

User Guide for ContactHub

ContactHub is an application developed by the Information Management team of the Inter-Agency Coordination unit, in UNHCR, Beirut Office. It is an online system which objectives are to:

- Centralize all mailing lists used within the Inter-Agency in Lebanon through a web-based system that allows greater accountability toward partners.
- Streamline the use of various sector-specific mailing lists by giving sector coordinators control over the mailing list that corresponds to their area of operation and sector of work.
- Give partners and the wider audience interested in the Lebanon response, the option to choose which distribution list they would want to be included in as well as the option to unsubscribe at any time.

Instructions for subscribers:

Everyone who would like to receive regular updates from the Inter-Agency, Lebanon operation – per sector and area – is strongly encouraged to subscribe to the mailing list [here](#).

- The link takes you to the subscription page (see figure 1), where you are requested to fill in your personal contact information. Although you are encouraged to fill in all the required fields, only the full name and email fields are mandatory to complete your subscription.
