Total refugee population covered by the food security WG

The data presented in this dashboard is updated at the end of every day and is collected through the food security sub working group. Beneficiaries are counted by adding up the population of the center covered by the members of the sub working group. This sum is extracted everyday but remains an estimation. This count is desegregated to estimate the population covered by the working group and by WFP and its contracted Cooperating Partners. The number of centers covered might vary in the daily and the global count as several partners can be covering the same center. **Contact Info:** felix.cucchi@wfp.org
