- Market, price and food security monitoring update
- Release of IPC data

Pipeline status: Needs Based Plan (100% ration)

CASH PIPELINE

FOOD PIPELINE

Pipeline Status

- Recent confirmation of an important contribution secures 70 percent ration until end of the year
- However, there is a pulses pipeline break (timing/procurement issue): some settlements will receive maize instead of pulses in Nov/Dec distributions
- Outlook for Q1 2021 extremely bleak: further ration reductions likely in new year
 - Even at 70 percent ration, only secured \$5.7m of \$16.6m required for Jan/Feb 2021 distributions
 - Pipeline break expected for all food commodities
- Overall requirements for next six months: USD 40.2 million

Operations update

- **Staggering of distributions continues in West Nile:**

- distributions ended in six settlements on 30th Sept (113,962 households; 642,960 individuals; 4,333 mt; UGX 10,654,160 in CBT; 96% completion rate)
- Imvepi & Palorinya started this week – some initial challenges in pre-positioning for Palorinya due to road conditions

Settlement	Group	Sep 2020	Oct 2020	Nov 2020	Dec 2020
Bidibidi	A	D	-	D	-
Rhino		D	-	D	-
Lobule		D	-	D	-
Adjumani		D	-	D	-
Palabek	B	D	-	S	D
Kiriandongo		D	-	S	D
Imvepi			D	-	D
Palorinya			D	-	D

- **Pre-packaging also continues:**

- Time spent between entry to exit of rub hall reduced from average of 30 mins to under 12 mins
- Daily average of PoCs served has risen from 1,317 per day to 1,532

