1 Accessibility 2,617 105 May June 3,210 128 3,175 July **Number of** patients 2,627 110 **August** Daily average* During the month *Based on days on which patients attended the clinic

2 Diseases & trends

Diabetes Cardiovascular disease During the month of August 2019, hypertension, diabetes and asthma were the highest reported chronic health conditions with a proportional morbidity of 23%, 17% and 16% respectively. Trend in chronic health conditions varies as a result of clinic accessibility challenges. Management of chronic diseases requires regular periodic visits to monitor diseases and evaluate which accessibility of those morbid diseases to the health care facility.
