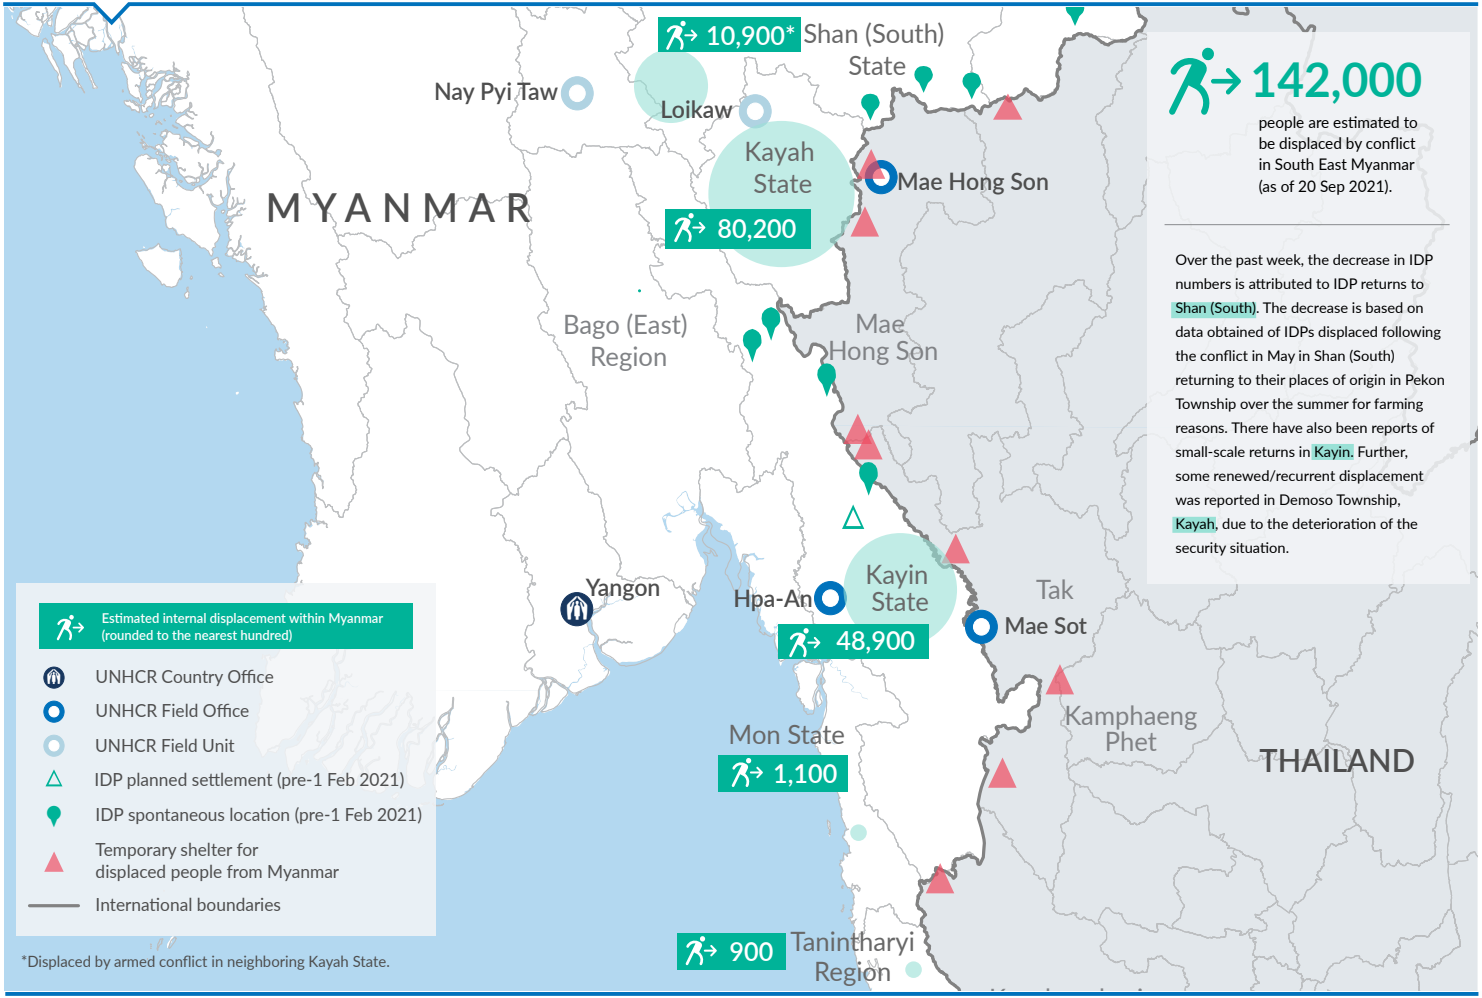
MYANMAR EMERGENCY OVERVIEW MAP

Number of people displaced in South East since Feb 2021 and remain displaced

(as of 20 Sep 2021)



142,000

people are estimated to be displaced by conflict in South East Myanmar (as of 20 Sep 2021).

Over the past week, the decrease in IDP numbers is attributed to IDP returns to Shan (South). The decrease is based on data obtained of IDPs displaced following the conflict in May in Shan (South) returning to their places of origin in Pekon Township over the summer for farming reasons. There have also been reports of small-scale returns in Kayin. Further, some renewed/recurrent displacement was reported in Demoso Township, Kayah, due to the deterioration of the security situation.

*Displaced by armed conflict in neighboring Kayah State.