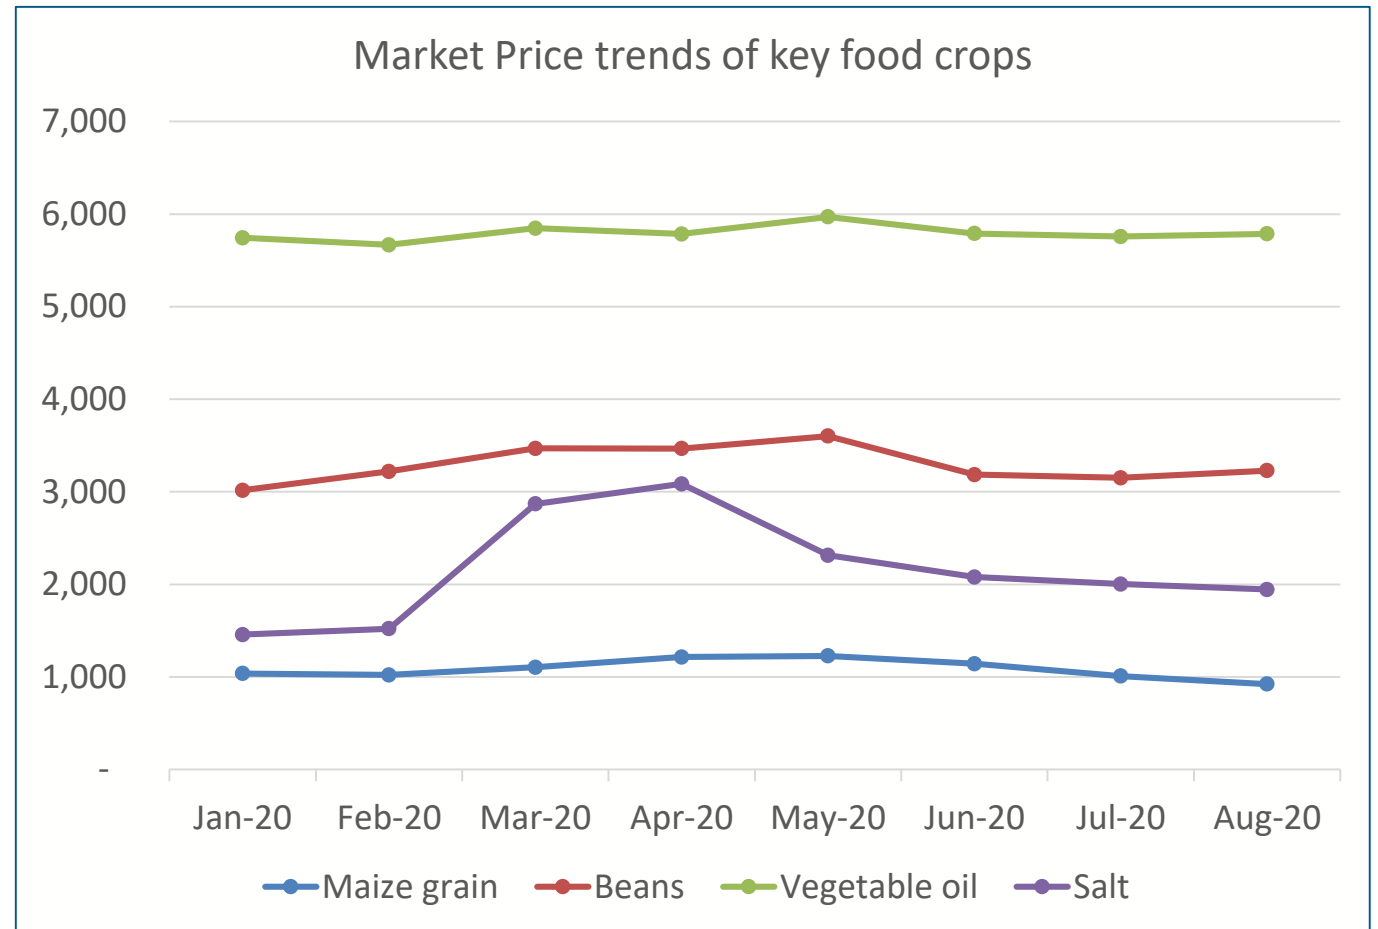

- **Strict ‘No mask, no entry’ rule during distributions, while Infection Prevention & Control (IPC) measures remain in force** - as does ‘**compartmentalization**’ of staff into small teams, incl. driver and specific car

- **9th/10th cycle completed in southwest, cash digitization continues:**

- Agent Banking expansion in Kyaka
- Digital merchant payment adoption in Nakivale & Oruchinga

