

Background and Methodology

In support of the United Nations High Commissioner for Refugees (UNHCR), REACH is conducting monthly assessments in managed sites in Roraima state, in order to assist humanitarian planning and response. These factsheets present an overview of conditions in sites located in Boa Vista and Pacaraima towns in November 2018. A mixed methodology was used to gather information, with primary data collection conducted through direct observations between 29 and 30 of November 2018 as well as 7 Key Informant (KI) interviews conducted with actors working on the sites. Further, secondary data provided by UNHCR KI and the Brazilian Armed Forces were used to analyse selected key indicators. Given the dynamic situation in Boa Vista and Pacaraima, information should only be considered as relevant to the month of assessment using the most updated UNHCR data available as of the end of the month.

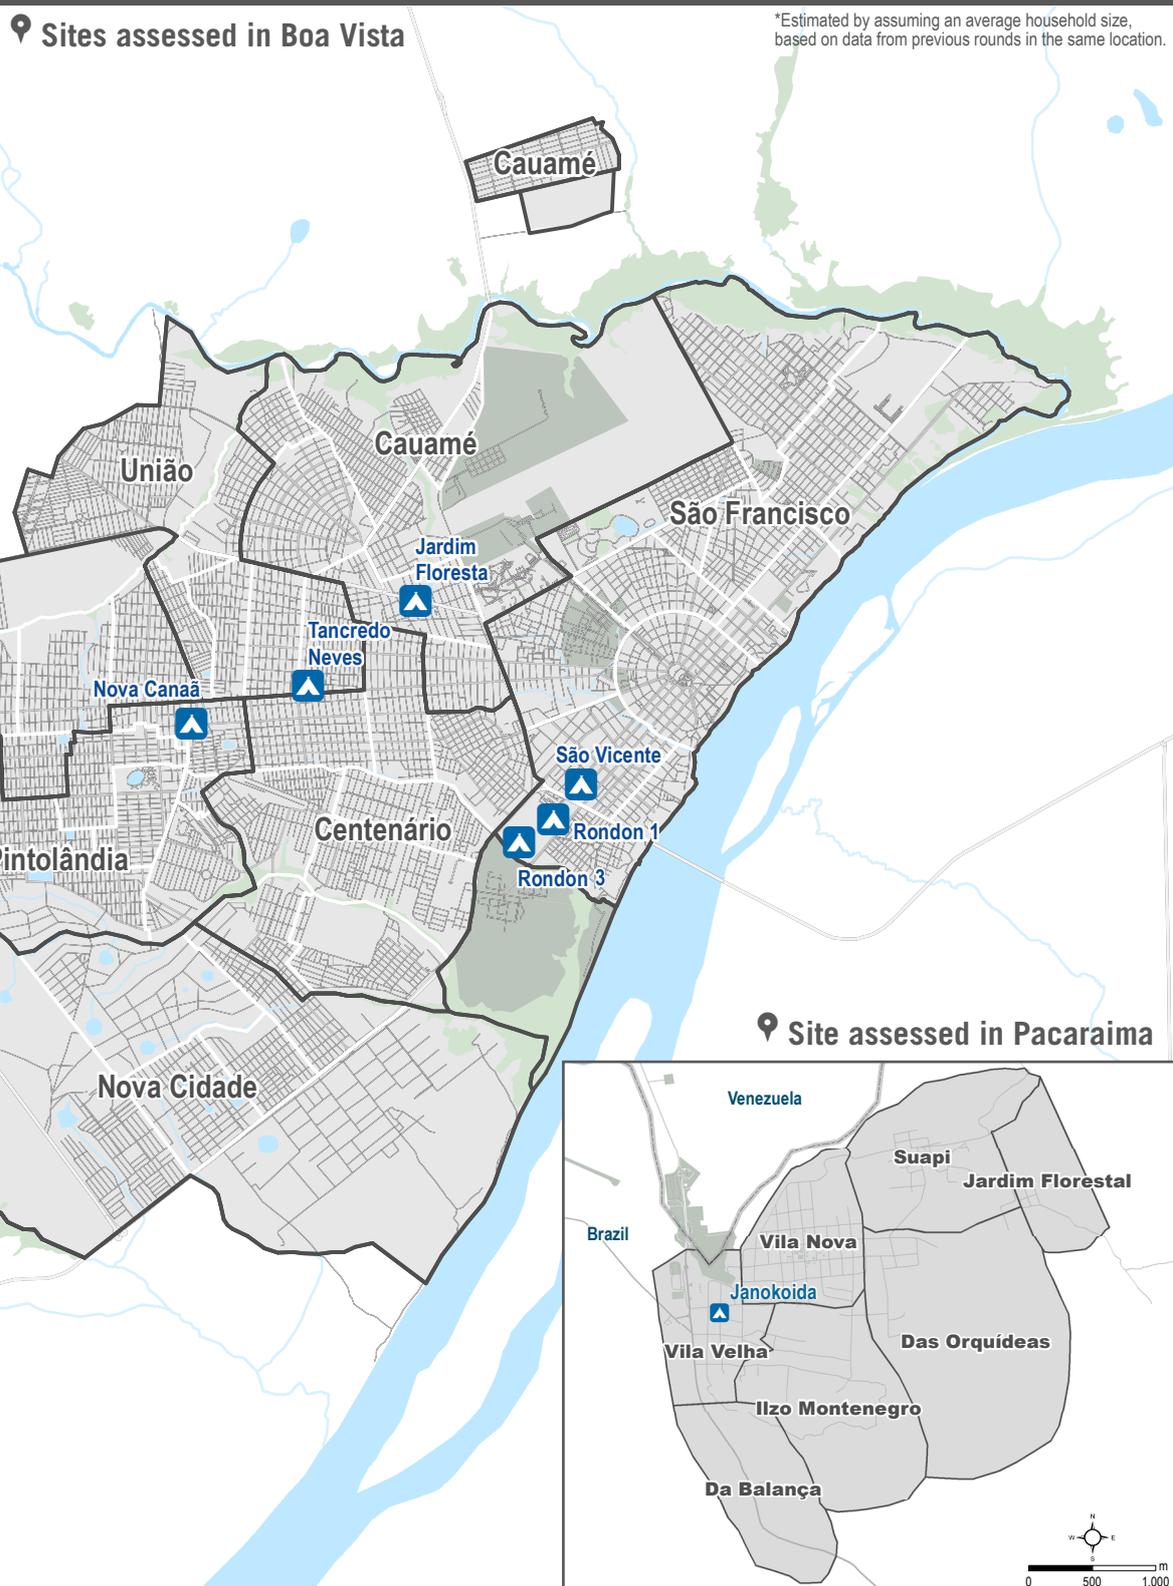

Sites overview

Assessed sites: 7
 # of individuals: 3,119
 Boa Vista: 2,670
 Pacaraima: 449
