

Risk Mitigation Temporary Technical Working Group - CCCM

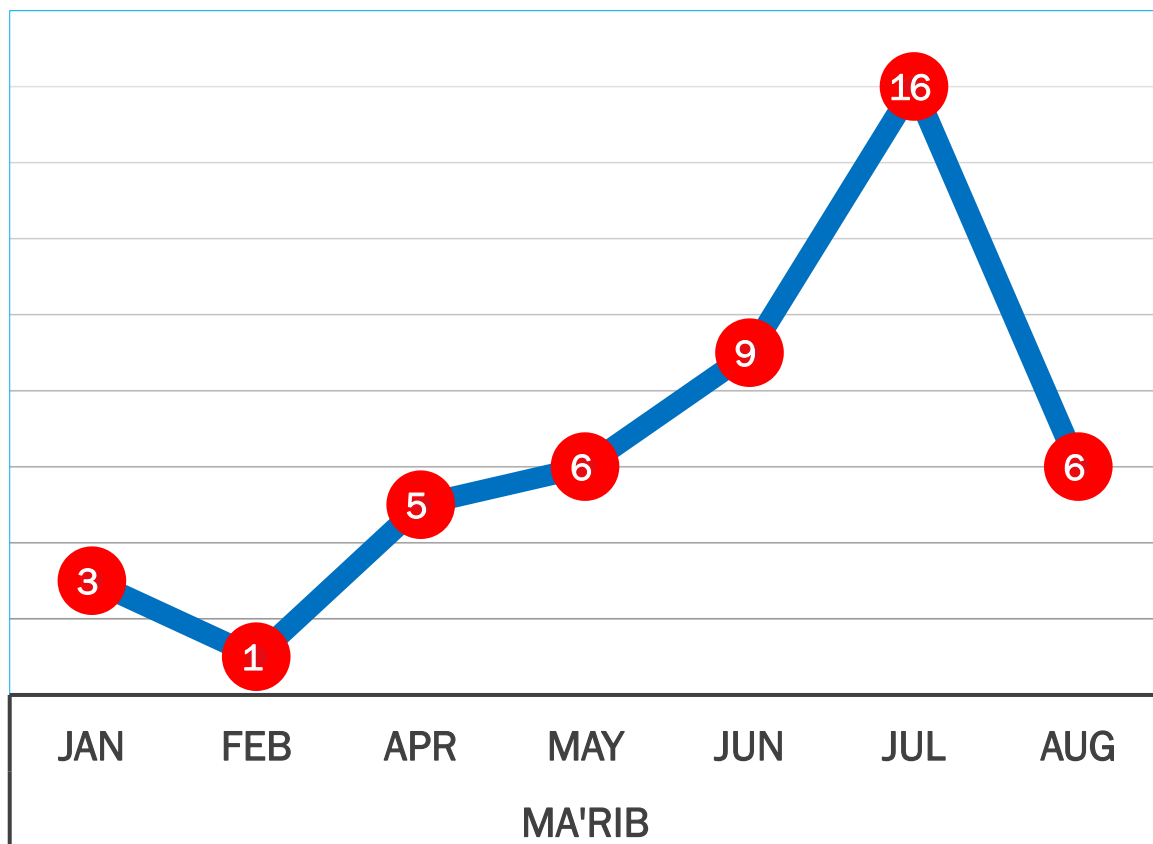

MARIB HUB

Objectives and Outcomes

TWiG as required to agree minimum standards and to formulate the most appropriate technical practices with which to attain those standards for each technical area requiring such input.

The TWiG will:

1. Provide guidance on risk mitigation analysis and assessment.
2. Provide a set of key design standards and parameters for fire incidents risk mitigation including (safe cooking methods) and to be shared with the rest of the cluster.
3. Select the design models to be used as a reference to promote the standards.
4. Observe the provision of field assessments visits.

Fire incidents cumulative chart

Highlights:

The parameters developed will help to avoid future similar incidents through the comprehension of the cases and the identification of viable solution. Establishing agreed methods, will support in providing assistance to affected beneficiaries in a timely manner.