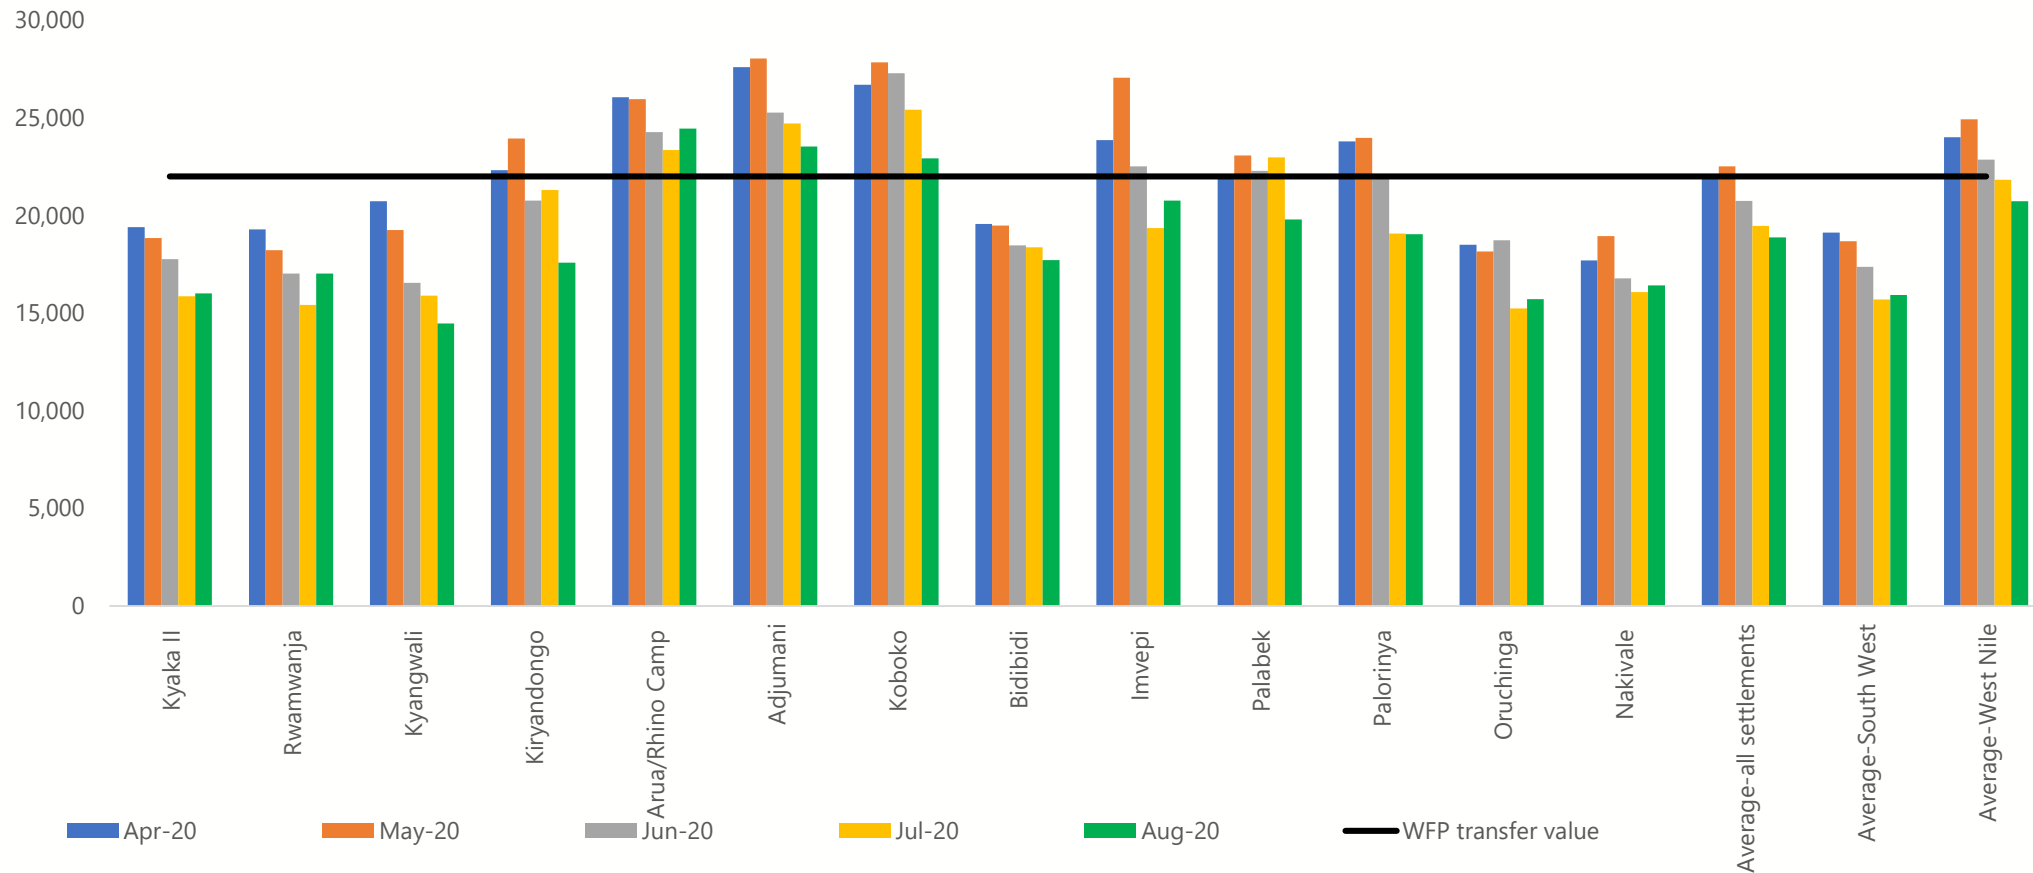

Food Commodity Price Monitoring

- Average maize grain price across all the settlements decreased by 8 percent. The price of maize grain has consistently decreased since May 2020
- The average price of beans increased slightly by 2 percent
- The average monthly prices of vegetable oil remained stable.
- The average price of salt decreased by 3 percent
- Other than beans, prices of crops all lower than Aug 2019 values

