1. DEMOGRAPHIC AND SOCIAL PROFILE

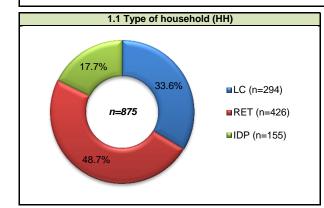

NB: Figures and values in the profile only represent the population surveyed in household survey, not the total Afghanistan population, unless stated otherwise.

Summary

Of the 875 households surveyed in South & South-eastern region, 294 (33.6%) were local community households, 426 (48.7%) were returnee households and 155 (17.7%) were IDP households. The households encompass a combined total of 8,974 individuals with a gender ratio of 1.1 male for each female.

The average household size was revealed by the survey to be 11.1 of the local community, 9.2 persons among returnees and 11.6 persons among IDPs. Children (0-17 years) account for over half the average household size across all three groups with a gender ratio of 1.0 boys for each girl.

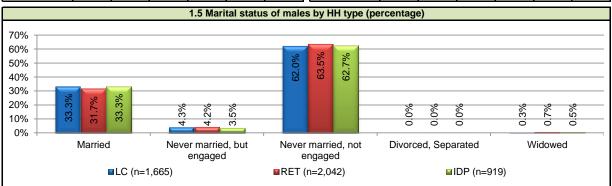

The elderly (aged 60+) were found to constitute 3%-5% of the population across all three household types. Approximately 2% of the population reported to be widowed, with five times as many widows as widowers.

2. MIGRATION PROFILE

Summary

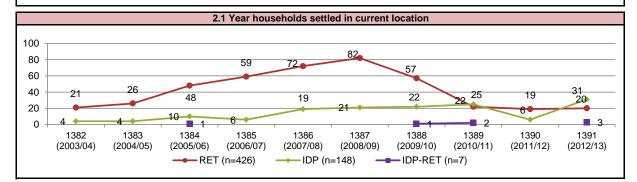

Among the households surveyed, the year 1387 (2008/09) witnessed the largest number of returnee arrivals in south and south-eastern regions with 82 returnee households choosing to settle in two different HRAs. Also, the year 1391 (2012/13) witnessed the largest number of IDP arrivals with 31 IDP households choosing to settle in different HRAs. After 1387 (2008/09), on average, approximately 30 returnee households per year have chosen to settle in the area. Prior to 1391 (2012/13), an average 13 IDP households per year have chosen to settle in south and south-eastern region.

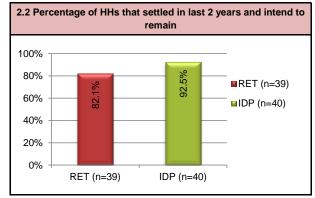

Of returnee and IDP households that have settled in Afghanistan in the last two years, 94.9% of returnee and all of IDP households stated that they did so voluntarily. Of these, 82.1% of returnee and 92.5% of IDP households stated that they intend to remain in the area.

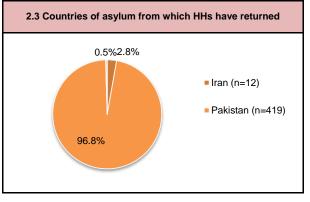

All returnee households had sought asylum in either Pakistan (96.7%) or Iran (2.8%) with 91.5% stating that they did so due to safety reasons due to conflict. Over four-fifths also cited economic reasons and over two-thirds cited harassment/discrimination reasons. A further, one-fifth of returnee households stated that they sought asylum due to family reasons.

Among IDP households, over four-fifths cited economic reasons and two-thirds stated safety reasons due to conflict as the main reasons for having fled their districts of origin. Three-fifths also cited access to services as having influenced their decision to move. A further, one-third stated that they have fled their districts of origin because of family reasons.

Three-quarters of households stated that economic reasons were the main reason of returning back to Afghanistan. Further, two-thirds stated legal difficulty reasons as having influenced their decision to return. Two-fifths said Afghanistan is their place of origin so they returned. One-third also stated that they have returned back to Afghanistan because of safety reasons.

