Updates on Rwanda's newest camp: Mugombwa camp

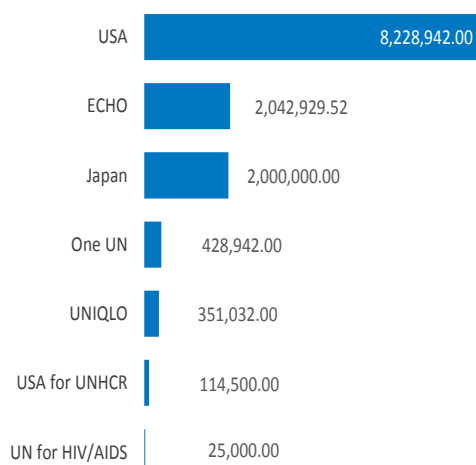

WASH issues in Mugombwa camp:

- 130 drop holes have been shut down and not emptied due to lack of funds, leaving the camp with only 160 drop holes for the current population of 6,851 individuals, or 43 persons per drop hole—beyond double the humanitarian standard. This will impact negatively on the newly installed dischargeable latrines, which will be overused, presenting a risk of disease outbreak in the camp.