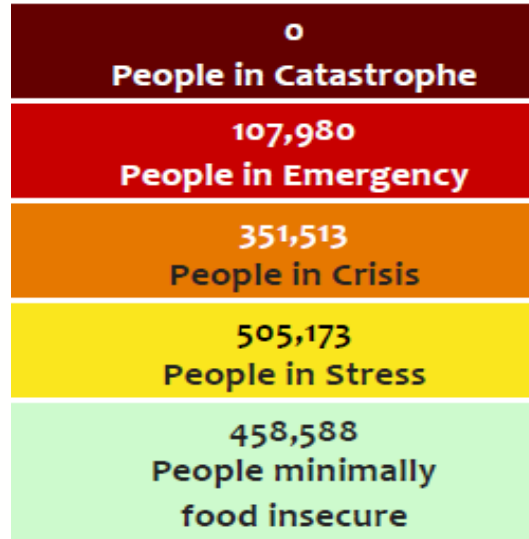

GFA Price Monitoring

- The average market price of the WFP GFA food basket has consistently decreased since May.
- WFP cash transfer value sufficient to cover equivalent in-kind GFA food basket in all settlements except Rhino camp, Adjumani and Lobule.

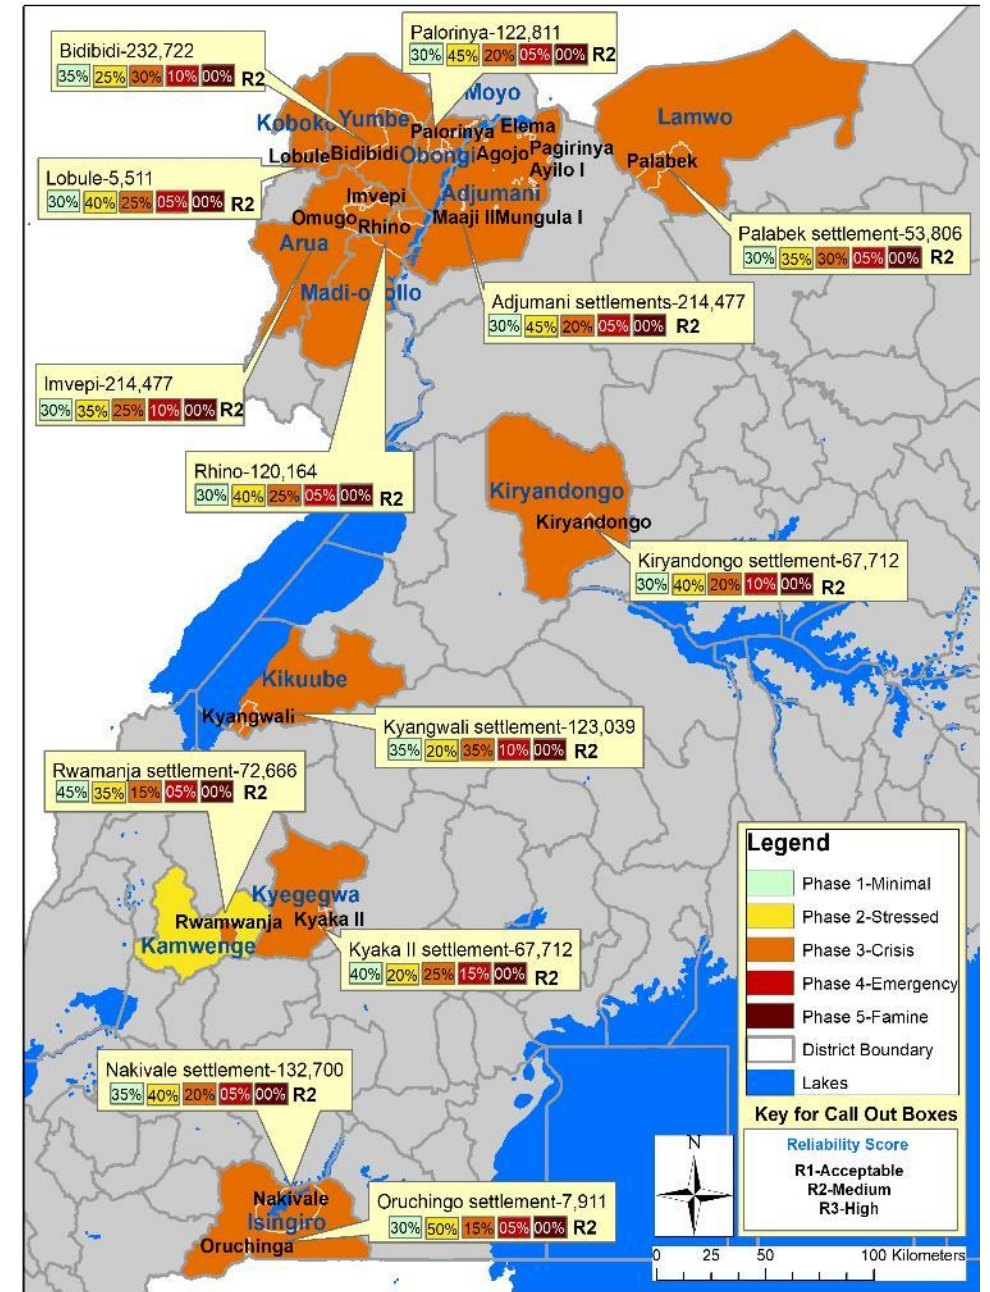

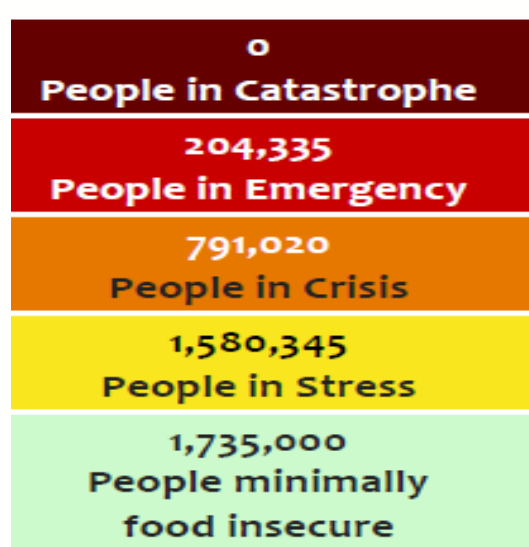

Current Food Security Situation - IPC

Refugee Settlements

Host Communities

Phase Map – Refugee Settlements

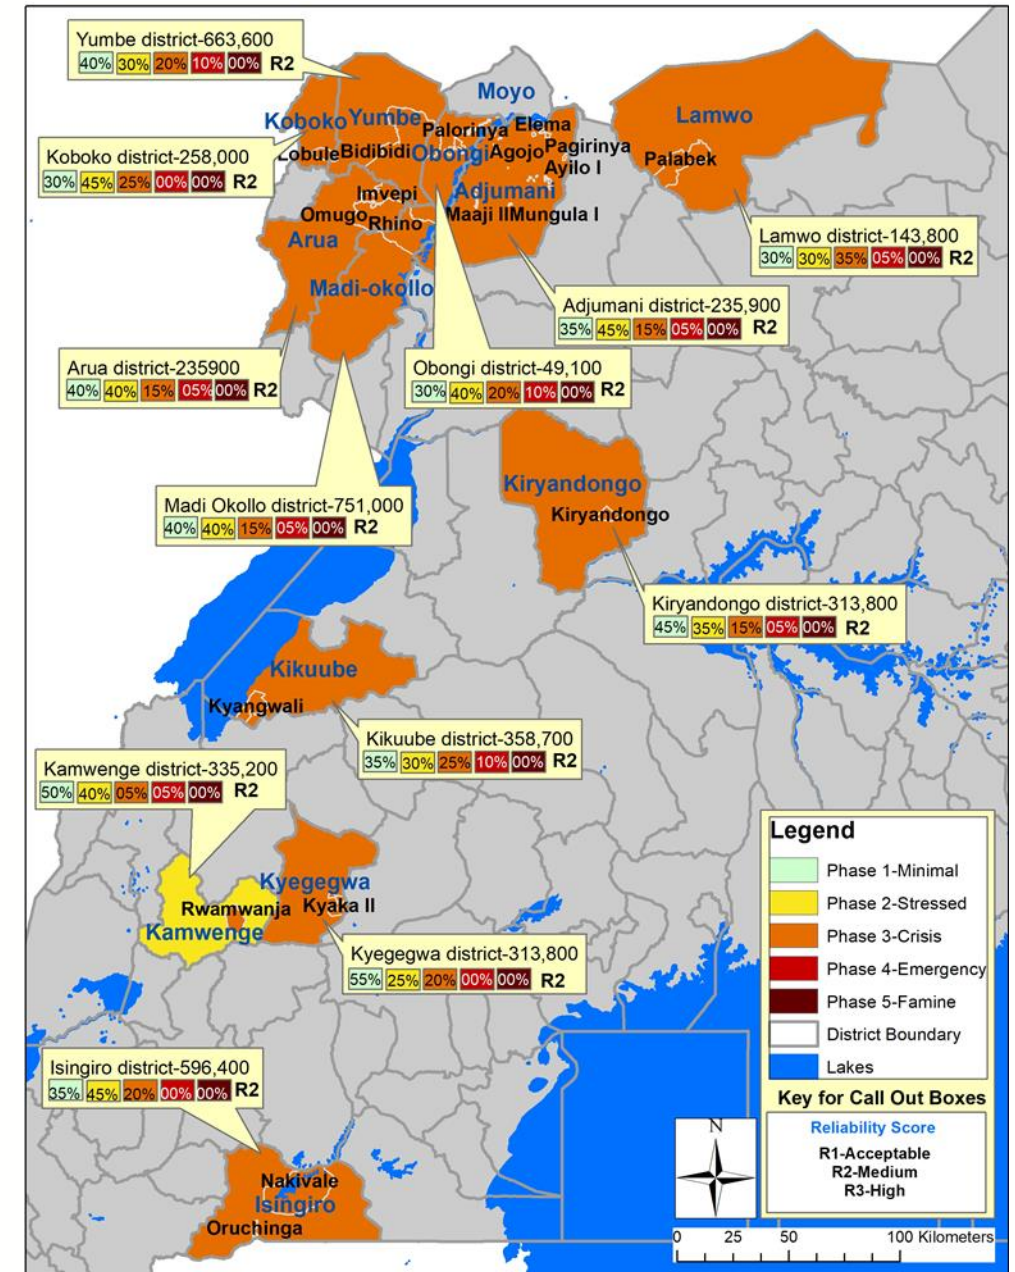

Key Drivers

Refugee Settlements

- COVID 19
- Limited livelihood options