3. HOUSING STATUS PROFILE

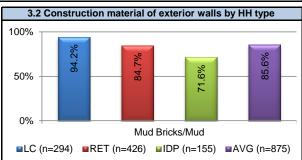

Summary

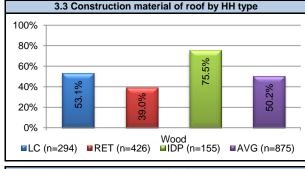

Survey findings reveal that three-fifths of both local community and returnee households and two-fifths of IDP households live in single family houses. A vast majority of the remaining households live part of a shared house and shared apartment. A further 0.7% of local community households, 6.6% of returnee households and 1.9% of IDP households live in tent. A vast majority across the three household types were mud-brick or mud constructions. Similarly, most of the roofs were reported to be wood constructions.

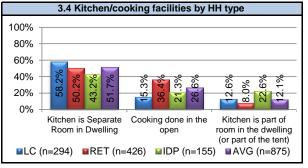

Among local community households 27.2% are living in three-room dwellings, 22.1% live in four-room dwellings. A further 17.3% of local community households live in two-room dwellings. Among both returnee (27.0%) and IDP households (22.7%), two-room dwellings are the most common type of dwellings. Also 24.2% of returnee households and 20.1% of IDP households live in three-room dwellings. A high percentage of families of IDP households are reported to be living in four-room dwellings (21.4%) and five-room dwellings (14.9%).

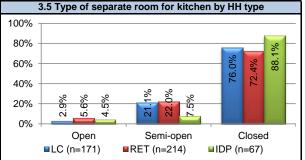

With the regard to cooking facilities, a vast majority among local community households (58.2%), returnee households (50.2%) and IDP households (43.2%) have a separate room for kitchen in their dwellings. With 15.3% of local community households and 36.4% of returnee households doing cooking in the open area, makes it second most common in these two household types while for IDP households (22.6%) kitchen as part of the room in the dwelling is the second most common.

4. WATER, ELECTRICITY, FUEL AND SANITATION

Summary

Water: Hand pump is the main source of water for 61.6% of local community households, 55.4% of returnee households and 58.7% of IDP households and it is located on average 3 minutes away from local community, 9 minutes from returnee households and 10 minutes away from IDP households. Proportionally more returnee households (18.5%) have access to open body of water compared to local community households (10.2%) and IDP households (3.9%). This source is 18 minutes away from returnee households and 14 minutes away from IDP households. On the other hand, more IDP households (24.5%) have access to bored wells than 9.2% of local community households and 8.2% of returnee households. Also 13.6% of local community and 12.4% of returnee households have access to open well water source which is much more than IDP households (1.9%).

Electricity: Of the 875 households surveyed, a total of 741 (84.7%) reported to have had access to an electricity supply in the 30 days prior to being surveyed. Solar power was the most important source of electricity among 54.0% of local community households and 92.1% of IDP households but among returnee households (55.1%) electric grid was the most common electricity source. Electric grid also provides electricity for 44.1% of local community and 4.7% of IDP households. Proportionally, more returnee households (5.4%) have access to battery than IDP households (0.8%) and local community households (1.1%). Less than 1% of all three household types use government generator for electricity.

Fuel: During the winter months, firewood is the main source of heating among 52.7% of local community households and 85.8% of IDP households but Bushes, twigs/branches and straw is the main source among returnee households (43.4%). Bushes, twigs/branches and straw also heat the homes of 35.0% of local community households and 8.4% of returnee. Proportionally, less IDP households (3.2%) use animal dung for heating than local community households (6.5%) and returnee (7.5%). A further, 3.7% of local community, 4.7% of returnee and 1.3% of IDP households didn't have any heating at home.

The main source of cooking fuel in past 30 days for local community (46.3%), returnee (37.6%) and IDP households (67.7%) is firewood. Bushes, twigs/branches and straws is the second most common source of cooking among local community households (31.0%), returnee households (30.3%) and IDP households (15.5%). Proportionally more returnee households (27.0%) use gas for cooking than 13.9% of local community households and 12.3% of IDP households. Moreover, less than 8% of all three household types use animal dung for cooking.

