FACT SHEET - FAMILY COUNTING

OVERVIEW

Family counting exercise was launched on 4 October 2017 with the support of UNHCR. A joint team of over 100 staff is collecting information on newly arrived refugee families and issuing them a card delivered by Bangladeshi authorities with a unique identifier number. The family counting helps to identify vulnerabilities and specific needs among the refugee population and to harmonize assistance. It will also be a useful baseline data for site planning, for instance on density per locations.
