

By the end of June 2017, over 1.2 million primary health care consultations were provided, representing over 33 per cent of the 2017 overall target, and over 88,000 were referred to secondary or tertiary health care. Furthermore, 496,000 children have been immunized and 26,000 health care staff have been trained.

In Jordan, as part of support to FP, ANC and anemia prevention activities, 3RP partners has offered Depo-Provera injectable family planning method and Ferro folate tablets for sector partners use during 2017. In Lebanon, Health Sector partners led the development and finalization of the Child Survival "THRIVE" programme, which was preceded with a series of consultations with non-governmental partners on the three pillars of the initiative, including national framework and knowledge management; service access and quality; as well as trust, knowledge and community participation. Furthermore, in Lebanon the regular delivery of services and outreach to Syrian refugees remains a challenge due to the mobility of Syrian refugees and continuous evictions of displaced people.

Note: These dashboards reflect selected aggregate achievements of 3RP partners involved in the 3RP Interagency response in Egypt, Iraq, Jordan, Lebanon and Turkey. Progress and targets may change in line with data revisions. All data on this dashboard is current as at 30 June 2017.
