204 blankets, 2,081 mosquito nets, 6,094 buckets, 12,200 jerricans, 4,460 tarpaulins, 6,432 plastic mats and one (10,000 L) water bladder have been sent to Diffa region to support people recently displaced from Lake Chad Islands and hosted in Diffa, Nguigmi and Bosso. Items are being distributed by the Regional Committee for emergency response in Diffa.
- On the 14<sup>th</sup> of April, 2,545 boxes of RUTF and essential drugs were prepositioned in Diffa to cover the needs of an additional 3,822 children suffering from SAM and to complete MAM treatment for 4,400 children. UNICEF is collaborating with Save the Children.
- During the month of April, essential medicines for the treatment of diarrhea, malaria and respiratory infections were positioned in 32 health centres in Diffa region to cover the needs of 102,000 children and pregnant women, in collaboration with Save the Children and MSF.

### NUTRITION

**8,407**

Children under 5 with severe acute malnutrition (SAM) have been treated in Diffa in 2015 (30<sup>th</sup> of April).

**430**

Children with severe acute malnutrition (SAM) with complications treated in inpatient facilities in 2015 (30<sup>th</sup> of April).

### CHILD PROTECTION

**4,860**

Children benefitted from psychosocial support through a mobile team in the camps and in host communities (out a total of **9,750** children being targeted). Activities are ongoing.

### HEALTH & HIV/AIDS

**254,664**

Children aged 9 months-14 years have been vaccinated against measles (including 26,762 displaced children) in Diffa region between end of December and 3<sup>rd</sup> of May 2015

**102,037**

Children under 5 and pregnant women access primary health care at health center level thanks to prepositioning of medicines at health center level.

### WASH

**13,215**

Households reached by UNICEF partners with cholera sensitization and distribution of water purification tabs (host and displaced communities) on a total of **13,575** targeted by Save the Children and IEDA.

**1,600**

People with access to latrines in Sayam Forage camp and Gagamari site

### EDUCATION

**14**

Semi permanent classrooms in the process of being established to strengthen the capacities of **10** schools integrating **3,017** displaced children and children from host communities

**68**

Schools-in-a-box used to ensure quality education for **2,720** displaced children and children from host communities at primary level (October 2014)

## UNICEF response

- UNICEF is supporting the installation of Sayam Forage refugee camp, hosting over 1,200 refugees, by providing squatting plates, water bladders, NFIs and recreational and ECD kits to UNHCR to ensure access to water and sanitation and support safe spaces for children as part of child protection.
- In May 2015, the government relocated 42,887 people living in Chad Islands. Among them, 15,482 have been transported to the Nigeria border by the government in coordination with the Nigerian authorities, while 27,405 have been relocated in 3 temporary sites where the government and its partners are providing assistance (including NFIs provided by UNICEF). The national refugee commission is planning to register the displaced people hosted in the 3 temporary sites before sensitizing them to move to the refugee and IDPs camps. In parallel, UNICEF continues to support displaced people and host communities outside the camps and temporary sites.
- With UNICEF, COOPI has installed psychosocial support units in the transit sites Gagamari, Chetimari, Kablewa, and the Sayam Forage refugee camp, and temporary sites Nguigmi and Kimégama. As of 15<sup>th</sup> of May, COOPI reached 4,860 children among a targeted 9,750 children. UNICEF is also working on the implementation of a Child Protection Monitoring system in Diffa in collaboration with partners.
- UNICEF organized a measles vaccination campaign which started on April 27 and ran until the May 3 to target 193,000 children 9 months to 14 years old in the two health districts (Maine Soroa and N'Guigmi) not covered by the previous measles vaccination campaign (in December/January 2015). As of early May 2015, 254,664 children have been vaccinated against measles in Diffa region through the 2 campaigns.
- UNICEF implementing partners in Diffa, IEDA Relief and Save the Children, began their programme of cholera prevention and response in October 2014 (563 cholera cases have been registered in Diffa from October 2014 to February 2015). Since mid-February, thanks to joint efforts, no cholera cases have been registered.
- To ensure access to quality primary education for displaced communities, UNICEF in collaboration with COOPI identified 10 schools that are integrating displaced children. UNICEF is strengthening their capacities by building 14 additional classrooms, training teachers, and providing additional educational supplies for teachers and children. UNICEF is planning to support an additional school in Sayam Forage where 5 additional classrooms will be built.
- CERF funding (1,995,000 USD) has been received and planned activities are being implemented. Preliminary results are not yet available.