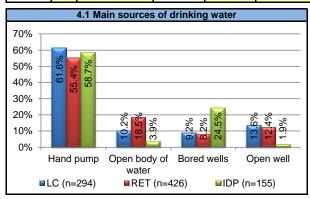

Sanitation: 82.3% of local community, 70.1% of returnee households and 77.4% of IDP households have access to a traditional covered latrine. Proportionally more returnee households (22.1%) use open pit latrines more than local community (11.6%) and IDP households (14.2%). Small percentages of families are using open field, bush or sahrahi and flush latrine also.

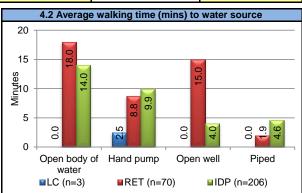

Surveyors took note of whether any garbage or pools of stagnant water were observed in close proximity to the households they interviewed. 32.7% of local community households, 33.9% of returnee households and 29.7% of IDP households didn't have any garbage near their dwellings. A further, 62.2% of local community households, 59.5% of returnee households and 67.1% of IDP households had little garbage near their dwellings. Approximately less than 7% of all three households had a lot of garbage near to their dwellings. Also, 63.6% of local community, 74.1% of returnee and 76.1% of IDP households didn't have any stagnant water near their dwellings. In addition, 34.7% of local community households, 24.5% of returnee households and 23.2% of IDP households had little stagnant water near their dwellings. Approximately less than 2% of all three household types had a lot of stagnant water near their dwellings.

6. HOUSEHOLD INCOME, DEBT, ASSETS AND EXPENDITURES

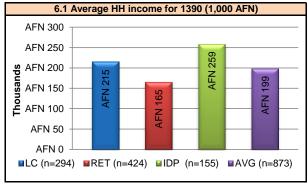

Summary

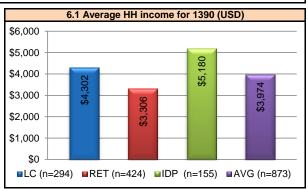

Income: Average household income in 1390 was USD 4,302 among local community households, USD 3,306 among returnee households and USD 5,180 among IDP households. Wage labour was the primary source of income for 40.6% of IDP households, 53.1% of returnee households and 38.4% of local community households. Day labour was also a significant income source for 8.5% of returnee households, 17.3% of local community households and 14.7% of IDP households. Remaining households all relied upon trade, agriculture and government services in varying proportions.

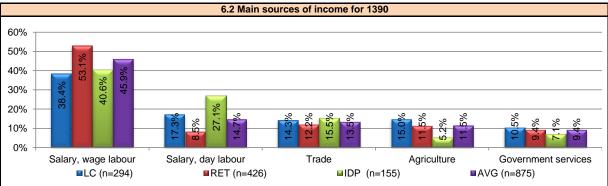

Average household debt was revealed to be USD 4,108 among IDP households, USD 3,947 among local community households and USD 2,735 among returnee households.

Expenditure: Average household expenditure in the month prior to being surveyed was USD 231 among local community households, USD 199 among returnee households and USD 225 among IDP households. A marginally larger proportion of monthly expenditure was spent on food supplies among local community households (60.3), returnee households (59.9%) and IDP households (63.6%).

Assets: With regard to ownership of key household assets, 73.8% of local community households, 71.9% of returnee households and 89.7% of IDP households own a stove/gas balloon. A mobile telephone is owned by 89.8% of local community households, 93.2% of returnee households and 97.4% of IDP households. A radio was owned by IDP households (85.8%), returnee (73.1%) and local community households (79.3%). Proportionally less IDP households (32.9%) own bicycle compared to local community households (47.3%) and returnee households (44.1%). Similarly, less IDP households (26.5%) own motorcycle in comparison with local community households (43.2%) and returnee households (40.8%). Approximately one-quarter of all three household types own TV and car.

