

NARRATIVE

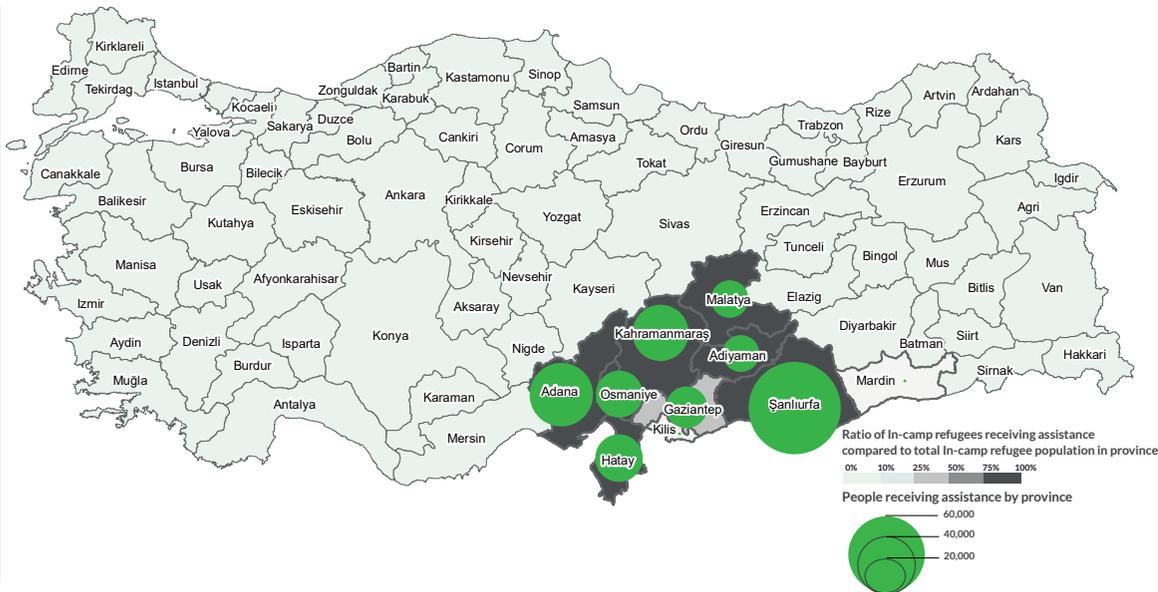

The FSA Sector partners in the period January to June of 2018 continued to address food security needs amongst refugees through various interventions related to food assistance and agriculture livelihoods for both in-camp and those living among host communities.

Targeted food assistance was provided to the most vulnerable Syrian refugee households living in Temporary Accommodation Centers (TACs) and host communities through various modalities. Additionally, some partners implemented small and medium scale agricultural projects such as greenhouses, open field activities, value chain support, agriculture technical training and food processing interventions to enable them secure a sustainable source of income while also promoting social cohesion between the Syrian and Turkish communities. Sector reporting partners continued to be trained in the second quarter with additional trainings focused on agriculture livelihoods programming scheduled for the third quarter.

To avoid any diet-related health and nutrition problems, FSA's partners are increasingly interested in the potential of school gardens. School gardens are cultivated to promote good diet, nutrition education, and the development of agriculture livelihood skills, together with the power to extend this learning beyond the school itself in a variety of ways. This educational focus can be an important long-term contributor to health and food security for both Syrian refugee and host community's students.

Research project/assessment was conducted to identify possible opportunities within the agriculture sector for Syrian refugees and/or vulnerable members of host communities taking into account their seasonality, and explore how these opportunities can be expanded. Publishing of the report is expected by the third quarter of 2018.

COUNTRY COVERAGE

KEY FIGURES

ACHIEVEMENTS

3RP

	Reached / Targeted	% Achieved
Number of Syrian refugees receiving food assistance in Temporary Accommodation Centers (TACs)	144,953 150,000	97%
Number of Syrian refugees receiving food assistance within Host Communities	19,460 35,000	56%
Number of Syrian refugees provided with the inputs, tools and knowledge to establish micro-gardens	14 6,730	0.2%
Number of Syrian refugees benefiting from access to income-generating opportunities through green-house construction and/or management	469 21,350	2%
Number of Syrian refugees benefitting from agriculture-related vocational skills training and/or job placements	132 11,174	1%
Number of actors (individuals) provided with training and technical support to bolster general or sector specific capacities	59 100	59%

REPORTING PARTNERS

Data reflected on this dashboard represents FSA WG achievements for the period January to June 2018 as reported by sector partners. This dashboard does not reflect non-3RP partner inputs and does not account for any overlap.