- Closure of weekly auction markets
- Reduction in rations received
- Shocks such as floods, hailstorms, pests and diseases (crop, human & livestock)

Host Communities

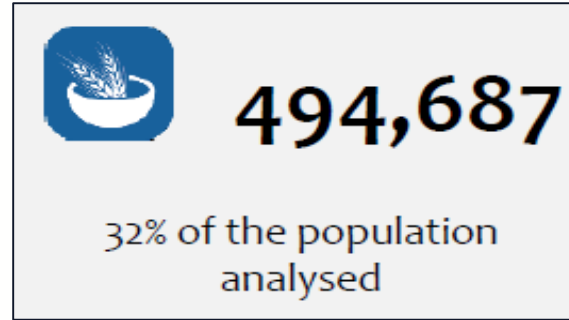

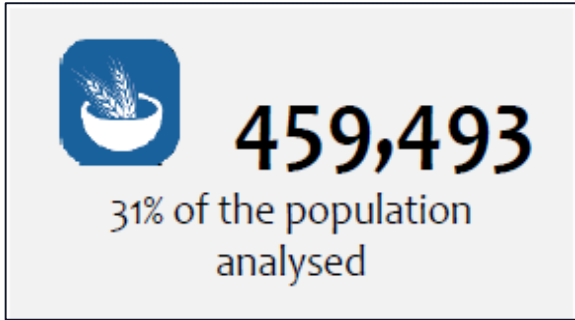

- Poor harvest and post-harvest losses of 2019
- COVID 19
- Above normal rainfall in April 2020
- Price increases, especially in West Nile districts reducing access to food
- Human and livestock diseases
- Poverty and underlying vulnerabilities

Recommendations

Refugee Settlements

- Food and nutrition assistance
- Strengthen social protection systems
- Strengthen and support livelihoods including off farm opportunities
- Enhance access to and functionality of markets
- Strengthen health systems and care to alleviate existing disease burdens
- Support the resilience of livelihoods to shocks

Host Communities

- Food and nutrition assistance
- Strengthen social protection systems
- Strengthen and support livelihoods including off farm opportunities
- Enhance access to and functionality of markets
- Strengthen health systems and care to alleviate existing disease burdens
- Support the resilience of livelihoods to shocks
- Enhance post-harvest handling of crops
