UNHCR Hotels in islands ⁶	Units	Current places	Current population
Lesvos	11	267	270
Chios	4	117	122

¹UNHCR and Operational Partners.

²Actual capacity is calculated as the subtraction of current places minus 13% which is this week's estimated average natural loss for mainland and 6% for islands. Natural loss is the number of places that cannot currently be used because of damages/repairs, protection issues, family size, etc. The formula applies to all type of accommodation. Actual capacity is a close estimate of available places to be used as reference.

³Occupancy rate is calculated as the percentage of current population over actual capacity.

⁴Agia Eleni facility is included in the UNHCR Buildings section. There are also 61 available places in Agia Eleni facility.

⁵NRC only reports places that are available for immediate occupancy and does not include units that are reserved, under preparation or extra places in occupied units.

⁶The additional 384 places provided by UNHCR in hotels in the islands have been set up as an interim winterization solution.

The actual available capacity is estimated to be at 618 places (mainland: 423 / islands: 195).

As of today 363 places have been reserved for planned transfers. Considering an average natural loss (10-15%) the estimated remaining available places are 212 (mainland: 85 / islands: 127)