 # of households: 1,527*
 Avg household size: 3
 Planned capacity: 3,630

Demographics

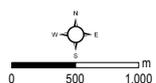

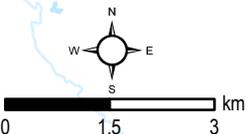

Sites assessed in Boa Vista

*Estimated by assuming an average household size, based on data from previous rounds in the same location.

Site assessed in Pacaraima

Summary

Economic instability and civil unrest have led to the displacement of Venezuelans to neighbouring countries, with more than 96,000 currently living in Brazil. This profile provides an overview of conditions in Janokoida site. Population figures reported are based on registration data provided by UNHCR. Additional information collected through key informant interviews (KIs) with actors working on the site has been used to supplement findings.

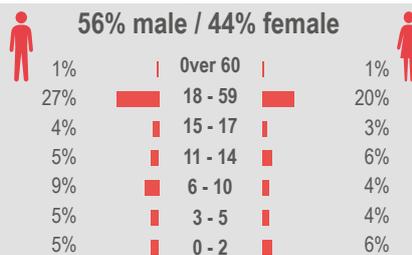

Site overview

of individuals: 449
of households: 156*
Avg household size: 3
Date opened: 02/11/2017
Planned capacity: 224

*Estimated by assuming an average household size, based on data from previous rounds in the same location.

Demographics