9. EDUCATION PROFILE

Summary

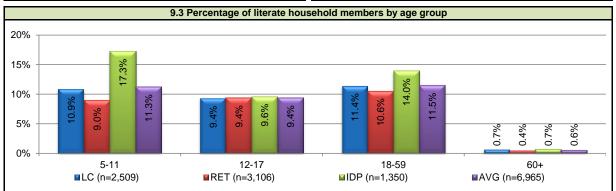

Among those aged five years and over, 32.4% of the local community, 29.4% of returnees and 41.6% of IDPs reported to be literate. Of these, 51.6% of local community males, 44.9% of returnee males and 59.8% of IDP males reported to be literate. Similarly, 11.0% of local community females, 12.0% of returnee females and 20.4% of IDP females reported to be literate.

Among adults aged eighteen years and over, 93.4% of local community males, 93.0% of returnee males and 86.5% of IDP males did not achieve any school grade approximately all females across all three groups had not achieved any school grade.

Among males aged 6 to 24 years, 55.8% of local community males, 51.0% of returnee males and 59.9% of IDPs males reported to be currently attending school. Among females aged 6 to 24 years, 14.6% of local community females, 16.6% of returnees and 31.6% of IDP females reported to be currently attending school. The main reason for not attending school given by those aged 6 to 24 years across all three groups was because the family did not permit them to. Furthermore, 15.1% of those aged 6 to 24 years across all three groups didn't attend school because there is no school or it is too far. Also 17.2% of local community, 11.5% of returnee and 2.3% of IDP members aged 6 to 24 years didn't attend school because they didn't like school/not learned enough.

10. HEALTH PROFILE

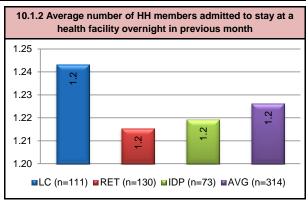

Summary

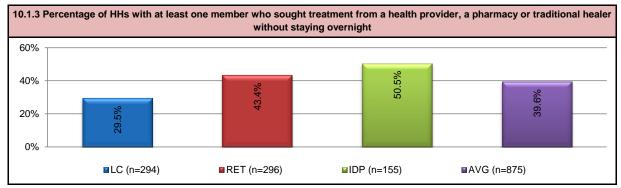

37.8% of local community households, 43.9% of returnee households and 89.0% of IDP households had between one and two household members admitted to a health facility as an inpatient over the course of the previous month. 29.5% of local community, two-fifths (43.4%) of returnee and over two-quarters (50.5%) of IDP households also had at least one member receive care from a health provider, a pharmacy or traditional healer without having to stay overnight. The private health facility was visited most by all three household groups, followed by the Regional Hospital and national hospital. The most common reasons for seeking medical treatment by local community households were infectious diseases (25.5%), digestive problems (16.4%), respiratory problems (14.4%) and psychological problems (7.6%). Similarly, for returnee households the most common reasons were infectious diseases (22.5%), digestive problems (18.3%), and treatment of respiratory problems (16.7%). Among IDP households, the main reasons for seeking medical treatment were infectious diseases (23.2%), digestive problems (15.5%), and respiratory problems (14.8%).

Of the 2,023 females aged 13-49 years that were included in the survey, a total of 353 were reported to be married among local community households (n=157), returnee households (n=150) and IDP households (n=46). Based on this data, the average number of births stands at 4.3 for local community females, 4.1 for returnee females and 3.9 for IDP females. Correspondingly, the average number of infant/child deaths is 0.6 for local community females, 0.7 for returnee females and 0.6 for IDP females. Of the 251 females aged 13-49 years that have given birth, 75.7% of local community females, 77.5% of returnee and 59.1% of IDP females received antenatal care during their last pregnancy with an average of 2.3 antenatal care visits per mother, and 23.3% had the assistance of a midwife during delivery.

With regard to children under the age of five, 65.7% of local community children, 60.6% of returnee children and 52.6% of IDP children have been registered with the civil authorities. Over the course of the previous month, 94.1% of local community under-fives, 91.2% of returnee under-fives and 88.5% of IDP under-fives have received a Vitamin A capsule, and (40%-50%) of children across all three groups have suffered from diarrhea. Furthermore, 42.8% of local community, 46.9% of returnee and 33.3% of IDP children have a persistent cough.
